XI  Preface
Role of T-Cell Subtypes in Allergic Inflammations
Blaser, K. (Davos)

1  Th17 and Treg Cells Innovate the Th1/Th2 Concept and Allergy Research
Schmidt-Weber, C.B. (London)
1  Abstract
2  General Role of T Cells in the Immune System
3  Treg Cells and Their Importance in Allergy
4  Th17 Cells – Proinflammatory Cousins of Treg Cells?
5  Origin of T-Cell Phenotypes
6  Future and Perspective
7  Acknowledgements
8  References

8  Regulatory T Cells and Antigen-Specific Tolerance
8  Abstract
9  Characteristics of Regulatory T Cells
10  Intra- and Extrathymic Generation of Tregs
12  Function of Tregs
13  Concluding Remarks
14  References

16  Molecular Mechanisms of Regulatory T-Cell Development
Chatila, T.A. (Los Angeles, Calif.)
16  Abstract
17  Role of Foxp3 in T<sub>reg</sub> Cell Function
17  Molecular Mechanisms of nT<sub>reg</sub> Cell Development in the Thymus
18  Function of Foxp3 in nT<sub>reg</sub> Cell Development
18  Transcriptional Regulation by Foxp3
20  The Foxp3 Transcriptional Program and the T<sub>reg</sub> Cell Transcriptome
21  Transcriptional Regulation of Foxp3
29 Interaction of Regulatory T Cells with Antigen-Presenting Cells in Health and Disease

29 Abstract
29 Dendritic Cells and Regulatory T Cells
29 Maturation Status of Dendritic Cells Is Critical for Induction of Regulatory T Cells
30 Regulatory T Cells Suppress DC Maturation
32 Monocytes/Macrophages and Regulatory T Cells
34 B Cells and Regulatory T Cells
35 Interaction between DCs and Regulatory T Cells during Allergic and Inflammatory Reactions
37 Conclusion
37 References

40 Mucosal Regulatory T Cells in Airway Hyperresponsiveness

40 Abstract
40 Respiratory Tolerance
41 Asthma
41 Measuring AHR
41 AHR in Asthma
41 Studying AHR in Animal Models
43 Inhibiting AHR in Animal Models
43 Treg Populations
44 Role of Treg in Inhibiting AHR
44 Role of Treg in Human AHR
45 Therapeutic Means of Inhibiting AHR in Asthma
45 Conclusions
46 References

48 Natural Killer Cells in Allergic Inflammation
Ertan, G.; Aktas, E.; Deniz, G. (Istanbul)

48 Abstract
48 Human Natural Killer Cell Subtypes
50 Lysis by NK Cells
50 NK Cells and Cytokines
53 NK Cells in Allergy
55 Concluding Remarks
56 References

58 Mast Cells and Mast Cell-Derived Factors in the Regulation of Allergic Sensitization
Taube, C.; Stassen, M. (Mainz)

58 Abstract
59 Skin Models Implicate a Role for Mast Cells in Priming of Adaptive Immune Responses and Allergic Sensitization
62 Mast Cells Initiate and Modulate T-Cell Responses during Allergic Airway Inflammation
67 Regulatory Effects of Histamine and Histamine Receptor Expression in Human Allergic Immune Responses
Akdis, C.A. (Davos); Jutel, M. (Wroclaw); Akdis, M. (Davos)

67 Abstract
67 Molecular Basis for Action
68 Histamine Receptors
70 Synthesis and Metabolism of Histamine
70 Histamine in Chronic Inflammatory Responses
74 Role of Histamine in the Regulation of Immune Response
74 Antigen-Presenting Cells
74 Effect of Histamine on T Cells and Antibody Isotypes
76 Role of Histamine and H1, Antihistamines during Allergen-SIT
77 Use of H1, Antihistamines in Asthma
78 Conclusions
78 Acknowledgments
79 References

83 T-Cell Regulation in Asthmatic Diseases
Finotto, S. (Mainz)

83 Abstract
84 New Molecular Target for Allergic Asthma
84 Interleukin-6 as a Bridge between Innate and Adaptive Immune Responses
85 Interaction of Th2 and T-Regulatory Cells
86 Do Th17 Cells Counteract T-Regulatory Cells in Allergic Asthma?
87 T-Bet Deficiency: Genetic and Epigenetic Control in Allergic Asthma
89 Glucocorticoid Receptor and T-Cell-Specific Transcription Factors
91 Conclusions
91 Acknowledgment
91 References

93 Immune Regulatory Mechanisms in Allergic Contact Dermatitis and Contact Sensitization
Cavani, A. (Rome)

93 Abstract
94 Contact Hypersensitivity and Animal Model of Tolerance to Haptens
95 T-Regulatory Cells in Contact Allergy
97 Dendritic Cells as Orchestrators of Skin Immune Responses to Haptens
99 Conclusions
99 References

101 Regulatory Role of T Lymphocytes in Atopic Dermatitis
Werfel, T.; Wittmann, M. (Hannover)

101 Abstract
102 Regulation of Atopic Dermatitis by T Cells – Clinical Aspects
102 T Lymphocytes Dominate the Cellular Infiltrate in Atopic Dermatitis
102 Role of Adaptive Immune Responses in Atopic Dermatitis Involving IgE Responses
102 Aeroallergen-Specific T Cells Are Well-Known Initiators and Perpetuators of Eczematous Responses in Atopic Dermatitis
112 T-Cell Regulation in Helminth Parasite Infections: Implications for Inflammatory Diseases
Maizels, R.M. (Edinburgh); Yazdanbakhsh, M. (Leiden)

124 Immune Regulation and Tolerance to Fungi in the Lungs and Skin
Romani, L.; Puccetti, P. (Perugia)

138 Control of Delayed-Type Hypersensitivity by Ocular-Induced CD8+ Regulatory T Cells
Cone, R.E.; Chattopadhyay, S.; O’Rourke, J. (Farmington, Conn.)
150 Novel Therapeutic Strategies by Regulatory T Cells in Allergy
Elkord, E. (Manchester)

Abstract
Role of T-Regulatory Cells in Inhibiting Allergic Diseases
Implications from Mouse Models
Evidence for Targeting Treg Cells
Therapeutic Strategies for Modulating Treg Activity in Allergy
Induction of Treg Activity by Peptide-Based Immunotherapy
Induction of Treg Activity by Targeting Toll-Like Receptors
Conclusion
References

158 T-Cell Regulatory Mechanisms in Specific Immunotherapy
Jutel, M. (Wrocław); Akdis, C.A. (Davos)

Abstract
Peripheral T-Cell Tolerance in Allergen-Specific Immunotherapy
Peripheral T-Cell Tolerance to Allergens Is Associated with Regulation of Antibody Isotypes and Suppression of Effector Cells
T-Regulatory Cells
Tr1 Cells
Th3 Cells
CD4+CD25+ Treg Cells
Other T-Regulatory Cells
B-Regulatory Cells
Dendritic-Regulating Cells
Other Cells with a Possible Regulatory Function
Suppression Mechanisms of T-Regulatory Cells
Clinical Relevance of T-Regulatory Cells
cAMP-Stimulating G-Protein-Coupled Receptors in Peripheral Tolerance
Clinical Evidence for T-Regulatory Function of Histamine Receptors
Conclusion
References

178 Control and Regulation of Peripheral Tolerance in Allergic Inflammatory Disease: Therapeutic Consequences
Li, L.; Boussiotis, V.A. (Boston, Mass.)

Abstract
Pathobiology of the Allergic Inflammatory Response
Regulation of Peripheral T-Cell Tolerance and Aberrations in Allergic Diseases
T-Cell Anergy
Suppressive Cytokines (IL-10, TGF-β)
Natural and Adaptive Treg Cells
Mechanisms Promoting the Inflammatory Response in Allergic Diseases
Tumor Necrosis Factor-α
Lung Dendritic Cells: Targets for Therapy in Allergic Disease
Lambrecht, B.N. (Gent/Rotterdam); Hammad, H. (Gent)

Abstract
General Function of Dendritic Cells in the Immune System: Induction of Immunity
Function of Lung Dendritic Cells: Induction of Tolerance in Steady-State and Bridging Innate and Adaptive Immunity
Dendritic Cells in Established Allergic Airway Inflammation
Control of Lung DC Function by Regulatory T Cells
Perpetuation of Allergic Inflammation and Remodeling: A Role for Cytokine-Driven Activation of DCs?
Dendritic Cells as Drug Targets in Allergic Diseases
Conclusion
Acknowledgements
References

Antigen-Based Therapies Targeting the Expansion of Regulatory T Cells in Autoimmune and Allergic Disease
Leech, M.D.; Anderton, S.M. (Edinburgh)

Abstract
The Need for Precise Treatments for Autoimmune and Allergic Disease
T-Regulatory Cells in the Natural Resolution of Autoimmune and Allergic Inflammation
Antigen-Based Therapy for Autoimmune and Allergic Disease
Are Antigen-Based Therapies Expanding Tregs?
New Directions
Acknowledgements
