Contributors	v
Foreword	ix
Preface	xi
Dedication	xiii
DICKINSON, H. G. and SHELDON, JUDITH M. The generation of patterning at the plasma membrane of the young microspore of <i>Lilium</i>	1
ROWLEY, J. R. and ROWLEY, JOANNE S. Ontogenetic development of microspores of <i>Ulmus</i> (Ulmaceae)	19
HIDEUX, M. and ABADIE, M. Ontogenetic constraints on function in pollen of some <i>Saxifraga</i> L. species	35
DAHL, A. O. Observations on pollen development in <i>Arabidopsis</i> under gravitationally controlled environments	49
SOUTHWORTH, DARLENE. Substructural organization of pollen exines	61
BARNES, SUSAN H. and BLACKMORE, S. Some functional features in pollen development	71
NOWICKE, JOAN W., BITTNER, JANICE L. and SKVARLA, J. J. <i>Paeonia</i> , exine substructure and plasma ashing	81
PUNT, W. Functional factors influencing pollen form	97
CHALONER, W. G. Electrostatic forces in insect pollination and their significance in exine ornament	103
HESSE, M. Nature, form and function of pollen-connecting threads in angiosperms	109
THANIKAIMONI, G. Pollen apertures: form and function	119
BLACKMORE, S. and BARNES, SUSAN H. Harmomegathic mechanisms in pollen grains	137
CERCEAU-LARRIVAL, MARIE-THÉRÈSE and CHALLE, JEANNETTE. Biopalynology and maintenance of germination capacity of stored pollen in some angiosperm families	151
TAYLOR, T. N. and ZAVADA, M. S. Developmental and functional aspects of fossil pollen	165
CRANE, P. R. Form and function in wind dispersed pollen	179
WALKER, J. W. and WALKER, AUDREY G. Ultrastructure of Early Cretaceous angiosperm pollen and its evolutionary implications	203
BATTEN, D. J. Possible functional implications of exine sculpture and architecture in some Late Cretaceous Normapolles pollen	219
TRYON, ALICE F. Stasis, diversity and function in spores based on an electron microscope survey of the Pteridophyta	233

LUGARDON, B. Données ultrastructurales sur la fonction de l'exospore chez les Ptéridophytes.	251
KNOX, R. B. and MCCONCHIE, C. A. Structure and function of compound pollen	265
FERGUSON, I. K. and PEARCE, K. J. Observations on the pollen morphology of the genus <i>Bauhinia</i> L. (Leguminosae: Caesalpinioideae) in the neotropics	283
GUINET, Ph. Geographic patterns of the main pollen characters in genus <i>Acacia</i> (Leguminosae), with particular reference to subgenus <i>Phyllodineae</i>	297
GRAYUM, M. H. Correlations between pollination biology and pollen morphology in the Araceae, with some implications for angiosperm evolution	313
KRESS, W. J. Exineless pollen structure and pollination systems of tropical <i>Heliconia</i> (Heliconiaceae)	329
PACINI, E. and BELLANI, L. M. <i>Lagerstroemia indica</i> L. pollen: form and function	347
NILSSON, S. The significance of pollen morphology in the Apocynaceae	359
LE THOMAS, A., MORAWETZ, W. and WAHA, M. Pollen of palaeo- and neotropical Annonaceae: definition of the aperture by morphological and functional characters	375
KÖHLER, E. and BRÜCKNER, P. Pollen morphology and systematic position of the genus <i>Simmondsia</i>	389

Selected Posters

WILLEMSE, M. T. M. Light absorption of pollen and pollen walls	393
SKVARLA, J. J. and ROWLEY, J. R. <i>Canna generalis</i> , the conjectured function of intine-like components	397
MITSUI, K. The development of the perispore in the fern family Thelypteridaceae	401
VAN UFFELEN, G. A. Some functional aspects of the spore wall in <i>Pyrrhosia</i> (Polypodiaceae, Filicales)	405
SUAREZ-CERVERA, M. and SEOANE-CAMBA, J. A. On the exine elasticity in the <i>Lavandula dentata</i> L. pollen grains	409
SILJAK-YAKOVLEV, SONIA. Functional dynamics of the pollen exine and apertures in Compositae of the Dinaric Alps	413
HARLEY, MADELINE M. The nature of the endoaperture in the pollen of the Sapotaceae	417
ATER, M. Tectum stereostructure, mineral composition of exine, pollen fertility in <i>Phragmites australis</i> (Poaceae)	421
CHRISTENSEN, PIA BRO. Evolutionary trends in the pollen morphology of Malvaceae	425
Subject Index	429
