

Contents

Preface	v
Introduction	vii
1 The state of the Art up to 1962	1
2 Theorems of factorization for operators from a Banach space to a space L^1	11
3 Conical Measures and weakly complete convex cones	23
4 Structure of convex cones contained in a Banach space	37
5 The case of normal cones	51
6 Positive operators defined on $\mathcal{C}(K)$ or with values in L^1	69
7 Summing operators on cones and integral operators	81
8 Tensor products and positive maps	101
Appendix A. Type and cotype	113
Appendix B. Concave and convex operators	116
Appendix C. Another proof of Proposition V.8.	118
Appendix D. Some problems	121
Appendix E. Historical comments	123
References	124
