<b>chapter 0</b>	<b>Introduction to object-oriented software design</b>	<b>1</b>
0.1	<b>What is a software system?</b> .....	3
0.1.1	Dealing with complexity: composition and abstraction .....	3
0.1.2	Two aspects of a system: data and functionality .....	6
0.2	<b>Object-oriented systems</b> .....	8
0.3	<b>Summary</b> .....	10
<b>chapter 1</b>	<b>Data abstraction: introductory concepts</b>	<b>15</b>
1.1	<b>Objects</b> .....	16
1.1.1	Data and state .....	16
1.1.2	Functionality: queries and commands .....	19
1.1.3	Some cautions .....	21
1.2	<b>Values and types</b> .....	22
1.2.1	Values and types in Java .....	23
1.2.2	Types and variables .....	24
1.3	<b>Classes</b> .....	27
1.4	<b>An example</b> .....	27
1.5	<b>Reference values: objects as properties of objects</b> .....	33
1.6	<b>Overview of a complete system</b> .....	38
1.6.1	An example: testing a <i>Counter</i> .....	40
1.7	<b>Java in detail: identifiers and literals</b> .....	44
1.7.1	Identifiers .....	44
1.7.2	Literals .....	46
1.8	<b>Java in detail: lexical structure</b> .....	49
1.9	<b>Objects that “wrap” primitive values</b> .....	51
1.10	<b>Java in detail: primitive types</b> .....	52
1.11	<b>Java in detail: literals, the rest of the story</b> .....	54
1.12	<b>Summary</b> .....	55
<b>chapter 2</b>	<b>Defining a simple class</b>	<b>61</b>
2.1	<b>Object interaction: clients and servers</b> .....	62

2.1.1	Specification and implementation . . . . .	63
<b>2.2</b>	<b>Defining a class: a simple counter</b> . . . . .	64
2.2.1	Specifying the class features . . . . .	67
2.2.2	Static diagrams . . . . .	69
2.2.3	Invoking a method or constructor . . . . .	71
2.2.4	Interaction diagrams . . . . .	72
<b>2.3</b>	<b>Implementing the class <i>Counter</i></b> . . . . .	74
2.3.1	Implementing data . . . . .	74
2.3.2	Implementing functionality . . . . .	75
2.3.3	Documenting specification . . . . .	81
<b>2.4</b>	<b>Simple arithmetic expressions</b> . . . . .	82
<b>2.5</b>	<b>The class <i>TrafficSignal</i></b> . . . . .	85
2.5.1	Named constants . . . . .	85
2.5.2	Implementing the class <i>TrafficSignal</i> . . . . .	88
<b>2.6</b>	<b>The class <i>PlayingCard</i></b> . . . . .	92
2.6.1	Constructor with parameters . . . . .	94
<b>2.7</b>	<b>Java in detail: arithmetic expressions</b> . . . . .	99
<b>2.8</b>	<b>Java in detail: basic organizational structure</b> . . . . .	104
<b>2.9</b>	<b>Java in detail: referring to classes in a different package, <i>import</i> statements, and the package <i>java.lang</i></b> . . . . .	105
<b>2.10</b>	<b>Java in detail: arithmetic expressions, the rest of the story</b> . . . . .	107
<b>2.11</b>	<b>Summary</b> . . . . .	112
<b>chapter 3</b>	<b>Designing interacting classes</b>	<b>121</b>
<b>3.1</b>	<b>Designing with objects</b> . . . . .	122
<b>3.2</b>	<b>A nim game example</b> . . . . .	123
3.2.1	Implementing the class <i>Pile</i> . . . . .	128
3.2.2	Implementing the class <i>Player</i> . . . . .	130
<b>3.3</b>	<b>A maze game example</b> . . . . .	136
3.3.1	Implementing the class <i>Explorer</i> . . . . .	142
<b>3.4</b>	<b>Local variables: another kind of method variable</b> . . . . .	144
<b>3.5</b>	<b>Putting together a complete system</b> . . . . .	148
3.5.1	Getting it started . . . . .	151
3.5.2	The method <i>toString</i> . . . . .	155
<b>3.6</b>	<b>Testing an implementation</b> . . . . .	155
3.6.1	A class to test . . . . .	156
3.6.2	The <i>TrafficSignalTest</i> class . . . . .	157
3.6.3	The initiating class . . . . .	158
3.6.4	Writing the tests . . . . .	159
<b>3.7</b>	<b>Java in detail: <i>static</i> and <i>final</i> features</b> . . . . .	165

3.7.1	<i>Static</i> methods and the class <i>Math</i> . . . . .	165
3.7.2	<i>Final</i> features . . . . .	167
3.7.3	Importing static features . . . . .	169
<b>3.8</b>	<b>Summary</b> . . . . .	<b>169</b>
<b>chapter 4</b>	<b>Conditions</b>	<b>175</b>
<b>4.1</b>	<b>Conditional statements</b> . . . . .	<b>176</b>
4.1.1	The <i>if-then</i> statement . . . . .	179
4.1.2	The <i>if-then-else</i> statement . . . . .	180
4.1.3	Compound statements . . . . .	186
<b>4.2</b>	<b>Boolean expressions</b> . . . . .	<b>189</b>
<b>4.3</b>	<b>Handling multiple cases</b> . . . . .	<b>190</b>
4.3.1	Dangling <i>else</i> . . . . .	197
<b>4.4</b>	<b>Example: the class <i>Date</i></b> . . . . .	<b>198</b>
<b>4.5</b>	<b>Example: a combination lock</b> . . . . .	<b>202</b>
<b>4.6</b>	<b>Java in detail: Boolean expressions</b> . . . . .	<b>213</b>
4.6.1	Reference equality and object equality . . . . .	214
4.6.2	Boolean operators . . . . .	215
<b>4.7</b>	<b>Java in detail: logical operators and conditional expressions</b> . . . . .	<b>218</b>
<b>4.8</b>	<b>Java in detail: the <i>switch</i> statement</b> . . . . .	<b>219</b>
<b>4.9</b>	<b>Summary</b> . . . . .	<b>223</b>
<b>chapter 5</b>	<b>Programming by contract</b>	<b>233</b>
<b>5.1</b>	<b>Programming by contract</b> . . . . .	<b>234</b>
5.1.1	Verifying preconditions: the <i>assert</i> statement . . . . .	236
<b>5.2</b>	<b>Further examples</b> . . . . .	<b>240</b>
<b>5.3</b>	<b>Preconditions and postconditions: a summary of use</b> . . . . .	<b>245</b>
<b>5.4</b>	<b>Enumeration classes</b> . . . . .	<b>248</b>
<b>5.5</b>	<b>Summary</b> . . . . .	<b>251</b>
<b>chapter 6</b>	<b>Testing</b>	<b>259</b>
<b>6.1</b>	<b>Functional testing and unit testing</b> . . . . .	<b>260</b>
<b>6.2</b>	<b>Developing a test plan</b> . . . . .	<b>262</b>
<b>6.3</b>	<b>The JUnit testing framework</b> . . . . .	<b>264</b>
<b>6.4</b>	<b>An example</b> . . . . .	<b>267</b>
<b>6.5</b>	<b>Do we need to test everything?</b> . . . . .	<b>276</b>
<b>6.6</b>	<b>Summary</b> . . . . .	<b>278</b>

<b>chapter 7</b>	<b>Building a text-based user interface</b>	<b>283</b>
<b>7.1</b>	<b>Relating the user interface and the model</b>	284
<b>7.2</b>	<b>Stream-based i/o</b>	286
7.2.1	Writing standard output and reading standard input	286
<b>7.3</b>	<b>An example: building an interface for <i>Rectangle</i></b>	292
7.3.1	Repeating actions: the <i>while</i> statement	294
7.3.2	Completing the <i>createRectangle</i> method	296
7.3.3	Finishing the user interface	298
7.3.4	Loop structure	304
<b>7.4</b>	<b>A second example: using composition</b>	305
7.4.1	Constructing a class by composition	306
7.4.2	Implementing the user interface	309
<b>7.5</b>	<b>Java in detail: the <i>do</i> statement</b>	312
<b>7.6</b>	<b>Summary</b>	314
<b>chapter 8</b>	<b>The software life cycle: building a complete system</b>	<b>323</b>
<b>8.1</b>	<b>Software life cycle</b>	324
<b>8.2</b>	<b>Design of a system</b>	325
8.2.1	Functional specification	326
8.2.2	Preliminary design	327
8.2.3	Relations between objects	332
8.2.4	Class specification	334
<b>8.3</b>	<b>Implementing the system</b>	339
8.3.1	The top-level	340
8.3.2	The class <i>Pile</i>	340
8.3.3	The class <i>Player</i>	340
8.3.4	The class <i>Game</i>	345
8.3.5	The class <i>NimTUI</i>	346
<b>8.4</b>	<b>Summary</b>	352
<b>chapter 9</b>	<b>Specifying clients: interfaces</b>	<b>359</b>
<b>9.1</b>	<b>Modeling alternative implementations</b>	360
<b>9.2</b>	<b>Interfaces</b>	362
9.2.1	Interface definition	362
9.2.2	Interface implementation	364
9.2.3	Subtyping	366
9.2.4	Putting it together	372
<b>9.3</b>	<b>Clients and interfaces</b>	374
<b>9.4</b>	<b>Multiple inheritance and interface extension</b>	377
<b>9.5</b>	<b>Modifying the system: user vs. computer</b>	379

9.5.1	Player classes . . . . .	379
9.5.2	The user interface . . . . .	381
9.5.3	User interface—model interaction . . . . .	382
<b>9.6</b>	<b>Reclaiming lost ground: the strategy pattern . . . . .</b>	<b>388</b>
<b>9.7</b>	<b>Java in detail: casting and <i>instanceof</i> . . . . .</b>	<b>390</b>
<b>9.8</b>	<b>Summary . . . . .</b>	<b>396</b>
<b>chapter 10</b>	<b>Class extension and inheritance . . . . .</b>	<b>409</b>
<b>10.1</b>	<b>Abstraction and classes . . . . .</b>	<b>410</b>
10.1.1	Class inheritance is single inheritance . . . . .	411
<b>10.2</b>	<b>Extension and inheritance . . . . .</b>	<b>412</b>
<b>10.3</b>	<b>Constructors and subclasses . . . . .</b>	<b>417</b>
<b>10.4</b>	<b>Overloading, overriding, and polymorphism . . . . .</b>	<b>421</b>
10.4.1	Method overloading . . . . .	421
10.4.2	Method overriding . . . . .	426
10.4.3	Overriding and contracts . . . . .	432
<b>10.5</b>	<b>Java in detail: feature accessibility . . . . .</b>	<b>434</b>
10.5.1	Protected features . . . . .	437
10.5.2	Package private features . . . . .	440
10.5.3	Inner classes . . . . .	441
<b>10.6</b>	<b>Java in detail: scoping rules . . . . .</b>	<b>444</b>
<b>10.7</b>	<b>Summary . . . . .</b>	<b>448</b>
<b>chapter 11</b>	<b>Modeling with abstraction . . . . .</b>	<b>461</b>
<b>11.1</b>	<b>Abstract classes . . . . .</b>	<b>462</b>
11.1.1	Interfaces, abstract classes, and concrete classes . . . . .	463
<b>11.2</b>	<b>Specifying a class for extension . . . . .</b>	<b>466</b>
11.2.1	Planning for extension . . . . .	469
<b>11.3</b>	<b>Composition revisited . . . . .</b>	<b>475</b>
11.3.1	Extension and composition . . . . .	476
11.3.2	Extension, composition, and reuse . . . . .	479
11.3.3	Extension, composition, and modifying functionality . . . . .	481
<b>11.4</b>	<b>Extension and state . . . . .</b>	<b>483</b>
11.4.1	State as an object . . . . .	484
<b>11.5</b>	<b>Summary . . . . .</b>	<b>486</b>
<b>chapter 12</b>	<b>Lists . . . . .</b>	<b>493</b>
<b>12.1</b>	<b>Containers . . . . .</b>	<b>494</b>
<b>12.2</b>	<b>Lists . . . . .</b>	<b>495</b>

12.2.1	Structuring lists . . . . .	496
12.2.2	Using generics to capture “list-ness” . . . . .	501
<b>12.3</b>	<b>List specification . . . . .</b>	<b>504</b>
<b>12.4</b>	<b>Iteration . . . . .</b>	<b>512</b>
12.4.1	<i>while</i> loops and lists . . . . .	513
<b>12.5</b>	<b>Examples . . . . .</b>	<b>515</b>
12.5.1	Summing items on a list . . . . .	515
12.5.2	Summing selected elements of a list . . . . .	518
12.5.3	Finding the minimum . . . . .	518
12.5.4	Determining if an object is on a <i>List</i> : searching the <i>List</i> . . . . .	521
12.5.5	Removing duplicates . . . . .	523
<b>12.6</b>	<b>Loop structure: a summary . . . . .</b>	<b>527</b>
<b>12.7</b>	<b>Java in detail: the <i>for</i> statement . . . . .</b>	<b>528</b>
<b>12.8</b>	<b>What does “equal” mean? . . . . .</b>	<b>531</b>
12.8.1	Overriding equals . . . . .	532
12.8.2	Problems when overriding equals . . . . .	533
<b>12.9</b>	<b>Implementing the interface <i>List</i> . . . . .</b>	<b>540</b>
12.9.1	The class <i>AbstractList</i> . . . . .	540
12.9.2	The class <i>DefaultList</i> . . . . .	541
<b>12.10</b>	<b>Generic type checking is done at compile time . . . . .</b>	<b>544</b>
<b>12.11</b>	<b>Summary . . . . .</b>	<b>545</b>
<b>chapter 13</b>	<b>Arrays . . . . .</b>	<b>555</b>
<b>13.1</b>	<b>Arrays . . . . .</b>	<b>556</b>
13.1.1	Creating arrays . . . . .	558
13.1.2	Accessing array components . . . . .	560
<b>13.2</b>	<b>Examples . . . . .</b>	<b>560</b>
<b>13.3</b>	<b>Constant arrays . . . . .</b>	<b>568</b>
<b>13.4</b>	<b>Java in detail: static initializers . . . . .</b>	<b>570</b>
<b>13.5</b>	<b>Arrays with array components . . . . .</b>	<b>572</b>
13.5.1	Creating multidimensional arrays . . . . .	573
13.5.2	Accessing multidimensional array components . . . . .	575
13.5.3	An example: tic-tac-toe . . . . .	577
<b>13.6</b>	<b>Types and arrays . . . . .</b>	<b>580</b>
13.6.1	Component types . . . . .	580
13.6.2	Subtyping . . . . .	581
<b>13.7</b>	<b>An example: modeling lists with arrays . . . . .</b>	<b>583</b>
<b>13.8</b>	<b>Java in detail: command line arguments . . . . .</b>	<b>587</b>
<b>13.9</b>	<b>Java in detail: variable arity parameters . . . . .</b>	<b>588</b>

13.10 Summary .....	589
<b>chapter 14 Sorting and searching</b>	<b>597</b>
14.1 Ordering lists .....	598
14.2 Two simple sorts .....	600
14.2.1 Selection sort .....	600
14.2.2 Analysis of selection sort .....	605
14.2.3 Bubble sort .....	606
14.2.4 Generalizing the sort methods .....	611
14.2.5 The interfaces <i>java.util.Comparator</i> and <i>java.lang.Comparable</i> ..	617
14.3 Ordered lists .....	621
14.4 Binary search .....	623
14.4.1 Completing the search .....	628
14.4.2 Sequential search and binary search .....	630
14.5 Verifying correctness: using a loop invariant .....	631
14.6 Summary .....	635
<b>chapter 15 Failures and exceptions</b>	<b>643</b>
15.1 Failures .....	644
15.2 The Java exception mechanism .....	644
15.2.1 Exceptions as objects .....	645
15.2.2 Catching exceptions .....	646
15.2.3 Propagated exceptions .....	649
15.2.4 Checked and unchecked exceptions .....	649
15.3 Dealing with failure: using exceptions .....	651
15.3.1 Dealing with exceptions .....	653
15.3.2 Application defined exceptions .....	656
15.3.3 Dealing with logical errors .....	657
15.4 Exceptions and contracts .....	658
15.5 The <i>CloneNotSupportedException</i> and the interface <i>Cloneable</i> ..	661
15.6 Summary .....	665
<b>chapter 16 Stream i/o</b>	<b>671</b>
16.1 Data Streams .....	672
16.2 The <i>java.io</i> library .....	672
16.3 Input streams .....	673
16.3.1 Input byte streams .....	673
16.3.2 Input character streams .....	679
16.3.3 Input examples .....	682

<b>16.4</b>	<b>Output streams</b>	690
16.4.1	Output byte streams	691
16.4.2	Output character streams	693
<b>16.5</b>	<b>The class <i>File</i></b>	697
<b>16.6</b>	<b>Summary</b>	698
<b>chapter 17</b>	<b>Building a graphical user interface</b>	<b>705</b>
<b>17.1</b>	<b>Event-driven interfaces</b>	706
<b>17.2</b>	<b>An introduction to Swing</b>	707
17.2.1	Components	707
17.2.2	Containers	711
<b>17.3</b>	<b>Creating a display</b>	715
17.3.1	The top-level frame	715
17.3.2	The event dispatching thread	716
17.3.3	Adding components: layout	718
<b>17.4</b>	<b>Events: programming the user interface</b>	722
17.4.1	An example	724
<b>17.5</b>	<b>A more complex example</b>	735
<b>17.6</b>	<b>Menus, dialogs, fonts, and graphics</b>	745
17.6.1	Menus and menu bars	745
17.6.2	Basic dialogs	746
17.6.3	Fonts	752
17.6.4	Graphics	753
<b>17.7</b>	<b>Some class features</b>	755
17.7.1	<i>Component</i>	755
17.7.2	<i>Container</i>	756
17.7.3	<i>Window</i>	756
17.7.4	<i>Frame</i>	757
17.7.5	<i>JComponent</i>	757
17.7.6	<i>JFrame</i>	758
<b>17.8</b>	<b>Summary</b>	758
<b>chapter 18</b>	<b>Integrating user interface and model: the Model-View-Controller pattern</b>	<b>765</b>
<b>18.1</b>	<b>Model-View-Controller</b>	766
<b>18.2</b>	<b>Implementing MVC in Java</b>	767
18.2.1	The model	767
18.2.2	The class <i>Observable</i> and interface <i>Observer</i>	769
18.2.3	An <i>Observer</i>	771
18.2.4	Observer, Observable, and subtyping	773
18.2.5	A simple view and controller	773

18.2.6	A graphic view . . . . .	782
18.2.7	A logger as a view . . . . .	784
<b>18.3</b>	<b>Adding a graphical interface to the nim game</b> . . . . .	<b>788</b>
<b>18.4</b>	<b>The MVC pattern and Swing components</b> . . . . .	<b>793</b>
<b>18.5</b>	<b>Summary</b> . . . . .	<b>796</b>
<b>chapter 19</b>	<b>Recursion</b>	<b>801</b>
<b>19.1</b>	<b>Recursion and iteration</b> . . . . .	<b>802</b>
19.1.1	Iteration . . . . .	802
19.1.2	Recursion . . . . .	802
19.1.3	Some simple examples. . . . .	803
<b>19.2</b>	<b>Example: the tower puzzle</b> . . . . .	<b>820</b>
<b>19.3</b>	<b>Quicksort</b> . . . . .	<b>824</b>
<b>19.4</b>	<b>An inefficient algorithm</b> . . . . .	<b>831</b>
<b>19.5</b>	<b>Indirect recursion</b> . . . . .	<b>832</b>
<b>19.6</b>	<b>Backtracking</b> . . . . .	<b>833</b>
<b>19.7</b>	<b>Object recursion.</b> . . . . .	<b>837</b>
<b>19.8</b>	<b>Summary</b> . . . . .	<b>848</b>
<b>chapter 20</b>	<b>Generic structures</b>	<b>855</b>
<b>20.1</b>	<b>Multiple and bounded parameters</b> . . . . .	<b>856</b>
<b>20.2</b>	<b>Wildcard types</b> . . . . .	<b>860</b>
20.2.1	<i>Generics and subtyping, revisited</i> . . . . .	860
20.2.2	Wildcards . . . . .	862
20.2.3	Using wildcards . . . . .	868
20.2.4	Wildcards and generic methods. . . . .	871
<b>20.3</b>	<b>Erasure</b> . . . . .	<b>876</b>
20.3.1	Restrictions due to erasure . . . . .	879
<b>20.4</b>	<b>Summary</b> . . . . .	<b>882</b>
<b>chapter 21</b>	<b>Implementing lists: linked implementations</b>	<b>889</b>
<b>21.1</b>	<b>A linked List implementation</b> . . . . .	<b>889</b>
21.1.1	Implementing <i>LinkedList</i> methods. . . . .	892
<b>21.2</b>	<b>Linked list variations</b> . . . . .	<b>897</b>
<b>21.3</b>	<b>Doubly linked lists</b> . . . . .	<b>900</b>
<b>21.4</b>	<b>Limitations of linked structures</b> . . . . .	<b>902</b>
<b>21.5</b>	<b>Dynamic storage allocation</b> . . . . .	<b>904</b>
<b>21.6</b>	<b>Summary</b> . . . . .	<b>905</b>

<b>chapter 22</b>	<b>Iterators</b>	<b>913</b>
<b>22.1 Iterators</b>	.....	913
22.1.1 Iterator classes	.....	916
22.1.2 Creating an iterator	.....	921
<b>22.2 <i>List&lt;Element&gt;</i> methods with iterators as arguments</b>	.....	924
22.2.1 Improving <i>LinkedList&lt;Element&gt;.LocalIterator</i>	.....	926
22.2.2 <i>Iterator</i> extensions	.....	927
22.2.3 Iterators and list modification	.....	928
22.2.4 Internal iterators: <i>forEachDo</i>	.....	930
<b>22.3 Comparing implementations</b>	.....	932
<b>22.4 The <i>java.util Collection&lt;Element&gt;</i> hierarchy</b>	.....	932
22.4.1 Implementing <i>for each</i>	.....	935
<b>22.5 Summary</b>	.....	936
<b>supplement a</b>	<b>Systems and software</b>	<b>941</b>
<b>a.1 A model of a computer system</b>	.....	941
<b>a.2 Software tools</b>	.....	944
<b>supplement b</b>	<b>Programming errors</b>	<b>949</b>
<b>b.1 Errors in the programming process</b>	.....	949
<b>supplement c</b>	<b>Applets</b>	<b>951</b>
<b>c.1 Applets</b>	.....	951
c.1.1 The class <i>JApplet</i>	.....	952
c.1.2 Applets as applications	.....	955
c.1.3 An example: a simple clock	.....	956
c.1.4 An example: an animated box	.....	958
<b>supplement d</b>	<b>Enumeration types: the rest of the story</b>	<b>963</b>
<b>d.1 Enumeration types</b>	.....	963
<b>appendix i</b>	<b>Compiling, executing, and documenting</b>	<b>969</b>
<b>i.1 Compiling and running an application</b>	.....	969
i.1.1 Compilation units	.....	969
i.1.2 Package name and directory hierarchy	.....	970
i.1.3 The environment variable <i>CLASSPATH</i>	.....	970
i.1.4 Compiling and running	.....	971
<b>i.2 Generating documentation</b>	.....	972

<b>appendix ii</b>	<b>DrJava</b>	<b>975</b>
<b>appendix iii</b>	<b>Controls and basic Latin: the first 128 Unicode characters</b>	<b>977</b>
<b>glossary</b>		<b>979</b>
<b>references</b>		<b>997</b>
<b>index</b>		<b>999</b>
