

Table of Contents

Preface	10
Introduction	11
Chapter 1 ORAL FLUENCY AND THE COMPUTER	15
1.1 THE EDUCATIONAL MICROCOMPUTER	16
1.1.1 Hardware limitations: input-output devices	16
1.1.2 Software limitations: natural language processing	17
1.2 NATURAL LANGUAGE, AI, AND CALL	18
1.2.1 Natural language processing	18
The computer as a model of the mind	18
Natural language interfaces	19
Machine translation	20
1.2.2 Artificial intelligence and CALL	20
Expert systems	21
Extra-curricular expert systems	22
Pedagogical expert systems	23
1.2.3 Natural language generation and comprehension in CALL	24
1.3 AUDITORY PRODUCTION AND RECEPTION	24
1.3.1 Screen, keyboard and auditory production and reception	25
1.3.2 Existence of an underlying linguistic skill	26

	Psycholinguistic evidence	26
	Evidence from cognitive neuropsychology	26
	Split brain patients	27
	Underlying linguistic capability as a network of cognitive sub-systems	28
1.3.3	Interaction between cognitive sub-systems	29
	Aural dominance	29
	Cognitive development in deaf children	30
	Sub-vocalization and inner-speech	30
	Evidence for modality interaction from cognitive psychology	31
	Visual input - auditory input and output	31
	Visual output - auditory input and output	32
	Empirical statistical evidence	32
	Evidence from second language research	33
1.4	CONCLUSION	33
Chapter 2	CURRICULUM APPROACHES AND THE COMPUTER	35
2.1	LANGUAGE NEEDS ANALYSES	37
2.1.1	Aims and objectives of language teaching	37
2.1.2	Communicative competence	38
2.2	COMMUNICATIVE COMPETENCE AND THE COMPUTER	41
2.2.1	Communicating with a computer	41
	Absence of aural communication	41
	Graphics	42
	Text display	43
2.2.2	Computer processing	44
	Ease of coding and storage	44
	Traditional categories of linguistic analysis and the computer	45
2.3	SYLLABUS DESIGN AND THE COMPUTER	46
2.3.1	Current trends in syllabus design	46
2.3.2	Changes in syllabus design and computerization prospects	48
2.4	CONCLUSION	49
Chapter 3	METHODOLOGY AND THE COMPUTER	50
3.1	TRENDS IN TEACHING PROCEDURES	51
3.2	THE PRESENTATION PHASE AND THE COMPUTER	53
3.3	PRE-COMMUNICATIVE ACTIVITIES AND THE COMPUTER	53
3.3.1	Drills	54
3.3.2	Vocabulary practice	56
3.3.3	Text reconstruction	57
	Cloze	57
	Other kinds of text manipulation	58
	Giving text manipulation a communicative dimension	59
3.3.4	Concordance packages	60

3.4	COMMUNICATIVE ACTIVITIES AND THE COMPUTER	61
3.4.1	Computer-based versus computer-assisted	61
3.4.2	Conversation-based packages	63
	Simulating conversation	63
	Drawing packages	65
	Adventure games	67
	Problem-solving	69
3.4.3	Other types of computer-based activities	70
	Other normal uses of language	70
	Databases	71
	Games	72
	Word processing	72
X 3.5	COMPUTER-ASSISTED 'COMMUNICATIVE' ACTIVITIES	74
3.5.1	Debriefing sessions	74
3.5.2	Group work	75
3.5.3	The computer and the teacher's rôle	78
3.6	CONCLUSION	79
Chapter 4	LANGUAGE ACQUISITION AND THE COMPUTER	83
4.1	KRASHEN'S ACCOUNT OF THE ACQUISITION PROCESS	85
4.2	THE REQUIREMENT FOR COMPREHENSIBLE INPUT	87
4.2.1	The problem of availability	87
4.2.2	Speed and comprehensibility	88
4.2.3	Simpler lexicon and simpler syntax	89
4.2.4	Extra-linguistic support	89
4.2.5	Making input comprehensible	90
4.3	THE REQUIREMENT FOR INTERESTING/RELEVANT INPUT	91
4.3.1	The topic	91
4.3.2	Branching stories	92
4.3.3	Adventures	92
4.3.4	Relevance and comprehensibility	93
4.4	THE REQUIREMENT FOR NON GRAMMATICALLY SEQUENCED INPUT	93
4.5	THE REQUIREMENT FOR INPUT IN SUFFICIENT QUANTITY	95
4.5.1	Problems with quantity	95
4.5.2	The computer as supplier of input	95
4.5.3	Link between quantity and comprehensibility	96
4.6	CONCLUSION	96
Chapter 5	AFFECTIVE VARIABLES AND THE COMPUTER	99
5.1	AFFECTIVE VARIABLES	99
5.2	ATTITUDES TOWARDS THE MEDIUM	100
5.3	MOTIVATION AND THE COMPUTER	100
5.4	SELF-CONFIDENCE, SELF-IMAGE, AND THE COMPUTER	103

5.4.1	Boosting self-confidence	103
5.4.2	Improving the learner's status	104
5.4.3	The case of the introvert	105
5.5	IN-CLASS ANXIETY AND THE COMPUTER	105
5.5.1	Humanistic approaches	105
5.5.2	User-friendliness	106
5.5.3	Individualization	106
5.5.4	Privacy	108
5.5.5	Error correction	109
5.6	CONCLUSION	112
Chapter 6	LEARNING AND THE COMPUTER	116
6.1	GRAMMAR LEARNING AND THE COMPUTER	117
6.1.1	The importance of grammar	117
6.1.2	The computer and the learning of grammar	118
	What to teach	119
	The deductive-inductive issue	119
	Benefits of computerization	120
	Error correction revisited	122
6.2	OTHER LEARNING AND THE COMPUTER	124
6.2.1	Vocabulary	124
	Learning vocabulary	124
	Computerized word games	126
	The computer and mnemonics	127
	DIY vocabulary	128
6.2.2	Formulaic speech	128
6.2.3	Orthography	129
6.3	THE DEVELOPMENT OF READING SKILLS AND THE COMPUTER	130
6.4	OTHER APPLICATIONS	132
6.5	CONCLUSION	132
	Conclusion	135
	Appendix: Software referred to	136
	Bibliography	138
	Index	150
