## Part 1 Concepts of the Solar System **3**

---

Chapter 1 Motions in the Solar System	<b>5</b>
1.1 The Visible Stars	6
1.2 The Motions of the Planets	8
1.3 The Motions of the Sun	10
1.4 The Motions of the Moon	13
1.5 Eclipses of the Sun and Moon	14
Conceptual Activity 1 Observing the Sun's Motions	19
Chapter 2 Models of the Solar System	
2.1 Scientific Models	22
2.2 A Model of Motions in the Solar System	23
2.3 Building an Alternative Model	29
2.4 Models of the Solar System: A Historical Perspective	33
2.5 A Heliocentric Model Reborn	36
Conceptual Activity 2 Retrograde Motion of Mars	42
Chapter 3 Gravitation and the Solar System	<b>43</b>
3.1 The Physics of Motion	44
3.2 Motion and Forces	47
3.3 Motion and Gravitation	50
3.4 Cosmic Consequences of Universal Laws	53
Conceptual Activity 3 The Inverse-Square Law	59
Chapter 4 The Earth: A Model Planet	<b>60</b>
4.1 Planetary Evolution and Energy	61
4.2 The Earth's Mass, Density, and Interior	62
4.3 The Evolution of the Crust and the Earth's Age	64
4.4 The Earth's Atmosphere and Oceans	67
4.5 The Earth's Magnetic Field	71
4.6 An Overview of the Earth's Evolution	75
Conceptual Activity 4 Half-Life	80

Chapter 5 Venus and Mars: Earthlike Worlds	<b>82</b>
5.1 Venus: Orbital and Physical Properties	83
5.2 The Atmosphere of Venus	87
5.3 The Active Surface of Venus	88
5.4 Mars: General Characteristics	93
5.5 The Martian Surface	95
5.6 The Moons of Mars	99
Conceptual Activity 5 The Doppler Shift and Planetary Rotation	103

Chapter 6 The Moon and Mercury: Fossil Worlds	<b>105</b>
6.1 The Moon's Orbit, Rotation, Size, and Mass	106
6.2 The Moon's Surface Environment	108
6.3 The Moon's Surface: pre-Apollo	109
6.4 Apollo Mission Results	112
6.5 Angular Momentum and the Earth–Moon System	116
6.6 The Origin of the Moon	117
6.7 Mercury: Orbital and Physical Characteristics	119
6.8 The Evolution of the Moon and Mercury Compared	121
Conceptual Activity 6 The Solar Day on Mercury	126

Chapter 7 The Jovian Planets and Moons	<b>127</b>
7.1 Jupiter	128
7.2 The Moons and Rings of Jupiter	131
7.3 Saturn	135
7.4 The Moons and Rings of Saturn	137
7.5 Uranus	140
7.6 Neptune	143
7.7 Pluto and Charon	146

Chapter 8 Solar System Debris and Origin	<b>152</b>
8.1 Asteroids	153
8.2 Comets	155
8.3 Meteors and Meteorites	159

- 8.4 Nebular Models of the Formation of the Solar System 162
- 8.5 The Formation of the Planets 165
- Conceptual Activity 8 The Orbit of Halley's Comet 170

The View from Miranda, Moon of Uranus 172

## **Part 2 Concepts of the Stellar Evolution** **175**

---

### **Chapter 9 Celestial Light 177**

- 9.1 Sunlight and Spectroscopy 178
- 9.2 Analyzing Sunlight 181
- 9.3 Spectra and Atoms 184
- 9.4 Spectra from Atoms 189
- 9.5 The Doppler Shift Revisited 192
- Conceptual Activity 9 Using a Spectroscope 197

### **Chapter 10 Our Sun: A Model Star 199**

- 10.1 The Sun's Physical Properties 200
- 10.2 Ordinary Gases 200
- 10.3 The Sun's Spectrum 201
- 10.4 Energy Flow in the Sun 206
- 10.5 Energy Production in the Solar Interior 209
- 10.6 The Active Sun 212
- 10.7 Solar Eclipses and Relativity 216
- Conceptual Activity 10 The Size of the Sun 222

### **Chapter 11 The Stars as Suns 224**

- 11.1 Messages of Starlight 225
- 11.2 Stellar Distances: Parallaxes 228
- 11.3 Stellar Colors, Temperatures, and Sizes 230
- 11.4 Spectral Classification of Stars 231
- 11.5 The Hertzsprung–Russell Diagram 234
- 11.6 Weighing and Sizing Stars: Binary Systems 238
- 11.7 Stellar Activity 243
- Conceptual Activity 11 Classifying Stars 247

### **Chapter 12 Starbirth and Interstellar Matter 250**

- 12.1 Interstellar Gas 251
- 12.2 Interstellar Dust 256
- 12.3 Starbirth: Basic Concepts 260
- 12.4 Starbirth: Observations 263

### **Chapter 13 Star Lives 272**

- 13.1 Stellar Evolution and the Hertzsprung–Russell Diagram 273

- 13.2 Stellar Anatomy 275
- 13.3 Star Models 276
- 13.4 Energy Generation and Chemical Compositions 277
- 13.5 Theoretical Evolution of a One-Solar-Mass Star 278
- 13.6 Theoretical Evolution of a Five-Solar-Mass Star 282
- 13.7 Observational Evidence for Stellar Evolution 283
- 13.8 The Synthesis of Elements in Stars 288

### **Chapter 14 Stardeaths 292**

- 14.1 White and Brown Dwarf Stars 293
- 14.2 Neutron Stars 294
- 14.3 Novas 295
- 14.4 Supernovas 297
- 14.5 The Manufacture of Heavy Elements 303
- 14.6 Pulsars 305
- 14.7 Black Holes 308
- 14.8 Observing Black Holes 309

The View from Alpha Centauri, Nearest Star to the Sun 316

## **Part 3 Concepts of Cosmology 319**

---

### **Chapter 15 The Milky Way: Home Galaxy 321**

- 15.1 Overview of the Galaxy's Structure 322
- 15.2 Galactic Rotation 324
- 15.3 Galactic Structure 327
- 15.4 The Evolution of Spiral Structure 331
- 15.5 The Center of the Galaxy 332
- 15.6 The Halo of the Galaxy 336
- 15.7 Evolution of the Galaxy 337

Conceptual Activity 15 The Period–Luminosity Relation for Cepheids 342

### **Chapter 16 Normal Galaxies 343**

- 16.1 The Discovery of Galaxies 344
- 16.2 Types of Normal Galaxies 345
- 16.3 Surveying Galaxies 348
- 16.4 Hubble's Law and Distances 351
- 16.5 General Properties of Galaxies 353
- 16.6 Clusters and Superclusters of Galaxies 356
- 16.7 Intergalactic Medium and Dark Matter 365
- Conceptual Activity 16 Hubble's Law 369

**Chapter 17 Active Galaxies and Quasars 371**

- 17.1 Violent Activity and Active Galaxies 372
- 17.2 Seyfert Galaxies and BL Lacertae Objects 376
- 17.3 Quasars 378
- 17.4 Double Quasars and Gravitational Lenses 381
- 17.5 Troubles with Quasars 383

**Chapter 18 The Cosmos: Past and Present 392**

- 18.1 Cosmological Assumptions and Observations 393
- 18.2 The Big Bang Model 396
- 18.3 The Cosmic Background Radiation 397
- 18.4 The Standard Big Bang Model 398
- 18.5 Elementary Particles and the Cosmos 403
- 18.6 The Inflationary Universe 407

**Chapter 19 Life in the Cosmos 413**

- 19.1 The Nature of Life on the Earth 414
- 19.2 The Genesis of Life on the Earth 415
- 19.3 Life in the Solar System 419

- 19.4 Mass Extinctions on the Earth? 421
- 19.5 Life in the Milky Way Galaxy 422
- 19.6 Neighboring Solar Systems? 423
- 19.7 Where Are They? 424

**The View from Your Imagination 428**

- Appendix A Units A-1
- Appendix B Planetary Data A-5
- Appendix C Physical Constants, Astronomical Data A-10
- Appendix D Nearby Stars A-11
- Appendix E The Brightest Stars A-13
- Appendix F Periodic Table of the Elements A-15
- Appendix G Understanding Flux Maps A-16
- Appendix H Telescopes A-18
- Appendix I Seasonal Sky Charts A-23
- Glossary G-1
- Index I-1
