1	Introduction to opioids Howard S. Smith	1
2	Overview of opioid-related terminology Kenneth C. Jackson and Howard S. Smith	7
3	Diagnosis and assessment of pain Charles E. Argoff	11
4	Opioid pharmacology Mellar P. Davis and Howard S. Smith	19
5	Optimizing pharmacologic outcomes	
	a. Drug selection Howard S. Smith and Kenneth C. Jackson	27
	b. Route selection Howard S. Smith	43
	c. Assessing and managing opioid side effects Howard S. Smith and Gary McCleane	47
	d. Principles of opioid rotation Bill H. McCarberg and Howard S. Smith	59
	e. Individualization of therapy Howard S. Smith	71
6	Opioid therapy for cancer pain Mellar P. Davis and Howard S. Smith	77
7	Evidence for the use of long-term opioid therapy in persistent noncancer pain Howard S. Smith and Gary McCleane	91
8	Pre-opioid prescribing period Howard S. Smith	97
9	Identifying patients at risk for pain medication misuse Lynn R. Webster and Howard S. Smith	101

10	Potential documentation tools in long-term opioid therapy Howard S. Smith and Kenneth L. Kirsh	109
11	Managing the risk of abuse, addiction, and diversion Howard S. Smith	115
12	Special populations	
	a. Pediatric Amy Mitchell and Howard S. Smith	121
	b. Geriatric Gary McCleane	133
	c. Palliative care Lida Nabati and Janet Abraham	143
13	Patients with a history of substance abuse Kenneth L. Kirsh and Steven D. Passik	155
14	Resources Howard S. Smith	163

Appendix 1. Sample AAPM Form: Consent for Chronic Opioid Therapy 165

Appendix 2. Sample AAPM Agreement: Long-term Controlled Substances Therapy for Chronic Pain 167

Appendix 3. Numerical Opioid Side Effect (NOSE) Assessment Tool 169

Appendix 4. Translational Analgesia Score (TAS) 170
