

Inhaltsverzeichnis

Vorwort	17
Elementarprozesse	19
<i>Bunse S, Haghikia A, Zoidl G, Dermietzel R</i> : Identification of a potential regulator of the gap junction protein pannexin1	21
<i>Turchinovich A, Zoidl G, Dermietzel R</i> : siRNA-mediated knockdown of the gap junction protein connexin43 in astrocytes interferes with proliferation and apoptosis in vitro.	23
<i>Meuth SG, Kanyshkova T, Landgraf P, Pape H-C, Budde T</i> : The membrane lipid environment of TASK channels determines the activity mode of thalamocortical relay neurons	24
<i>Bauer D, Hamacher K, Bröer S, Pauleit D, Palm C, Coenen HH, Langen KJ</i> : Preferred stereoselective brain uptake of D-serine – a modulator of glutamatergic neurotransmission	26
<i>Fleischer W, Siebler M</i> : Oszillation und Synchronisation striataler Neurone	28
<i>Pippow A, Husch A, Kloppenburg P</i> : <i>In vivo</i> analysis of intracellular calcium dynamics in olfactory interneurons	30
<i>Mock EP, Göpelt K, Büsselberg D</i> : Calcium channel modulators influence breathing	32
<i>Florea A-M, Spletstoeser F, Tomaszewski A, Büsselberg D</i> : Anti-cancer drugs (As ₂ O ₃ and cis-platin) interfere with calcium signals in tumour cells.	34
<i>Heyers D, Manns M, Luksch H, Güntürkün O, Mouritsen H</i> : Do migratory birds „see“ the magnetic field?	37

Entwicklung/Stammzellen	39
<i>Czopka T, von Holst A, Faissner A: Impact of extracellular matrix molecules on oligodendrocyte development</i>	41
<i>Kleffner I, Gess B, Halfter H, Ringelstein EB, Young P: In vitro myelination of mouse dorsal root ganglia neurons by highly purified adult mouse Schwann cells</i>	43
<i>Egbers U, von Holst A, Faissner A: Analysis of the regulation and function of tenascin C isoforms</i>	45
<i>Diykov D, Barmashenko G, Krause M, Hoffmann K-P: Changes in chloride reversal potential during early postnatal development in albino and pigmented rat visual cortex</i>	47
<i>Glaser T, Klein K, Franceschini IA, Rougon G, Smorodchenko A, Zipp F, Dubois-Dalq M, Brüstle O: PSA-NCAM overexpression modulates migration patterns of embryonic stem (ES) cell-derived glial precursors</i>	49
<i>Koch P: A homogenous and stably proliferating population of neural precursors derived from human embryonic stem cells</i>	51
<i>Lehmann S, Moritz S, von Holst A, Faissner A: Application of the induction gene trap technology for genes depending on chondroitin sulfate proteoglycan-signalling in neural stem cells</i>	52
<i>Wasielewski B, Roth-Härer A, Dermietzel R, Dinse HR, Jensen A, Meier C: The potential role of human umbilical cord blood cells in the therapy of perinatal brain damage</i>	54
Neuroimmunologie	57
<i>Nessler S, Boretius S, Stadelmann C, Bittner A, Merkler D, Hartung H-P, Michaelis T, Brück W, Frahm J, Sommer N, Hemmer B: MRI correlates of lesion pathology in T-cell clone mediated mouse experimental autoimmune encephalomyelitis</i>	59
<i>Cepok S, Rosche B, Grummel V, Zhou D, Srivastava R, Hartung H-P, Hemmer B: IgG-secreting plasma blasts are the main B cell effector subset during the course of multiple sclerosis</i>	61

<i>Kumar M, Putzki N, Vago S, Kreuzfelder E, Limmroth V: Suppressing activity of CD4+CD25+ regulatory T cells is lost in myelin basic protein induced proliferation in multiple sclerosis patients</i>	63
<i>Putzki N, Limmroth V, Katsarava Z, Savidou I, Liedtke W, Hellwig K, Exton M, Diener H, Siffert W: The G protein $\beta 3$ subunit 825T allele influences the disease course in patients with multiple sclerosis</i>	65
<i>Zhou D, Srivastava R, Nessler S, Grummel V, Sommer N, Stadelmann C, Hartung H-P, Hemmer B: Identification of a pathogenic antibody response to native Myelin Oligodendrocyte Glycoprotein in multiple sclerosis</i>	67
<i>Dehmel T, Janke A, Goebel HH, Wiendl H, Kieseier BC: Selektive Expression von Metalloproteinasen-Disintegrinen (ADAMs) bei immunvermittelten Myopathien</i>	68
<i>Soeder BM, Urbach H, Becker A, Schramm J, Elger CE, Bien CG: Adult-onset medio-temporal lobe epilepsies are mostly immune-mediated in origin</i>	70
Motorik/Sensorik	73
<i>Stude P, Nowak K, Schreiber C, Danielzyk D, Müller B, Maschke M: Encoding of amplitudes of passive movements in proprioceptive evoked potentials</i>	75
<i>Dieckhöfer A, Waberski TD, Buchner H, Gobbelé R: Transcranial direct current stimulation of the somatosensory cortex – differential effects on low and high frequency median nerve SEPs</i>	77
<i>Trautner P, Diel T, Fell J, Korzyukov OA, Kurthen M, Schaller C, Boutros NN, Rosburg T: Sensory gating of auditory evoked and induced gamma band activity in intracranial recordings</i>	79
<i>Hajjar K, Gerwig M, Haerter K, Dimitrova A, Frings M, Kolb FP, Timmann D: Timing of delay but not of trace conditioned eyeblink responses is impaired in patients with cerebellar lesions</i>	81

<i>Dimitrova A, Schoch B, Konczak J, Timmann D: Lesions of the cerebellar nuclei but not the cerebellar cortex impede motor recovery in children and adult patients</i>	83
<i>Bellebaum C, Hoffmann KP, Koch B, Schwarz M, Daum I: Altered processing of corollary discharge in thalamic lesion patients</i>	85
<i>Graf K, Putzki N, Diener H-C, Maschke M: Habituation of the auditory startle reaction in focal dystonia and Parkinson's disease</i>	87
<i>Schmitz G, Bock O, Mielke R, Bruckmann K, Bodden M: Dissoziierte Störung der sensomotorischen Adaptation bei Patienten mit leichtgradiger Alzheimer-Krankheit</i>	89
<i>Werner S, Bock O: Lässt sich die sensomotorische Adaptation durch variables Üben verbessern?</i>	91
Schmerz/Schlafentzug	93
<i>Ploner M, Gross J, Timmermann L, Pollok B, Schnitzler A: Pain suppresses spontaneous brain rhythms</i>	95
<i>Müller D, Katsarava Z, Koeppen S, Kavuk I, Sack F, Limmroth V, Kaube H: A novel method of pain related potentials elicited by electrical stimulation of skin for early detection of diabetic small-fiber neuropathy</i>	97
<i>Neuendorf A, Hagenacker T, Splettstoesser F, Göpelt K, Büsselberg D: Differential modulation of voltage gated channels by capsaicin</i>	99
<i>Wendt W, Schmitz B, Stichel CC, Lübbert H: Cathepsins S and X – key players in the inflammatory events in pain and neurodegeneration?</i>	101
<i>Schreiber D, Giuffrida A, Koethe D, Gerth CW, Jülicher A, Mauss C, Klosterkötter J, Piomelli D, Leweke FM: Elevated cerebrospinal oleoylethanolamide levels in healthy sleep deprived volunteers</i>	103
<i>Elmenhorst D, Meyer PT, Matusch A, Winz OH, Bauer A: Effect of sleep deprivation on cerebral A₁ adenosine receptor (A₁AR) binding measured with PET</i>	105

<i>Heber IA, Valvoda JT, Kublen T, Sturm W, Fimm B</i> : Sleep deprivation modulates the reorientation of visuo-spatial attention in three-dimensional virtual space	107
Kognition	109
<i>Lindenberg R, Fangerau H, Seitz RJ</i> : Mind the gap! Contemporary concepts of „Broca’s area“	111
<i>Heim S, Friederici AD</i> : Funktionelle Unterteilung des Broca’schen Sprach-Areals	114
<i>Jörgens S, Kleiser R, Indefrey P, Seitz RJ</i> : Sprachlateralisierung und Händigkeit: eine Untersuchung mit fMRI	116
<i>Weber B, Hoppe C, Faber J, Weis S, Axmacher N, Fließbach K, Mormann F, Fernández G</i> : Association between scalp hair-whorl direction and hemispheric language dominance	118
<i>Morosan P, Amunts K, Schleicher A, Palomero-Gallagher N, Zilles K</i> : Searching for the molecular code of hearing and language comprehension	120
<i>Ludowig E, Trautner P, Kurthen M, Schaller C, Bien C, Rosburg T</i> : Intracranial ERP-components during a word recognition paradigm in patients with unilateral hippocampal sclerosis	122
<i>Sparing R, Gröning I, Staedtgen M, Meister IG</i> : Von der Hand zur Sprache – Untersuchungen mit TMS zur kortikalen Vernetzung von Handmotorik, Gestik und Sprache	124
<i>Berghoff C, Weiss S, Müller HM</i> : The comprehension of figurative meaning: Neurolinguistic results	126
<i>Bülte D, Prange M, Meister IG</i> : Die funktionelle Relevanz des inferioren frontalen Gyrus für das semantische Priming: Eine kombinierte fMRT und rTMS-Studie	128
<i>Lemon N, Manahan-Vaughan D</i> : The role of D1/D5 receptors on hippocampal SC-CA1 synaptic plasticity and spatial novelty acquisition	130

<i>Axmacher N, Mormann F, Fernández G, Fell J</i> : Mediotemporal lobe contributes to working memory	131
<i>Kis B, Heinze S, Lenz M, Sartory G, de Greiff A, Forsting M, Gastpar M, Jüptner M, Müller BW</i> : Funktionelle Bildgebung serieller Positionseffekte in einer verbalen Gedächtnisaufgabe	133
<i>Fliessbach K, Weis S, Klaver P, Elger CE, Weber B</i> : Der Konkretheitseffekt im Rekognitionsgedächtnis – eine ereigniskorrelierte fMRI Studie ..	135
<i>Winter B, Breitenstein C, Mooren F, Völker K, Fobker M, Lechtermann A, Krüger K, Fromme A, Korsukewitz C, Knecht S</i> : Schneller macht heller: Zusammenhang zwischen kurzzeitiger körperlicher Aktivität und Lernleistung	137
<i>Cohen M, Elger CE, Ranganath C</i> : Reinforcement learning signals predict future decisions	139
<i>Narayanan RT, Seidenbecher T, Stork O, Pape H-C</i> : Patterns of theta synchronization in amygdalo-hippocampal-prefrontal cortical circuits during consolidation and extinction of fear memory	141
<i>Krämer J, Schwindt W, Plassmann H, Kenning P, Ringelstein EB, Deppe M</i> : Functional MRI reveals the specific influence of emotions to (pre-) judgments	143
<i>Hurlemann R, Hawellek B, Matusch A, Kolsch H, Wollersen H, Madea B, Vogeley K, Maier W, Dolan RJ</i> : Noradrenergic modulation of emotion-induced forgetting and remembering	145
<i>Vohn R, Fimm B, Weber J, Schnitker R, Thron A, Spijkers W, Sturm W</i> : Aging effects on neural activity during divided attention tasks: an fMRI study	147
<i>Nebel K, Stude P, Seyfarth J, Gizewski ER, Limmroth V</i> : Aktivierung von aufmerksamkeitsassoziierten Strukturen bei MS-Patienten in Abhängigkeit von Aufmerksamkeitsdefiziten: eine fMRT-Studie ...	149
<i>Frank B, Richter S, Schoch B, Groetschel H, Hein-Kropp C, Kaiser O, Maschke M, Dimitrova A, Gizewski ER, Ziegler W, Karnath HO, Timmann D</i> : Language and visuospatial functions in children and adolescents with acute and chronic cerebellar lesions	151

<i>Grefkes C, Ritzl A, Zilles K, Noth J, Fink GR</i> : Woher weiß die Hand, wohin sie greifen muss? Visuomotorische Koordinaten-Transformation im medialen intraparietalen Kortex des Menschen	153
<i>Hirnstein M, Lewald J, Hausmann M</i> : The role of the anterior commissure in allocation of attention in space: A case study	155
<i>Zvyagintsev M, Hertrich I, Swirszcz K, Menning H, Kowrtzi Z, Mathiak K</i> : Neuromagnetic correlates of prediction: self-induced vs. random audio-visual apparent motion	157
<i>Hesse MD</i> : Wetten, dass Sie nicht mit Ihrem Ellenbogen an Ihre Nase kommen? Neuronale Korrelate des Wissens um die räumliche Beziehung von Körperteilen	158
<i>Ramon M, Minnebusch D, Suchan B, Daum I</i> : Specificity of visually evoked neural responses to living and non-living stimuli	160
<i>Schlamann M, Gizewski ER, deGreiff A, Grewe K, Freisleder A, Forsting M</i> : Aktivierung des visuellen Cortex unter Alkoholeinfluss: eine fMRT Studie	162
<i>Korvost M, Bock K</i> : Semantic priming of clock time concepts	164
<i>Tsanov M, Manahan-Vaughan D</i> : Diurnal light- and dark-exposure regulates the frequency-dependence of synaptic plasticity in the rat visual cortex in association with circadian rhythms	166
<i>Armbrüster C, Fimm B, Wolter M, Kublen T, Spijkers W</i> : Virtual reality as a research tool in neuropsychology: how accurate are depth estimations in peripersonal space?	168
<i>Kaper M, Saalbach A, Finke A, Müller HM, Weiss S, Ritter H</i> : EEG coherence visualization with self-organizing maps	170
<i>Krinzinger H, Graf M, Valvoda JT, Kublen T, Willmes K, Nuerk HC</i> : Size congruity in three dimensions – a virtual reality study	172
<i>Racine D, Hausmann M, Gunturkun O</i> : Dichotic vision: Output driven sequentiality perception asymmetry in humans	174

Schöning S, Konrad C, Schäfer S, Kugel H, Ohrmann P, Kersting A, Pletziger E, Beizai P, Lehmann W, Greb RR, Arolt V, Heindel W, Engelien AI: Geschlechtsspezifische Einflüsse von Testosteron auf zerebrale Netzwerke für mentale Rotation 175

Barnikol UB, Hauptmann C, Majtanik M, Herrenpoth B, Krachkovskiy V, Voges J, Sturm V, Speckmann E-J, Freund H-J, Tass PA: Shaping synaptic plasticity with desynchronization stimulation: a novel approach to therapeutic rewiring 177

Wojtecki L, Timmermann L, Jörgens S, Nickel J, Südmeyer M, Maarouf M, Schneider F, Seitz RJ, Voges J, Sturm V, Schnitzler A: The impact of deep brain stimulation parameter settings on cognitive and emotional brain functions 179

Brain mapping 181

Quesada CM, Weber B: VBM in healthy volunteers. Evaluation of physiological parameters 183

Wilms M: Assessing the validity of human cytoarchitectonic V5/MT+ maps for functional imaging 185

Mohammadi S, Jansen A, Schwindt W, Deppe M: Correlation between anatomical structures and functional organization of the brain 187

Eickhoff SB, Amunts K, Zilles K: A new concept for the human SII region evolving from the combination of structural and functional brain mapping 189

Rottschy C, Eickhoff SB, Schleicher A, Mohlberg H, Amunts K: Probabilistic cytoarchitectonic mapping of the human ventral extrastriate visual cortex 191

Meyer J, Igel C, Jancke D: Modelling dynamic activity patterns in early visual cortex based on voltage sensitive dye experiments 193

Gizewski ER, Schanze T, Bolle I, deGreiff A, Forsting M, Laube T: Darstellung des visuellen Kortex beim Minipig im fMRT 196

Neurologische Erkrankungen	199
<i>Rivas N, Quesada CM, Kunz W</i> : Population pharmacokinetics in epileptic patients: A comparative study in German and Spanish population ..	201
<i>Geiger MF, Graebenitz S, Danushkodi A, Seidenbecher T, Pape H-C</i> : Seizure-related influences on fear behavior and theta synchronization in a mouse model of temporal lobe epilepsy	204
<i>Lie C, Dafotakis M, Behrens S, Fink GR</i> : Neural correlates of dysexecutive functions in Parkinson's disease	206
<i>Schoenebeck B, Bader V, Zhu XR, Lübbert H, Stichel CC</i> : Serum and glucocorticoid regulated kinase 1, a cell survival response in Parkinson's disease	208
<i>Bader V, Zhu X-R, Lübbert H</i> : Expression of DJ-1 in adult mouse CNS	210
<i>Ambrée O, Herring A, Görtz N, Sachser N, Paulus W, Keyvani K</i> : Environmental enrichment reduces A β deposition in a transgenic mouse model of Alzheimer's disease: involvement of multiple processes ...	212
<i>Wahle T, Rentmeister A, Famulok M, Heneka MT, Walter J</i> : GGA proteins affect proteolytic processing of the β -amyloid precursor protein and the generation of amyloid β -peptide	214
<i>Tamboli IY, Prager K, Barth E, Heneka M, Sandhoff K, Walter J</i> : Inhibition of glycosphingolipid biosynthesis reduces secretion of the β -amyloid precursor protein and amyloid β -peptide	216
<i>Leichsenring A, Zhu X-R, Stichel CC</i> : Amyotrophic lateral sclerosis: widespread neurodegeneration and inflammation in the brain	218
<i>Südmeyer M, Pollok B, Hefter H, Saleh A, Wojtecki L, Gross J, Butz M, Cohnen M, Timmermann L, Schnitzler A</i> : New insights in the pathophysiology of Wilson's disease postural tremor generation ...	220
<i>Kollia K, Maderwald S, Schlamann M, Forsting M, Wanke I</i> : Zeitaufgelöste kontrastmittelgestützte intrakranielle 3D MR-Angiographie mit echo-sharing und GRAPPA (TREAT).	222

<i>Becker W, Göricke S, Trösken V, Blechschmid N, Müller K, Einsfelder B, Wanke I, Forsting M, Dörfler A: Validierung eines neuen elektrolytisch ablösbaren Stentsystems zur kombinierten Embolisation breitbasiger Aneurysmen am Kaninchen</i>	224
<i>Ramos-Cabrer P, Weber R, Justicia C, Wiedermann D, Strecker C, Hoehn M: Assessment of functional brain recovery after transient focal ischemia in the rat: a combined fMRI and electrophysiological longitudinal study</i>	226
<i>Göricke S, Engelhorn T, Speck U, Blechschmid N, Becker W, Forsting M, Dörfler A: Intrathekales Glukokortikoid im experimentellen fokalen zerebralen Schlaganfall – Neuroprotektion zu späteren Applikationszeitpunkten. Eine MR kontrollierte Studie</i>	229
