

CONTENTS

One	Introduction	1
	I. Historical Background, 1	
	II. Classification of Detectors, 3	
	III. Definition of Terms, 7	
	A. Noise, 7	
	B. Sensitivity, 7	
	C. Detectability or Lower Limit of Detection, 8	
	D. Specificity, 9	
	E. Linearity, 9	
	F. Response Time, 10	
	References, 10	
Two	Thermal Conductivity Detectors	14
	I. Introduction, 14	
	A. Historical Background, 14	
	B. Definition, 15	
	II. Principles, 15	
	A. Basic Instrumentation, 15	
	B. Theory: Factors Affecting Output Signal, 16	
	III. Developments Leading to Current Designs, 29	

- IV. Performance, 34
 - A. Factors Affecting Response, 34
 - B. Sensitivity and Response, 37
 - C. Linear Dynamic Range, 38
 - D. Noise and Drift, 38

References, 39

Three Flame Ionization Detection 42

- I. Introduction, 42
- II. Theory, Mechanisms, and Evolution of Detector Designs, 42
- III. Flame Mechanisms, 51
- IV. Response Characteristics, 53
 - A. Influence of Geometry, 53
 - B. Group and Molecular Influence, 61
- V. Performance, 70
 - A. Sensitivity and Noise, 70
 - B. Linear Range, 72
 - C. Maintenance, 72

References, 73

Four Electron Capture Detection 76

- I. Introduction, 76
- II. Background, Development and Current Designs, 77
- III. Electron Capture Mechanisms, 92
 - A. Introduction, 92
 - B. Kinetics, 92
 - C. Temperature Dependence, 95
- IV. Response Characteristics, 96
 - A. Influence of Operating Variables, 96
 - B. Group and Molecular Response Characteristics, 104

	V. Performance, 106	
	A. Sensitivity and Noise, 106	
	B. Linear Range, 109	
	References, 112	
Five	The Thermionic Detector	114
	I. Introduction, 114	
	II. Background, Principles, and Development, 115	
	A. Basis, 115	
	B. Background and Development, 115	
	III. Principles and Mechanisms of Detection, 122	
	A. Halogens, 122	
	B. Phosphorus, 125	
	C. Summary, 128	
	IV. Response Characteristics, 129	
	A. Effect of Gas Flow Rates, 129	
	B. Effect of Alkali Metal Salt Used, 130	
	C. Effect of Applied Potential and Polarity of the Electrodes, 132	
	D. Effect of Electrode Position, 133	
	V. Performance, 133	
	A. Sensitivity, 133	
	B. Specificity, 135	
	C. Linear Dynamic Range and Noise Level, 135	
	References, 140	
Six	The Ultrasonic Detector	144
	I. Introduction, 144	

- II. Background, Theory, and Development Leading to Current Designs, 144
 - A. Theory, 145
 - B. Development and Current Design, 148
- III. Principles, 152
- IV. Response Characteristics and Factors Affecting Response, 154
 - A. Temperature, 154
 - B. Pressure, 155
 - C. Flow Rate, 156
 - D. Transducer Separation, 157
 - E. Cell Volume, 157
 - F. Predictability of Response, 158
 - G. Carrier Gases, 159
- V. Performance, 161
 - A. Sensitivity, 161
 - B. Noise, 162
 - C. Linearity, 162
- References, 164

Seven	The Helium Ionization Detector	165
	I. Introduction, 165	
	II. Background, Development, and Principles, 165 <ul style="list-style-type: none"> A. Theory, 165 B. Background and Development, 166 	
	III. Response Characteristics and Factors Affecting Response, 168	
	IV. Performance, 173 <ul style="list-style-type: none"> A. Sensitivity. Linearity, and Noise, 173 B. Precision, 175 	
	References, 176	

Eight	<ul style="list-style-type: none"> Flame Photometric Detection I. Introduction, 177 II. Theory, Background, and Current Designs, 177 III. Response Characteristics and Mechanisms, 181 IV. Performance, 187 <ul style="list-style-type: none"> A. Sensitivity and Specificity, 187 B. Noise, 192 C. Linear Range, 192 D. Additional Information, 192 References, 192 	177
Nine	<ul style="list-style-type: none"> Electrochemical Detectors I. Introduction, 194 II. Background and Theory of the Various Types, 194 <ul style="list-style-type: none"> A. The Microcoulometric Detector, 195 B. The Coulson Electrolytic Conductivity Detector, 199 C. The Reaction Coulometer, 203 III. Development and Principles of Current Designs and Response Characteristics, 211 <ul style="list-style-type: none"> A. The Microcoulometric Detector, 211 B. The Coulson Electrolytic Conductivity Detector, 219 C. The Reaction Coulometer, 223 IV. Performance, 223 <ul style="list-style-type: none"> A. The Microcoulometric Detector, 223 B. The Coulson Electrolytic Conductivity Detector, 225 C. The Reaction Coulometer, 226 References, 229 	194
