Part 4 – FISCAL INCIDENCE

Chapter 26

Tax Incidence

DON FULLERTON and GILBERT E. METCALF

	1787
Abstract	1788
Keywords	1788
Introduction	1789
1. Basic machinery of incidence analysis	1790
1.1. Definitions and concepts	1791
1.2. Log-linearization	1795
2. Static analytical models	1799
2.1. Two-sector general equilibrium model	1800
2.2. Special cases: one-sector model	1802
2.3. Analysis of the two-sector model	1806
2.4. The corporate income tax	1812
2.5. The property tax	1815
2.6. Empirical work	1817
3. Imperfect competition	1823
3.1. Oligopolies	1823
3.2. Differentiated products	1828
4. Dynamic models and incidence	1832
4.1. Taxation in a growing economy	1833
4.2. Taxation in a perfect foresight model	1834
4.3. Incidence and the market value of capital	1840
5. Lifetime tax incidence	1844
5.1. A lifetime utility model	1848
5.2. Generational accounts	1856

6. Policy analysis	1858
6.1. The distributional table	1859
6.2. Suggested changes	1862
7. Conclusion	1866
References	1867

Chapter 27

Generational Policy	
LAURENCE J. KOTLIKOFF	1873
Abstract	1875
Keywords	1875
1. Introduction	1876
2. The incidence of generational policy	1878
2.1. The life-cycle model	1878
2.2. The government's intertemporal budget constraint	1880
2.3. The incidence of generational policy	1880
2.4. The zero-sum nature of generational policy	1881
3. Illustrating generational policy	1884
3.1. A Cobb–Douglas example	1884
3.2. The crowding out of capital	1884
3.3. The policy's incidence	1885
4. Deficit delusion and the arbitrary nature of fiscal labels	1886
4.1. Alternative fiscal labels	1887
4.2. Other guises of generational policy	1889
4.3. Generalizing the point that the deficit is not well defined	1890
4.4. Implications for empirical analyses of deficits, personal saving, and portfolio choice	1901
5. Generational accounting	1901
5.1. The method of generational accounting	1902
5.2. Illustrating generational accounts – the case of the USA	1908
6. Simulating generational policy	1916
6.1. Switching from income to consumption taxation	1918
6.2. Social Security's privatization	1920
7. Ricardian equivalence	1922
7.1. Barro's proof of the irrelevance proposition	1923
7.2. Theoretical objections to the Barro framework	1924
7.3. Testing intergenerational altruism	1925
8. The government's role in intergenerational risk sharing	1927
9. Conclusion	1928
References	1928

Part 5 – INTERGOVERNMENTAL RELATIONS

Chapter 28

International Taxation

ROGER H. GORDON and JAMES R. HINES JR	1935
Abstract	1936
Keywords	1936
1. Introduction	1937
2. Optimal income taxation in an open economy	1939
2.1. Choice of tax instrument	1940
2.2. Taxation of foreign income	1943
3. Tax complications in open economies	1945
3.1. Increased enforcement problems in open economies	1945
3.2. Countries that affect market prices	1948
3.3. Time inconsistency of the optimal tax system	1951
3.4. Fiscal externalities	1952
4. Taxes and portfolio capital flows	1956
4.1. Uniform income taxation	1956
4.2. Nonuniform income taxation	1959
4.3. Home bias	1961
5. Taxes and the behavior of multinational firms	1964
5.1. Behavioral evidence	1964
5.2. Reconciling theory and evidence	1975
6. Understanding existing international tax provisions	1986
7. Conclusion	1988
References	1989

Chapter 29

Local Public Goods and Clubs

SUZANNE SCOTCHMER	1997
Abstract	1998
Keywords	1998
1. Introduction	1999
2. Club economies	1999
2.1. Equilibrium concepts	2000
2.2. Heterogeneous crowding	2005
2.3. Trade in private goods	2009
3. Free mobility equilibrium	2011
4. Land, location and capitalization	2019
4.1. Diffused local public goods and capitalization	2019
4.2. Location	2027
4.3. Bundling	2029
5. The public–private interface	2030

6. Some new ideas	2035
References	2036

Part 6 – PUBLIC EXPENDITURE PROGRAMS

Chapter 30

Publicly Provided Education	
ERIC A. HANUSHEK	2045
Abstract	2046
Keywords	2046
Introduction	2047
1. Scope and roadmap for discussion	2048
2. Overview of schooling issues	2050
2.1. Quantity of schooling	2050
2.2. Quality considerations	2055
2.3. Aggregate resources and school outcomes	2059
3. Role of government	2064
4. Efficiency of production	2068
4.1. General structure	2069
4.2. Effects of teacher and schools	2071
4.3. Components of school inputs	2073
4.4. Results of production function estimation for the USA	2074
4.5. The importance of study quality	2083
4.6. International evidence	2086
5. Interpretation of evidence on school performance	2088
5.1. Controversies	2090
5.2. Cost considerations	2103
5.3. Institutional structure and incentives	2104
6. Public versus private provision	2107
6.1. Unsubsidized choice	2108
6.2. Subsidized choice	2111
6.3. International evidence	2113
7. Financing of schools	2114
7.1. Alternative funding schemes	2115
7.2. Fiscal effects of alternative plans	2119
7.3. Effect of equalization on equity	2120
7.4. Mobility, distribution, and equilibrium	2122
8. Some underexplored topics	2124
References	2125

Chapter 31

Health Care and the Public Sector

DAVID M. CUTLER	2143
Abstract	2145
Keywords	2145
Introduction	2146
1. Medical care and the public sector	2151
2. Public policy for health-related behaviors	2155
2.1. External consequences of individual actions	2156
2.2. Estimating external consequences of smoking and drinking	2158
2.3. Internal costs and rational addiction	2162
3. The market for medical care services	2165
4. Government versus private provision	2167
5. Moral hazard and the tax subsidy to insurance	2169
5.1. Optimal insurance with fixed spending	2170
5.2. Optimal insurance with moral hazard	2174
5.3. Taxation and health insurance design	2177
5.4. Qualifications	2190
6. The supply side	2192
7. Heterogeneous risks and selection	2194
7.1. Risk segmentation	2195
7.2. Adverse selection and market failure	2197
7.3. Evidence on the importance of biased enrollment	2201
7.4. Evidence on the importance of plan manipulation	2207
7.5. Public policy with heterogeneous risks	2207
8. Combining public and private insurance	2215
9. Equity concerns and policy for the poor	2217
9.1. Medical care for the poor in the USA	2217
9.2. Optimal policy for the poor	2219
9.3. Crowding out: theory and empirical evidence	2220
9.4. Medicaid expansions and other behaviors	2225
9.5. Medicaid expansions and health outcomes	2226
10. Intergenerational aspects of medical care	2230
11. Conclusions	2231
References	2233

Chapter 32

Social Security

MARTIN FELDSTEIN and JEFFREY B. LIEBMAN	2245
Abstract	2246
Keywords	2246
1. Introduction	2247

2. Government provision of retirement pensions: rationale and evolution	2248
2.1. Alternative forms of retirement pensions	2248
2.2. The rationale for government provision	2251
2.3. Historical evolution	2254
2.4. Political economy explanations of the existing Social Security programs	2256
3. The basic economics of pay-as-you-go Social Security	2257
3.1. The present value consumption loss caused by pay-as-you-go Social Security	2258
3.2. The deadweight loss caused by the distortion of labor supply and of taxable labor income	2261
3.3. The trust fund in a pay-as-you-go system	2264
4. Optimizing a pay-as-you-go system	2266
4.1. A baseline case with complete myopia	2267
4.2. Balancing protection and distortion with partial myopia	2269
4.3. Universal versus means-tested Social Security benefits	2271
4.4. Models with variable retirement	2273
4.5. Other aspects of pay-as-you-go program design	2274
5. Behavioral effects: theory and evidence	2274
5.1. Saving	2275
5.2. Retirement	2282
5.3. Pre-retirement labor supply	2285
5.4. Portfolio composition	2285
6. Distributional effects of pay-as-you-go Social Security	2286
6.1. The returns to Social Security for different cohorts	2286
6.2. Intracohort redistribution in the current US system	2288
6.3. General equilibrium consequences of pay-as-you-go Social Security	2289
6.4. Social Security and the distribution of wealth	2291
7. Investment-based Social Security programs	2292
7.1. The economics of an investment-based system	2292
7.2. The transition to an investment-based system	2305
7.3. Risk aspects of investment-based Social Security reform	2308
7.4. Distributional aspects of investment-based reform	2313
8. Conclusion	2314
References	2315

Part 7 – LABOR MARKET EFFECTS

Chapter 33

Labor Supply Effects of Social Insurance

ALAN B. KRUEGER and BRUCE D. MEYER

2327

Abstract

2328

Keywords

2328

1. Introduction

2329

2. Unemployment insurance

2334

 2.1. Main features of US unemployment insurance programs

2334

2.2. Unemployment insurance financing	2336
2.3. Unemployment insurance programs outside of the USA	2337
2.4. Theoretical responses of labor supply to unemployment insurance	2339
2.5. Labor supply effects of unemployment insurance: empirical evidence	2342
3. Workers' compensation	2356
3.1. Main features of US workers' compensation programs	2356
3.2. Workers' compensation financing	2358
3.3. Comparisons of unemployment insurance and workers' compensation program costs in the USA	2358
3.4. Workers' compensation outside of the USA	2360
3.5. Theoretical responses of labor supply to workers' compensation	2361
3.6. Labor supply effects of workers' compensation: empirical evidence	2365
4. Social Security retirement program	2375
4.1. Automatic benefit recomputation	2375
4.2. Liquidity constraints	2377
4.3. Earnings test	2379
5. Disability insurance	2384
6. Conclusion	2386

Chapter 34

Welfare Programs and Labor Supply

ROBERT A. MOFFITT	2393
Abstract	2394
Keywords	2394
Introduction	2395
1. US policy and institutional background	2395
2. Theoretical models and issues	2402
2.1. Introduction	2402
2.2. Basic static model	2403
2.3. Dynamics	2408
2.4. Work requirements and tagging models	2411
2.5. Wage and earnings subsidies	2413
2.6. In-kind transfers	2417
3. Empirical evidence: a short review	2417
3.1. Introduction	2419
3.2. Pre-1995 estimates	2420
3.3. Post-1995 structural estimates	2422
3.4. Post-1995 reduced-form policy impact estimates	2426
4. Summary	2427
