

CONTENTS

PREFACE	xv
1 INTRODUCTION	1
1.0 SCOPE AND LIMITATIONS	1
1.1 LEVELS OF ANALYSIS	2
1.1.1 Level I	2
1.1.2 Level II	3
1.1.3 Level III	3
1.2 GENERAL	4
1.2.1 Errors, accuracy, precision, sensitivity, range	4
(i) Mistakes	4
(ii) Systematic errors	4
(iii) Random errors	5
(iv) Sensitivity and range	9
1.2.2 Expression of volumes, amounts and concentrations	9
1.2.3 Standards	10
(i) External standards	10
(ii) 'Standard addition'	13
1.2.4 Laboratory practice	14
1.2.5 Cleaning glassware	15
1.3 REAGENTS AND CHEMICALS	15
1.3.1 Reagent grades	15
1.3.2 Water	15
1.3.3 Making up solutions	16
1.3.4 Stock solutions	16
1.4 NOTES ABOUT PARTICULAR TECHNIQUES	17
1.4.1 Volumetric titrations	17
1.4.2 Colorimetric determinations	17
(i) Colorimeters and spectrophotometers	17
(ii) 'Blank' value for a colorimetric determination	19
1.4.3 Flame emission and atomic absorption determinations	19
Principles and instruments	19
Interferences	23
(i) Aspiration rate	23
(ii) Formation of insoluble compounds	23
(iii) Ionisation of the element	23
(iv) Unspecific non-atomic absorption	23
(v) Overlapping spectra	24
1.4.4 Gas chromatography	24
1.4.5 Specific ion electrodes	25
1.5 SAMPLING	25
1.5.1 Place and time of sampling	25
1.5.2 Sample collection and preservation	26
(i) Taking the sample	26
(ii) Filtration	29
(iii) Preservation	30
1.6 METHODS OF SAMPLE CONCENTRATION	31
1.6.1 General concentration procedures	31

1.6.2	More specific methods	31
1.7	CHOICE OF ANALYTICAL METHOD	32
 2. LIGHT AND TEMPERATURE		
2.0	INTRODUCTION	34
2.0.1	Response time of a measuring device	34
2.0.2	Practical details	35
2.1	LIGHT	35
2.1.1	Introduction	35
2.1.2	General	41
	LEVEL I	
2.1.3	Secchi disc depth	42
2.1.4	Total incident radiation	43
	LEVEL II	
2.1.5	Short wave irradiance by thermopile (solarimeter)	43
2.1.6	Other light sensors	44
	LEVEL III	
2.1.7	Irradiance spectrum	46
2.2	TEMPERATURE	46
 3 CONDUCTIVITY, pH, OXIDATION-REDUCTION POTENTIAL, ALKALINITY, TOTAL CO₂, ACIDITY		
3.1	CONDUCTIVITY	49
	LEVEL I	
3.1.1	With field apparatus	50
	LEVEL II	
3.1.2	With laboratory apparatus	51
3.2	pH	53
	LEVEL I	
*3.2.1	Colorimetric with Double Wedge Comparator	
*3.2.2	Colorimetric with Hellige or Lovibond Comparator	
3.2.3	Electrometric with a battery operated field pH meter	53
	LEVEL II	
3.2.4	Electrometric with laboratory pH meter	53
	LEVEL III	
3.2.5	Electrometric with pH meter and recorder	57
3.3	OXIDATION-REDUCTION POTENTIAL	57
3.4	TOTAL ALKALINITY AND PHENOLPHTHALEIN ALKALINITY	58
	LEVEL I	
3.4.1	Acidimetric; indicator end point	58
	LEVEL II	
3.4.2	Acidimetric; potentiometric end point	63
3.4.3	Acidimetric; conductometric end point	63

*Method deleted from this edition.

LEVEL III	
3.4.4	Acidimetric; potentiometric end point, with recorder 64
LEVEL II OR III	
3.4.5	Acidimetric; potentiometric 'Gran titration' 64
3.5	TOTAL CO₂ 64
LEVEL II	
3.5.1	Acidimetric; indicator end point 65
3.5.2	Acidimetric; potentiometric end point 65
LEVEL III	
3.5.3	Gas chromatographic 65
3.6	ACIDITY
LEVEL II 65	
4	MAJOR CONSTITUENTS; Ca²⁺, Mg²⁺, Na⁺, K⁺, Fe²⁺ and Fe³⁺, Cl⁻, SO₄²⁻, S²⁻, CO₃²⁻ and HCO₃⁻
4.1	CALCIUM 67
LEVEL I/II 67	
4.1.1	Colorimetric with glyoxal-bis(2-hydroxyanil) 67
4.2	MAGNESIUM 68
LEVEL I	
4.2.1	Colorimetric with Brilliant Yellow 68
4.3	CALCIUM AND MAGNESIUM 69
LEVEL II	
4.3.1	Volumetric with EDTA; with Calcon and Eriochrome Black T end points .. 70
4.3.2	Volumetric with EDTA; with glyoxal-bis(2-hydroxyanil) and Eriochrome Black T end points 72
4.3.3	Volumetric with EDTA; potentiometric end point 72
LEVEL II/III	
4.3.4	Atomic absorption flame spectrophotometric 74
4.4	SODIUM AND POTASSIUM 75
LEVEL II/III	
4.4.1	Flame emission spectrophotometric 57
4.5	IRON (Fe²⁺ and Fe³⁺) 76
LEVEL I/II	
4.5.1	Colorimetric with o-phenanthroline 76
LEVEL III	
4.5.2	Atomic absorption flame spectrophotometric 77
4.5.3	Polarographic 77

4.6	CHLORIDE	77
	LEVEL I		
4.6.1	Volumetric with Hg^{2+} ; indicator end point	77
	LEVEL II		
4.6.2	Volumetric with Ag^+ ; indicator end point	79
4.6.3	Volumetric with Ag^+ ; potentiometric end point	80
4.6.4	Volumetric with Ag^+ ; conductometric end point (for low Cl^- concentration)	81
	LEVEL III		
4.6.5	Volumetric with Ag^+ ; potentiometric end point	82
4.7	SULPHATE	82
	LEVEL I		
4.7.1	Turbidimetric with Ba^{2+}	82
4.7.2	Conductometric (by calculation)	83
	LEVEL II (tentative procedures)		
4.7.3	Volumetric with EDTA; indicator end point	84
4.7.4	Volumetric with Pb^{2+} ; potentiometric end point	86
	LEVEL III		
4.7.5	Indirectly by atomic absorption flame spectrophotometry	88
4.8	SULPHIDE	88
	LEVEL I		
4.8.1	Iodometric with $\text{S}_2\text{O}_3^{2-}$; indicator end point	88
	LEVEL II		
4.8.2	Colorimetric; as methylene blue	89
4.9	CARBONATE AND BICARBONATE (see § 3.4 and § 3.5)	91
4.10	CALCULATION OF IONIC BALANCE AND CONDUCTIVITY		91
	LEVEL II		
4.10.1	Ionic balance	91
4.10.2	Calculated conductivity	91
4.10.3	Ionic balance and conductivity example	92

5 MINOR CONSTITUENTS; N, P, and Si compounds

NITROGEN COMPOUNDS

5.1	AMMONIA, NITRATE, AND NITRITE	93
	Ammonia		
	LEVEL II		
5.1.1	Colorimetric with Nessler's reagent; after distillation	93
	Nitrate (and nitrite)		
	LEVEL II		
5.1.2	Colorimetric after reduction to ammonia and distillation	96
5.1.3	Simpler version of § 5.1.2	97
5.1.4	NO_3^- reduction in acid medium (principle only)	97

Contents

ix

5.2	AMMONIA	97
	LEVEL I	
*5.2.1	Colorimetric with Nessler's reagent; without distillation	
	LEVEL II	
5.2.2	Acidimetric; with indicator end point	98
*5.2.3	Colorimetric as rubazoic acid; after extraction	
5.2.4	Colorimetric as indophenol blue	99
5.2.5	Colorimetric as indophenol blue (2 further methods)	100
5.3	NITRATE (tentative procedure)	102
	LEVEL II	
*5.3.1	Colorimetric; after reduction to nitrite	
5.3.2	Colorimetric; after reduction on Cd-Cu column	102
5.4	NITRITE	104
	LEVEL I/II	
5.4.1	Colorimetric with sulphanilamide and N-(1-naphthyl)ethylenediamine ..	104
5.5	ORGANIC NITROGEN	105
	Dissolved organic nitrogen	
	LEVEL II	
5.5.1	Colorimetric; as ammonia after wet digestion (2 methods)	109
	Particulate organic nitrogen	
	LEVEL II	
5.5.2	Colorimetric; as ammonia after wet digestion	109
	Dissolved or Total organic nitrogen	
	LEVEL III	
*5.5.3	Colorimetric; as ammonia after digestion in a NaOH melt	
	LEVEL II	
5.5.4	Colorimetric; from residue after dichromate oxidation (see § 7.3.2)	109
	LEVEL III	
5.5.5	UV oxidation before determination as NO_3^- or NO_2^-	110
5.5.6	C, H, N train (outline only)	110
	PHOSPHORUS COMPOUNDS	
5.6	ORTHO-PHOSPHATE	111
	LEVEL I	
5.6.1	Colorimetric as blue phosphomolybdate; with or without extraction	111
	LEVEL II	
5.6.2	Colorimetric as blue phosphomolybdate; with or without extraction	112
5.6.3	Colorimetric as blue phosphomolybdate; after extraction as yellow phosphomolybdate (tentative)	113
	LEVEL III	
5.6.4	AAFS measurement of molybdate after extraction	115

*Method deleted from this edition.

5.7	TOTAL PHOSPHATE	116
	LEVEL II									
	Colorimetric; after conversion by wet digestion to orthophosphate							116
5.7.1	Digestion with boiling H_2SO_4	116
*5.7.2	Digestion with boiling $HClO_4$									
5.7.3	Hydrolysis with H_2SO_4 and $K_2S_2O_8$	116
	LEVEL III									
5.7.4	UV oxidation before colorimetric determination	117
	SILICON COMPOUNDS									
5.8	MOLYBDATE REACTIVE SILICA	118
	LEVEL II									
5.8.1	Colorimetric as blue silicomolybdate	118
5.9	TOTAL SILICA	119
	LEVEL II									
5.9.1	Colorimetric as reactive silica; after fusion with $NaKCO_3$	119
6	TRACE ELEMENTS; B, Co, Cu, Fe, Mn, Mo, V, Zn, Al, Cd, Pb, Hg									
	LEVEL III									
6.0	GENERAL NOTES	121
6.0.1	Sampling and storage	124
6.0.2	Sample digestion	124
6.0.3	Solvent extraction	125
6.1	BORON	125
6.1.1	Boric acid; colorimetric with Carmine	126
6.1.2	Total boron; colorimetric; after conversion to boric acid	126
6.1.3	Automated method (reference only)	127
6.2	COBALT	127
6.2.1	Colorimetric with 2 nitroso-1-naphthol; after extraction	127
6.2.2	Atomic absorption flame spectrophotometric	128
6.3	COPPER	128
6.3.1	Colorimetric with diquinolyl; after extraction	128
6.3.2	Atomic absorption flame spectrophotometric	129
6.4	IRON	130
6.4.1	Total iron (inorganic, or, following digestion, inorganic plus organic); colorimetric with bathophenanthroline	131
6.4.2	Fe^{3+} ; colorimetric with bathophenanthroline	131
6.4.3	Atomic absorption flame spectrophotometric	132
6.5	MANGANESE	132
6.5.1	Soluble Mn^{2+} ; colorimetric as permanganate	133
6.5.2	Total inorganic manganese; colorimetric as permanganate	133

*Method deleted from this edition.

Contents

xi

6.5.3	Total (inorganic plus organic) manganese; colorimetric as permanganate ..	133
6.5.4	Colorimetric; catalytic oxidation of leucomalachite green (tentative)	133
6.5.5	Atomic absorption flame spectrophotometric	134
6.6	MOLYBDENUM	135
6.6.1	Colorimetric with thiocyanate	135
6.6.2	Atomic absorption flame spectrophotometric	135
6.7	VANADIUM	136
	(Reference only)	136
6.8	ZINC	137
6.8.1	Colorimetric with dithizone; after extraction	137
6.8.2	Atomic absorption flame spectrophotometric	138
6.9	ALUMINIUM	138
6.9.1	Colorimetric	138
6.9.2	Atomic absorption flame spectrophotometric	139
6.10	CADMIUM Atomic absorption flame spectrophotometric	139
6.11	LEAD Atomic absorption flame spectrophotometric	139
6.12	MERCURY Atomic absorption spectrophotometric	139

7 ORGANIC SUBSTANCES

7.1	ORGANIC CARBON	141
	Dissolved organic carbon	
	LEVEL III	
	(i) Oxidation to CO ₂	
7.1.1	with chromic acid	142
7.1.2	with persulphate	143
7.1.A	Oxidation by combustion in oxygen	145
7.1.B	Photochemical oxidation	145
7.1.3	(ii) Transfer and purification of CO ₂	145
7.1.4	(iii) Determination of the CO ₂ by back titration of Ba(OH) ₂	145
7.1.5	change of conductance of alkali	146
7.1.6	coulometric titration	146
7.1.7	infrared gas analysis	147
	Particulate organic carbon	
	LEVEL III	
7.1.8	Dry combustion followed by conductometric estimation or infrared gas analysis	147
7.1.9	Automatic apparatus	147
7.2	BIOCHEMICAL OXYGEN DEMAND (BOD)	148
7.3	CHEMICAL OXYGEN DEMAND (COD)	149
	Dissolved organic compounds	
	LEVEL II	
7.3.1	Oxidability by K ₂ Cr ₂ O ₇ ; with back titration	149

7.3.2	Oxidability by $K_2Cr_2O_7$; with estimation of Cr^{3+}	151
7.3.3	Oxidability by $KMnO_4$	152
Particulate organic compounds									
LEVEL II									
7.3.4	Oxidability	154
*7.3.5	Loss on ignition..	154
LEVEL III									
7.3.6	Automatic methods	154
7.4	DISSOLVED ORGANIC COMPOUNDS	154
LEVEL III									
	Fluorescence in UV light	154
7.5	CARBOHYDRATES	155
LEVEL II									
7.5.1	Colorimetric; with anthrone	155
7.5.2	Volumetric; with ferricyanide	156
7.5.3	Colorimetric; with phenol and H_2SO_4	156
7.6	LIPIDS, FATS	158
7.6.1	Extraction with methanol and ethanol-ether	158
7.6.2	Colorimetric; with phosphovanillin	159
7.7	PROTEINS	160
LEVEL II									
7.7.1	Colorimetric; biuret reaction	160
7.7.2	Colorimetric; with acetylacetone	161
7.8	CHLOROPHYLL AND PHAEOPHYTIN	162
LEVEL I									
7.8.1	Colorimetric	162
LEVEL II									
7.8.2	Colorimetric or spectrophotometric	163
LEVEL III									
7.8.3	Fluorimetric	165
7.9	SEPARATION OF PIGMENTS BY THIN LAYER CHROMATOGRAPHY	167
7.10	CHLORINATED HYDROCARBON COMPOUNDS	169
7.11	DISSOLVED VITAMIN B_{12}, THIAMINE, AND BIOTIN (Bioassay)	171
8 DISSOLVED GASES; O_2, N_2, CO_2, H_2, CH_4									
8.1	OXYGEN	172
LEVEL I									
8.1.1	Iodometric; with starch end point	172

*Method deleted from this edition.

Contents

xiii

	LEVEL II		
8.1.2	Iodometric; with starch end point		172
	LEVEL II/III		
8.1.3	Electrode methods		176
8.1.4	Iodometric; with "dead-stop" end point		180
8.2	METHANE		180
	LEVEL II		
8.2.1	Combustible-gas Indicator method		180
	LEVEL III		
8.2.2	Combustion-Absorption method		180
8.2.3	Gas chromatographic		180
8.3	OXYGEN, NITROGEN, AND TOTAL CARBON DIOXIDE		181
	LEVEL III		
8.3.1	Gas chromatographic		181
8.4	HYDROGEN, CARBON DIOXIDE, AND METHANE		181
	LEVEL III		
	Gas chromatographic (tentative)		181
9	ELECTROCHEMICAL PROPERTIES OF WATER		
	(Theoretical addendum to chapter 3)		
9.1	CONDUCTIVITY		182
9.2	pH		183
9.3	BUFFER SOLUTIONS		184
9.4	INDICATORS		185
9.5	EFFECTS OF TEMPERATURE ON pH		186
9.6	THE CARBONATE-BICARBONATE-CARBONIC ACID SYSTEM		186
9.7	ALKALINITY TITRATIONS		190
9.8	DETERMINATION OF TOTAL CO₂		192
9.9	POTENTIAL DIFFERENCES		194
9.10	OXIDATION-REDUCTION POTENTIALS		196
9.11	pH DEPENDENT REDOX POTENTIALS		197
9.12	POTENTIOMETRIC TITRATIONS		199
9.13	DEAD-STOP END POINT TITRATIONS		199
	REFERENCES		201
