FOREWORD	vi
Acknowledgements	vi
1. Purpose and Development of Clustering Techniques	1
1.1 Classification, Cluster Analysis and Identification	1
1.2 The Development of Cluster Analysis Techniques	2
1.3 Objectives of Cluster Analysis Techniques	3
1.4 Summary	5
2. A Review of Clustering Techniques	7
2.1 Hierarchical Clustering Techniques	8
2.2 Partitioning Techniques	24
2.3 Density Search Techniques	30
2.4 Clumping Techniques	35
2.5 Other Clustering Techniques	37
3. A Discussion of the Problems of Cluster Analysis	43
3.1 The Definition of a Cluster	43
3.2 The Choice of Variables	48
3.3 The Measurement of Similarity and Distance	49
3.4 Deciding the Number of Clusters Present	59
3.5 Problems of Hierarchical Clustering Techniques	61
3.6 Problems of Optimization Techniques	62
3.7 Problems of Density-Seeking Methods	64
3.8 Problems of Other Methods	65
3.9 Summary	66
4. An Empirical Investigation of Some Methods of Cluster Analysis	69
4.1 Construction of the Data	69
4.2 Optimization Techniques	73
4.3 Hierarchical Techniques	78
4.4 Density or Mode-Seeking Techniques	85
4.5 Summary	87
5. Using Cluster Analysis Techniques in Practice: Some Guide Lines	91
5.1 Suggestions on the Use of Particular Clustering Techniques	91
5.2 Procedures for Use in Association with Clustering Techniques	94
5.3 Summary	96
Appendices	98
Appendix A: Some technical terms defined	98
Appendix B: Availability of programs	99
Appendix C: Assignment Techniques	101
Appendix D: Concrete example	107
Appendix E: Bibliography	110
