1 Plant Hormones and Other Growth Substances – Their Background, Structures and Occurrence

J.R. BEARDER (With 10 Figures)

| | |
|--|----|
| 1.1 Introduction | 9 |
| 1.2 Ethylene | 9 |
| 1.3 Auxins | 12 |
| 1.4 Gibberellins | 22 |
| 1.5 Cytokinins | 38 |
| 1.6 Abscisic Acid and Related Compounds | 48 |
| 1.7 Other Plant Constituents Which Affect Plant Growth | 56 |
| a) Aromatic Compounds | 58 |
| b) Nitrogen-Containing Compounds | 74 |
| c) Terpenoid Compounds | 76 |
| d) Aliphatic Compounds | 79 |
| e) Other Compounds | 80 |
| References | 80 |

2 Extraction, Purification, and Identification

T. YOKOTA, N. MUROFUSHI, and N. TAKAHASHI (With 38 Figures)

| | |
|--|-----|
| 2.1 Methods of Extraction, Purification, and Isolation | 113 |
| 2.1.1 Extraction of Active Principles from Plant Materials | 113 |
| a) General Remarks | 113 |
| b) Auxins | 114 |
| c) Gibberellins | 116 |
| d) Cytokinins | 117 |
| e) Abscisic Acid and Related Compounds | 117 |
| 2.1.2 Fractionation Based on Solvent Partitioning and Ion Exchange Resin | 118 |
| a) General Remarks | 118 |
| b) Auxins | 120 |
| c) Gibberellins | 124 |
| d) Cytokinins | 125 |
| e) Abscisic Acid and Related Compounds | 128 |
| 2.1.3 Column Chromatography and Other Purification Techniques | 129 |
| a) General Remarks | 129 |
| b) Adsorption Column Chromatography | 130 |
| c) Partition Column Chromatography | 132 |
| d) Sephadex Column and Gel Permeation Column Chromatography | 138 |
| e) Insoluble Polyvinylpyrrolidone Column Chromatography | 139 |
| f) Countercurrent Distribution | 142 |
| g) Other Techniques | 143 |

| | | |
|-------|--|-----|
| 2.1.4 | Examples of Purification of Plant Hormones | 144 |
| a) | Isolation of Auxins from Young Citrus Fruits | 144 |
| b) | Isolation of Indole-3-Ethanol from Cucumber Seedlings | 145 |
| c) | Isolation of Gibberellins A ₁ , A ₅ , A ₆ , and A ₈ from Immature <i>Phaseolus</i> Seeds | 146 |
| d) | Isolation of Gibberellins and Gibberellin Conjugates from Mature <i>Phaseolus</i> Seeds | 147 |
| e) | Isolation of Cytokinins from Immature Sweet Corn | 150 |
| f) | Isolation of Glucosylzeatin and Glucosyl Ribosylzeatin from <i>Vinca rosea</i> Crown Gall | 154 |
| g) | Isolation of Abscisic Acid from Young Cotton Fruits | 154 |
| 2.2 | Identification Without Isolation | 154 |
| 2.2.1 | Criteria of Identification and Reliability | 154 |
| 2.2.2 | Paper and Thin-Layer Chromatography | 156 |
| a) | General Remarks | 156 |
| b) | Identification of Plant Hormones by Paper and Thin-Layer Chromatography | 157 |
| 2.2.3 | Gas-Liquid Chromatography | 168 |
| a) | General Remarks | 168 |
| b) | Identification of Plant Hormones by Gas-Liquid Chromatography | 169 |
| 2.2.4 | High Performance (Pressure) Liquid Chromatography | 175 |
| a) | General Remarks | 175 |
| b) | Identification of Plant Hormones by High Performance Liquid Chromatography | 176 |
| 2.2.5 | Combined Gas-Liquid Chromatography-Mass Spectrometry | 181 |
| a) | General Remarks | 181 |
| b) | Identification of Plant Hormones by GC-MS | 182 |
| c) | Selected Ion Monitoring | 184 |
| 2.2.6 | Optical Rotatory Dispersion and Circular Dichroism | 190 |
| | References | 190 |

3 Quantitative Analysis of Plant Hormones

D.R. REEVE and A. CROZIER (With 13 Figures)

| | | |
|---------|--|-----|
| 3.1 | Introduction | 203 |
| 3.2 | Theoretical Considerations | 203 |
| 3.2.1 | Basic Analytical Errors – Accuracy and Precision | 203 |
| 3.2.2 | Analysis of Samples from Open-Ended Systems | 209 |
| 3.2.2.1 | Open Versus Closed Systems | 209 |
| 3.2.2.2 | Accuracy as a Probability Term | 209 |
| 3.2.2.3 | Verification of Accuracy | 214 |
| a) | Successive Approximation | 215 |
| b) | Information Content | 226 |
| c) | Some General Considerations | 236 |
| 3.3 | Assays | 240 |
| 3.3.1 | Bioassays | 240 |
| 3.3.2 | Immunological Assays | 245 |
| 3.3.3 | Physicochemical Detectors | 247 |
| 3.4 | Chromatographic Procedures | 254 |
| 3.5 | Internal Standards | 262 |
| 3.6 | Analytical Procedures | 264 |
| 3.6.1 | Indole-3-Acetic Acid | 264 |
| 3.6.2 | Gibberellins | 267 |
| 3.6.3 | Cytokinins | 269 |
| 3.6.4 | Abscisic Acid | 270 |
| 3.7 | Summary | 272 |
| 3.8 | List of Symbols | 274 |
| | References | 276 |

4 Biosynthesis and Metabolism of Plant Hormones

G. SEMBDNER, D. GROSS, H.-W. LIEBISCH and G. SCHNEIDER (With 34 Figures)

| | |
|---|-----|
| 4.1 Biosynthetic Pathways | 281 |
| 4.1.1 Auxins | 281 |
| a) Tryptophan as Primary Precursor | 281 |
| b) Pathways of IAA Formation from Tryptophan | 283 |
| c) Indole-3-Pyruvic Acid Pathway | 283 |
| d) Tryptamine Pathway | 287 |
| e) Other Possible Pathways | 288 |
| f) Chlorinated Auxins | 289 |
| 4.1.2 Cytokinins | 289 |
| a) Biosynthesis of tRNA-Cytokinins | 289 |
| b) Biosynthesis of Free Cytokinins | 292 |
| 4.1.3 Plant Hormones of Terpenoid Origin: General Terpenoid Pathway | 293 |
| 4.1.4 Abscisic Acid | 295 |
| a) Mevalonic Acid as Precursor of ABA | 295 |
| b) Compounds with a Pre-Formed Carbon Skeleton of ABA | 298 |
| c) Formation of ABA by Degradation of Carotenoids | 300 |
| 4.1.5 Gibberellins | 301 |
| a) General View | 301 |
| b) Enzymic Cyclization of Geranylgeranyl Pyrophosphate to ent-Kaurene | 304 |
| c) Oxidation of ent-Kaurene | 307 |
| d) Contraction of Ring B in ent-Kaurene | 309 |
| e) Conversion of C ₂₀ -Gibberellins into C ₁₉ -Gibberellins | 311 |
| f) Predominant Steps in Regulation of Biosynthesis | 314 |
| 4.1.6 Ethylene | 317 |
| a) Ethylene Formation in Model Systems | 318 |
| b) Synthesis in Vivo – Physiological Pathways | 319 |
| c) Enzymes – Reaction Mechanisms | 324 |
| d) Regulation of Ethylene Biosynthesis | 326 |
| 4.2 Metabolism (Interconversion and Catabolism) | 336 |
| 4.2.1 Auxins | 336 |
| a) Routes and Products of IAA Catabolism | 336 |
| b) Enzymes of IAA Catabolism | 340 |
| c) Physiological Significance of IAA Catabolism | 345 |
| d) Control of IAA Catabolism in Vivo | 346 |
| 4.2.2 Cytokinins | 347 |
| 4.2.3 Abscisic Acid | 350 |
| a) 6'-Hydroxymethyl ABA | 350 |
| b) Phaseic Acid | 352 |
| c) 4'-Dihydrophaseic Acid and Its 4'-Epimer | 353 |
| 4.2.4 Gibberellins | 354 |
| a) Interconversion of C ₁₉ -Gibberellins in the Fungus | 354 |
| b) Metabolism of Gibberellins in Higher Plants | 355 |
| c) Catabolism of Gibberellins | 359 |
| d) Control of Gibberellin Metabolism by Other Plant Hormones and by Environmental Factors | 360 |
| 4.2.5 Ethylene | 362 |
| 4.3 Conjugation | 363 |
| 4.3.1 Auxins | 363 |
| a) Peptidyl IAA Conjugates | 364 |
| b) Glycosyl IAA Conjugates | 366 |
| c) myo-Inositol IAA Conjugates | 367 |
| 4.3.2 Cytokinins | 368 |
| a) Metabolic Conjugation Pathways | 368 |
| b) Enzymic Investigations | 371 |
| 4.3.3 Abscisic Acid | 373 |

| | |
|---|-----|
| 4.3.4 Gibberellins | 376 |
| a) Endogenous Gibberellin Conjugates | 376 |
| b) Chemical Synthesis of Gibberellin Conjugates | 376 |
| c) Metabolism of Gibberellin Conjugates | 377 |
| d) Enzymatic Hydrolysis and Biological Activity of Gibberellin Conjugates | 381 |
| e) Biological Function of Gibberellin Conjugates | 382 |
| 4.4 Localization of Biosynthesis and Metabolism | 382 |
| 4.4.1 Auxins | 383 |
| 4.4.2 Cytokinins | 384 |
| 4.4.3 Abscisic Acid | 387 |
| 4.4.4 Gibberellins | 387 |
| 4.4.5 Ethylene | 389 |
| References | 390 |

5 Molecular and Subcellular Aspects of Hormone Action

J.L. STODDART and M.A. VENIS (With 21 Figures)

| | |
|---|-----|
| 5.1 Introduction | 445 |
| 5.1.1 Receptor Characteristics | 445 |
| 5.1.2 General Methodology of Receptor Studies | 446 |
| a) Analysis of Binding Data | 446 |
| b) Acquisition of Binding Data | 446 |
| 5.2 Auxins | 448 |
| 5.2.1 Structure-Activity Relationships | 448 |
| 5.2.2 Potential Location of Auxin Receptors | 450 |
| 5.2.3 Nuclear and Cytoplasmic Receptors | 453 |
| a) Auxin Mediator Proteins | 453 |
| b) Auxin-Binding Proteins | 455 |
| 5.2.4 Membrane-Bound Receptors | 457 |
| a) The Corn Coleoptile System | 457 |
| b) Membrane-Bound Sites in Other Tissues | 469 |
| 5.3 Cytokinins | 470 |
| 5.3.1 Structure-Activity Relationships | 470 |
| 5.3.2 Cytokinins in Transfer RNA (tRNA) | 472 |
| 5.3.3 Cytokinin Binding to Sub-Cellular Components | 474 |
| 5.4 Gibberellins | 478 |
| 5.4.1 Structure-Activity Relationships | 478 |
| 5.4.2 Transcriptional Control: Analogies with Animal Steroid Hormones | 483 |
| a) Steroid Hormones | 484 |
| b) Gibberellins | 486 |
| 5.4.3 Effects on Membrane Organization | 490 |
| 5.4.4 Action in Artificial Membrane Systems | 492 |
| 5.4.5 Changes in Cell Extensibility | 497 |
| 5.5 Abscisic Acid | 498 |
| 5.6 Ethylene | 498 |
| 5.6.1 Structure-Activity Relationships | 499 |
| 5.6.2 Aspects of Molecular Action | 499 |
| 5.7 Concluding Remarks | 501 |
| References | 501 |

6 Molecular Effects of Hormone Treatment on Tissue

M. ZERONI and M.A. HALL (With 10 Figures)

| | |
|---|-----|
| 6.1 Introduction | 511 |
| 6.2 Effects of Hormones on Processes Involved in Growth | 513 |

| | |
|--|------------|
| 6.2.1 Effects of Auxins on Cell Extensibility | 514 |
| a) Kinetic Studies on Cell Extension | 516 |
| b) Effects on Nucleic Acids and Proteins | 519 |
| c) The Acid Growth Effect | 521 |
| d) Effect on Metabolism of the Cell Wall | 524 |
| 6.2.2 Other Growth Regulators | 530 |
| a) Gibberellins | 530 |
| b) Cytokinins | 530 |
| c) Ethylene | 532 |
| d) Abscisic Acid | 532 |
| e) 3-Methyleneoxindole | 532 |
| f) Fusicoccin | 533 |
| 6.2.3 Conclusions | 534 |
| 6.3 Effects of Growth Regulators on Ion Transport and Regulation of Membrane Properties | 537 |
| 6.3.1 Hormones and Stomata | 541 |
| 6.3.2 Hormone-Directed Transport | 544 |
| 6.4 Effects of Hormones on Non-Growing Systems | 544 |
| 6.4.1 The Aleurone Layer System | 544 |
| 6.5 Effects of Hormones on Differentiating Systems | 553 |
| 6.6 Conclusions | 567 |
| References | 568 |
| Author Index | 587 |
| Subject Index | 651 |
