<i>List of Figures</i>	ix
<i>List of Tables</i>	xii
<i>Preface</i>	xiii
<i>Acknowledgments</i>	xvi
<b>PART 1</b>	
<b>Introduction</b>	<b>1</b>
<b>1 Enabling Innovations in Education and Systematizing their Impact</b>	<b>3</b>
ANTHONY E. KELLY, JOHN Y. BAEK, RICHARD A. LESH, AND BRENDA BANNAN-RITLAND	
<b>PART 2</b>	
<b>Design Research and its Argumentative Grammar</b>	<b>19</b>
<b>2 The “Compleat” Design Experiment: From Soup to Nuts</b>	<b>21</b>
JAMES MIDDLETON, STEPHEN GORARD, CHRIS TAYLOR, AND BRENDA BANNAN-RITLAND	
<b>3 Instrumentation and Innovation in Design Experiments: Taking the Turn Towards Efficiency</b>	<b>47</b>
DANIEL L. SCHWARTZ, JAMMIE CHANG, AND LEE MARTIN	
<b>4 Experimenting to Support and Understand Learning Processes</b>	<b>68</b>
PAUL COBB AND KOENO GRAVEMEIJER	
<b>5 Engineering and Design Research: Intersections for Education Research and Design</b>	<b>96</b>
MARGRET A. HJALMARSON AND RICHARD A. LESH	
<b>6 Variation Theory: An Organizing Principle to Guide Design Research in Education</b>	<b>111</b>
MONA HOLMQVIST, LAILA GUSTAVSSON, AND ANNA WERNBERG	

<b>7</b>	<b>Multitiered Design Experiments in Mathematics, Science, and Technology Education</b>	<b>131</b>
	RICHARD A. LESH, ANTHONY E. KELLY, AND CAROLINE YOON	
<b>8</b>	<b>Balancing Product Design and Theoretical Insights</b>	<b>149</b>
	LISSE R. EJERSBO, ROBIN ENGELHARDT, LISBETH FRØLUNDE, THORKILD HANGHØJ, RIKKE MAGNUSSEN, AND MORTEN MISFELDT	
<b>PART 3</b>		
	<b>Modeling Student Learning During Design Research</b>	<b>165</b>
<b>9</b>	<b>Research Methods for Alternative Approaches to Transfer: Implications for Design Experiments</b>	<b>167</b>
	JOANNE LOBATO	
<b>10</b>	<b>A Methodology for Documenting Collective Activity</b>	<b>195</b>
	CHRIS RASMUSSEN AND MICHELLE STEPHAN	
<b>PART 4</b>		
	<b>Modeling Teacher Learning Using Design Research</b>	<b>217</b>
<b>11</b>	<b>Developing Design Studies in Mathematics Education Professional Development: Studying Teachers' Interpretive Systems</b>	<b>219</b>
	JUDITH ZAWOJEWSKI, MICHELLE CHAMBERLIN, MARGRET A. HJALMARSON, AND CATHERINE LEWIS	
<b>12</b>	<b>Teacher Design Research: An Emerging Paradigm for Teachers' Professional Development</b>	<b>246</b>
	BRENDA BANNAN-RITLAND	
<b>PART 5</b>		
	<b>Modeling Stakeholder Commitments Using Design Research</b>	<b>263</b>
<b>13</b>	<b>Toward Assessment of Teachers' Receptivity to Change in Singapore: A Case Study</b>	<b>265</b>
	JEANNE WOLF, MANI LE VASAN	
<b>14</b>	<b>A Design Research Approach to Investigating Educational Decision Making</b>	<b>284</b>
	S. DAVID BRAZER AND L. ROBIN KELLER	
<b>PART 6</b>		
	<b>Reflecting on Design Research at the Project Level</b>	<b>297</b>
<b>15</b>	<b>Investigating the Act of Design in Design Research: The Road Taken</b>	<b>299</b>
	BRENDA BANNAN-RITLAND AND JOHN Y. BAEK	

<b>16</b>	<b>Illuminating the Braids of Change in a Web-Supported Community: A Design Experiment by Another Name</b>	<b>320</b>
	SASHA A. BARAB, EUN-OK BAEK, STEVE SCHATZ, REBECCA SCHECKLER, AND JULIE MOORE	
<b>17</b>	<b>Design Methods for Educational Media to Communicate: When We Cannot Predict What Will Work, Find What Will Not Work</b>	<b>353</b>
	RAUL A. ZARITSKY	
<b>PART 7</b>		
	<b>Reflecting on Design Research at the Program Level</b>	<b>367</b>
<b>18</b>	<b>Getting to Scale with Innovations that Deeply Restructure How Students Come to Know Mathematics</b>	<b>369</b>
	JEREMY ROSCHELLE, DEBORAH TATAR, AND JIM KAPUT	
<b>19</b>	<b>Music Training and Mathematics Achievement: A Multiyear Iterative Project Designed to Enhance Students' Learning</b>	<b>396</b>
	MICHAEL E. MARTINEZ, MATTHEW PETERSON, MARK BODNER, ANDREW COULSON, SYDNI VUONG, WENJIE HU, TINA EARL, AND GORDON L. SHAW	
<b>20</b>	<b>Design Experiments and Curriculum Research</b>	<b>410</b>
	DOUGLAS H. CLEMENTS	
<b>21</b>	<b>The Design Principles Database as a Means for Promoting Design-Based Research</b>	<b>423</b>
	Yael KALI	
<b>PART 8</b>		
	<b>Extending Design Research Methodologically</b>	<b>439</b>
<b>22</b>	<b>Design Research and the Study of Change: Conceptualizing Individual Growth in Designed Settings</b>	<b>441</b>
	FINBARR C. SLOANE AND ANTHONY E. KELLY	
<b>23</b>	<b>Longitudinal Analysis and Interrupted Time Series Designs: Opportunities for the Practice of Design Research</b>	<b>449</b>
	FINBARR C. SLOANE, BRANDON HELDING, AND ANTHONY E. KELLY	
<b>24</b>	<b>Multilevel Models in Design Research: A Case from Mathematics Education</b>	<b>459</b>
	FINBARR C. SLOANE	
<b>25</b>	<b>Modeling Complexity in Mathematics Education</b>	<b>477</b>
	DONALD SAARI	
<b>26</b>	<b>Design-Based Research in Physics Education: A Review</b>	<b>493</b>
	RICHARD R. HAKE	

**PART 9**

<b>Tracking the Diffusion of Design Research</b>	<b>509</b>
--	------------

<b>27 Design Research and the Diffusion of Innovations</b>	<b>511</b>
--	------------

R. SAM LARSON AND JAMES W. DEARING

# Figures

2.1	General Model of Design Research	22
2.2	Basic Model of Scientific Research in Education	28
2.3	Three “New” Phases in the Design Experiment—Phases 3 to 5 of the Compleat Research Process	30
2.4	The Compleat Design Cycle	32
2.5	Standard Fractions and Division Problems Given During Baseline Interviews	36
3.1	Trajectories of Knowledge Growth	48
3.2	Students Innovate a Reliability Index to Measure Pitching Machines	55
3.3	Taking the Turn in Learning and Science	56
3.4	Design of Assessment Experiment and Results	58
4.1	Data on the Life Spans of Two Different Brands of Batteries in the First Computer Tool	72
4.2	The Battery Data in the First Computer with the Options of Bounding an Interval and Partitioning at a Data Value Shown	79
4.3	Data on the T-Cell Counts of Two Groups of AIDS Patients in the Second Computer Tool	79
4.4	The AIDS Data Partitioned at the T-Cell Count of 550	80
4.5	The AIDS Data Organized into Four Equal Groups with Data Hidden	80
4.6	Data on the Salaries of Women by Years of Education in the Third Computer Tool	81
4.7	Salary and Education Data for Women Organized the Grids Option	82
4.8	Salary and Education Data for Women Organized the Grids Option Four-Equal-Groups Option	82
6.1	Geometric Shapes Suggested by Pre-existing Knowledge	113
6.2	Selection Process Used to Make Up the Groups of Students who Participated in the Learning Study Cycles	116
8.1	The “Osmotic” Model, Which Represents our Current Understanding of How to Balance Artifact and Theory Generation in a Design Research Paradigm	150
8.2	The Ethnographic Approach Taken in the Mathematical Writing Project	154
8.3	The Product Design Approach Taken in the <i>Homicide</i> Project	156
8.4	The Methodological Path Taken in the Teachers’ In-Service Education Project Using Open Problem Solving in Mathematics	159
9.1	Relation of Similarity Inferred from the Work of One Student	171
9.2	Transfer Tasks Used in Interviews	177

9.3	Author's Representation of Terry's Method for Decreasing the Length of the Base of the Wheelchair Ramp	179
9.4	Terry's Drawing for Finding the Amount by which he Needs to Extend the Height of the Wheelchair Ramp in Order to Keep its Steepness the Same when the Length is Extended by 1 Foot	180
9.5	Focusing Phenomena and their Relationships to One Another and to Students' Generalizations	185
10.1	Toulmin's Model of Argumentation	197
10.2	Two Methods of Counting as Students Paced the Length of a Rug	202
10.3	The Core of the Collective Emerging Argumentation	203
10.4	The Teacher's Graph of the Fate of the Rabbit Population Starting with Ten Rabbits	206
10.5	The Teacher's Sketch of the Relation Between the Slopes on Two Solution Curves	206
10.6	John's Argument for the Invariance of Slopes	208
10.7	A Shift From Conclusion to Data	209
10.8	The Structure of the Methodology	211
11.1	Design Study Situated in Context	222
11.2	Illustration of the Products Designed by the Different Constituencies	230
11.3	Different Options Available for Collecting and Analyzing Data	231
13.1	Receptivity to Change Framework	269
15.1	Questions and Methods for Design Research by ILDF Phase	302
15.2	Progressive Formulation of Conjectures to Local Evaluation Questions for the LAO Project	308
16.1	The Inquiry Learning Forum (ILF) Home Screen	326
16.2	Current Iteration of a Specific Inquiry Learning Forum Classroom	327
16.3	Timeline of Design Episodes in the Inquiry Learning Forum	330
16.4	Iteration of an Inquiry Learning Forum (ILF) Inquiry Circle	333
16.5	Current Iteration of an Inquiry Learning Forum (ILF) Inquiry Circle (Water Ecology)	338
16.6	Inquiry Learning Forum (ILF) Number of Postings Per Month from its Release in February 2000 through December 2001	344
17.1	A Still from the Educational Research Visualization Video Showing a Student Using Multiple Methods to Explain her Work	357
17.2	Graphic Showing the "New Groups Below" Method	358
18.1	Three Perspectives of the Restructuring Knowing Framework	372
18.2	Framework for Classroom Learning	378
18.3	Spider Diagram of SimCalc's Coverage of Four Concerns	391
19.1	Frequencies of the Students' Game Scores Showing an Impasse at 130 Points	404
19.2	Accuracy in Pre- and Post-Tests of the Place Value Spatial Games	405
19.3	Accuracy in Pre- and Post-Tests of Place Value Language Integration	405
21.1	Schematic Representation of the Structure of The Design Principles Database	426
21.2	Pragmatic Principle in the Design Principles Database	429
21.3	Interface of the Peer Evaluation Activity in the Collaborative e-Learning Structures Environment	431

21.4	The Degree of Contribution of the Peer Evaluation Activity to Students' Learning in the First Two Iterations, as Indicated by the Attitude Questionnaire	432
23.1	The Simulation from an Interrupted Time Series Perspective	450
24.1	Four Possible Patterns for Intercepts and Slopes when the Level 1 Model is Estimated Separately for Each Group	463
25.1	Sierpinski Triangle	478
25.2	Chaos Tree	480
25.3	A "Part-Whole" Tree	485
25.4	Dynamics of Social Norms	488
26.1	%<Gain> Versus %<Pretest> Scores on the Conceptual <i>Mechanics Diagnostic</i> (MD) or <i>Force Concept Inventory</i> (FCI) Tests for 62 Courses	499
27.1	Most Purposive Efforts to Spread Innovations Fail. Diffusion is the Exception, Not the Norm, in Social Change	511
27.2	Innovations Spread Through a Social System or Social Sector After Positive Adoption Decisions and/or Social Modeling of the Innovation by Local, Informal, Opinion Leaders, who Comprise a Subset of All Early Adopters	524
27.3	When Enacted Strategically, Diffusion Principles Can Accelerate Diffusion, Including the Spread of Effective Innovations Among Typically Disadvantaged Late Adopters	527

# Tables

3.1	Percentage of Students who Successfully Explained why a Formula Uses a Given Operation	57
6.1	Comparisons of the English and Swedish Forms of the Present Tense of the Verb “To Be”	118
6.2	Examples of Students’ Sentences Containing “Am”, “Are,” and “Is” in English Research Lesson Two	120
6.3	The Lived Object of Learning Expressed as Percentages of Correct Answers in English Research Lessons One, Two, and Three	123
6.4	The Enacted Object of Learning for the Three English Research Lessons	124
6.5	The Percentage of Correct Answers in the Spelling Tests in Swedish Research Lessons Four, Five, and Six	126
9.1	Data Collected by Students Showing the Enlargement Factor of an Overhead Projector Placed at Varying Distances from the Wall	185
10.1	A Page of the Mathematics Ideas Charts	200
11.1	An Initial Planning Chart for a Design Study	235
14.1	Three Foci for Multiobjective Multistakeholder Educational Decision Making in Research and Practice	289
14.2	Possible Outcomes from Retention Policy Choices	291
16.1	Comparing Psychological Experimentation and Design-Based Research Methods	321
18.1	SimCalc’s Approach to Uniting Three Perspectives	373
24.1	Working Hypotheses and their Assumed Conditions: Mathematical Performance, Beliefs About Mathematics, and Sociomathematical Norms (Within Groups)	467
24.2	Framework for Interpreting Individual and Social Activity in Learning	467
25.1	Improved Performance	484
25.2	Overall Decline in Performance	485
27.1	Comparison of the Main Attributes of Experimental Demonstrations and Exemplary Demonstrations	520
