

CONTENTS

[Four plates]

	PAGE
PREFACE	[v]
I. THE ORIGINS OF SOLAR SYSTEM CHEMISTRY	
R. J. TAYLER Nucleosynthesis and the origin of the elements	[1]
H. W. KROTO The chemistry of the interstellar medium	[15]
R. D. WOLSTENCROFT AND HELEN J. WALKER Dust discs around low-mass main-sequence stars	[33]
GENERAL DISCUSSION AFTER SESSION I	[49]
II. CHEMICAL EVIDENCE FROM METEORITES	
R. HUTCHISON, C. M. O. ALEXANDER AND D. J. BARBER Chondrules: chemical, mineralogical and isotopic constraints on theories of their origin	[55]
G. KURAT Primitive meteorites: an attempt towards unification	[69]
R. N. CLAYTON, F.R.S., R. W. HINTON AND A. M. DAVIS Isotopic variations in the rock-forming elements	[93]
GENERAL DISCUSSION AFTER SESSION II	[113]
III. THE CHEMISTRY OF SMALL BODIES AND TERRESTRIAL PLANETS	
A. H. DELSEMME The chemistry of comets	[119]
C. T. PILLINGER Stable isotope genealogy of meteorites	[135]
J. T. WASSON AND G. W. KALLEMEYN Composition of chondrites	[145]
H. WÄNKE AND G. DREIBUS Chemical composition and accretion history of terrestrial planets	[155]
GENERAL DISCUSSION AFTER SESSION III	[169]

IV. PLANETARY VOLATILES

	PAGE
G. H. A. COLE	
Atmospheres as a clue to the early Solar System	[179]
D. GAUTIER	
Constraints on the formation of giant planets from their atmospheric chemical composition	[193]
GENERAL DISCUSSION AFTER SESSION IV	[207]

V. THE ORIGIN OF LIFE

S. CHANG	
Planetary environments and the conditions of life	[211]
GENERAL DISCUSSION AFTER SESSION V	[221]
S. K. RUNCORN, F.R.S.	
Concluding remarks	[229]
SIR WILLIAM MCCREA, F.R.S.	
Introduction to panel discussion: chemistry and cosmos	[233]
PANEL DISCUSSION	[241]
