

# CONTENTS

*A detailed contents list is given at the beginning of each chapter.*

Preface . . . . .	vii
Chapter 1. The physical chemistry of transport and separation by membranes, by P. Meares . . . . .	1
Chapter 2. Liquid permeation through polymeric membranes, by H.D. Spriggs and N.N. Li . . . . .	39
Chapter 3. Principles and practice of ultrafiltration, by W.F. Blatt . . . . .	81
Chapter 4. Reverse osmosis (hyperfiltration) in water desalination, by F.L. Harris, G.B. Humphreys and K.S. Spiegler . . . . .	121
Chapter 5. Hollow fibres in reverse osmosis, dialysis, and ultrafiltration, by B. Baum, W. Holley, Jr. and R.A. White . . . . .	187
Chapter 6. Electrodialysis, by G.S. Solt . . . . .	229
Chapter 7. Piezodialysis, by F.B. Leitz . . . . .	261
Chapter 8. The separation of gases by selective permeation, by S.A. Stern . . . . .	295
Chapter 9. Hydrocarbon separation by liquid membrane processes, by R.P. Cahn and N.N. Li . . . . .	327
Chapter 10. Enzyme membranes, by D. Thomas and S.R. Caplan . . . . .	351
Chapter 11. Separators and membranes in electrochemical power sources, by J.A. Lee, W.C. Maskell and F.L. Tye . . . . .	399
Chapter 12. Recent developments in ion-selective membrane electrodes, by R. Bloch and E. Löbel . . . . .	477
Chapter 13. The treatment of aqueous wastes and foods by membrane processes, by D.C. Sammon . . . . .	499
Chapter 14. Biomedical applications of membrane processes, by C.R. Gardner . . . . .	529
Author index . . . . .	575
Subject index . . . . .	595
