

CONTENTS

Opening Session:

W. S. Benninghoff Aerobiology: Status and Prospects	1
W. Jorde Importance of Aerobiological Findings for Diagnostic Work in Clinical Allergy . .	8

Symposium I

N. Å. Andersson Modern Pollen Deposition in Relation to Ecosystem Structure and Climate in the Torneträsk-area, N Sweden	13
Inga Engström and S. Nilsson Pollen Calendar for the Stockholm Area	13
B. Bringfelt Studies of Pollen Concentration in Stockholm and Weather Data	14
Ritva Kupias and Y. Mäkinen Correlations of Alder Pollen Occurrence to Climatic Variables	22
Erika Stix Three Pollen Calendars of Western Germany	29
Vera Markgraf Pollen Dispersal in a Mountain Area	30
A. Mallea, M. Soler, A. Kara, A. R. Reboul, and J. Charpin The Pollen Calendar of Nice and Pollinosis	50
Zofia Borówko-Dłuzakowa and E. Zawisza Analysis of Pollen Aeroallergens in the Atmosphere of Warsaw and Katowice . . .	56
Raina Yankova Distribution of the Poaceae Pollen Grains in the Atmosphere in Bulgaria	57
B. Aytuğ Pollen in the Air of Istanbul	60
P. Cour, C. Seignalet, B. Guérin, L. Mayrand, S. Nilsson, and F. B. Michel Inter-regional Studies of Pollen Incidence from Lapland to North Africa	61
Mary K. O'Rourke Pollen Dispersal and its Relationship to Respiratory Illness	81

Maria Léa Salgado-Labouriau Pollen and Spore Rain in Central Brazil	89
Gabriela Serbănescu-Jitariu and J. T. Tarnavski Pollen Morphology of some Salicaceous Species and their Importance for Pollinosis	111
G. Vorwohl Points of Common Interest between Aerobiology and Melittopalynology.	115
Krishna Mitra Melittopalynology and Plant Utilisation.	119
G. Ricciardelli d'Albore The Pollen Spectrum of St. Catherine State's (Brazil) Honeys.	124
M. Hesse Pollenkitt in Relation to Entomophily and Anemophily	125
 Symposium II	
H. M. Brown and F. A. Jackson Spore and Pollen Survey across Britain	129
Nicole Nolard-Tintigner Fungal Spores, Pollens and Allergy in Belgium	138
Ursula Allitt The Visual Identification of Airborne Fungal Spores	139
D. K. G. Ayanru The Air-spora of a Tropical Region. I. Daytime and Nocturnal Variations in Fungal Spores in the Air	144
S. T. Tilak Aeromycology at Aurangabad — I. Ascospores	145
Z. C. Chen, Y. M. Hsiung, and H. Y. Tseng Seasonal Variation of Fungal Air Spora in Taipei	148
G. Rijckaert and B. van de Lustgraaf The Allergenicity of Xerophilic Fungi. A Preliminary Report.	156
M. Kotimaa, L. Kärenlampi, E. O. Terho, and K. Husman Exposure to Spore Dust in Agricultural Working Environments	158
B. v. d. Lustgraaf Seasonal Abundance of Algae and Xerophilic Fungi in House Dust	165

A. Rantio-Lehtimäki, A. Pohjola, and Y. Mäkinen Spore Composition in a Garbage Disposal Plant in Turku	170
R. L. Edmonds Airborne Fungi, Bacteria and Pollen Associated with Sewage Sludge Application to a Forest Clearcut	187
F. Stadelmann Influence of Aeroplankton and Arthropods on Phyllosphere Micro-organisms . . .	192
R. L. Edmonds Airborne Dispersal of Douglas-fir Tussock Moth Larvae	201
W. K. R. E. v. Wingerden and H. F. Vugts Ecological and Meteorological Aspects of Aeronautic Dispersal of Spiders	212
S. Wiktelius Aerial Dispersal of Aphids into Sweden	220
Å. Bovallius and P. Ånäs Bacterial Spores in the Air and on the Ground in Connection with Biological Insect Control.	227
J. Dutkiewicz Airborne Bacteria as Occupational Allergens.	232
E. Katzenelson, B. Teltsch, and H. I. Shuval The Problems of Airborne Enteric Bacteria and Viruses from Spray Irrigation with Wastewater	243
N. P. Ferris and A. I. Donaldson The Influence of Relative Humidity on the Airborne Survival of a Calicivirus (Vesicular Exanthema Virus of Swine).	256
A. M. Hood, A. J. Stagg, and H. I. Willis Survival of Airborne Influenza Virus in Open Air.	257
A. I. Donaldson and N. P. Ferris The Influence of Inhibitors and Antibody on the Airborne Survival of Foot and Mouth Disease Virus	263
 Symposium III 	
A. Oehling Allergic Respiratory Diseases and Aerobiology	271
H. M. Brown and F. A. Jackson The Value of Aerobiology to an Allergy Treatment Centre	278

B. Krzysztofik Air Microflora as a Hygienic and Sanitary Index of the Health Service	287
S. Chanda and S. Mandal Aerobiology in India with Reference to Upper Respiratory Tract Allergy and Organic Environmental Pollution	288
F. Th. M. Spieksma Daily Hay-fever Forecast.	307
E. Fuchs Insect Dust as Inhalant Allergen	316
R. Urbanek, D. Karitzky, and J. Forster Insect Sting Allergy: Diagnosis and Hyposensitization Therapy	321
J. v. Mayenburg, H. Dtingemann, B. Heymer, K. H. Schleifer, and A. Neiss 'Immunotoxic' Reactions to Peptidoglycan and other Bacterial Cell Wall Components in Man.	322
O. J. B. Hübschle, Ruth Farrenkopf, and K. Bauer Improved Demonstration of Airborne Virus Contamination.	333
H. Deicher, F. Osterhage, M. Wippler, and J. R. Kalden Concerning the Mechanism of Hyposensitization in Grass Pollen Induced Hay Fever	334
J. Rakoski and H. Dtingemann Re-examination after Hyposensitization Therapy.	340
W. Wilde Successful Desensitization of Primary Allergic Secondarily Infected Obstructive Bronchitis	347
Eleonora Kumer, P. Mandrioli, and F. Tampieri A Comparison between the Concentration of Airborne Pollens and the Clinical Symptomatology in Allergic Subjects under Treatment with Hyposensitizing Agents.	348
F. Horak and S. Jäger The Biological Exposition Test: A Method of Testing Pollinosis	355
M. Werner Influences of the Different Factors on Results of Specific Hyposensitization . . .	360
D. Glaubitt, K. Siafarikas, and R. Mühlenberg Evaluation of Radioallergosorbent Tests in Patients with Diseases of the Upper Respiratory Tract and Pollinosis.	366

X. Baur, V. v. Liebe, and G. Burg Extrinsic Asthma: Relationship between Skin Tests, Bronchial Provocation Tests and RAST in Patients with Pollen and Mould Spore Allergy	374
K. J. Kalveram and G. Forck Cross Reactions between Pollen Antigens from Cereals and Non-cereal Grasses . .	375
S. W. Tromp Significance of the Hypothalamic Thermoregulatory Mechanism of Man in Aero- biological Research	380
Symposium IV	
W. S. and Anne S. Benninghoff Airborne Organic Particles in Relation to Electric Fields	381
H. L. König Natural Electric Fields as Biological Environmental Factors	385
H. Schuldt Conductance Measurements as an Indication of Environmental Effects	386
F. A. Dark Aerosol Sampling Methods	387
P. Mandrioli, Claudia Scarani, F. Tampieri, and Fernanda Trombetti Airborne Pollen Source Modelling	393
F. H. Rijdsdijk and K. Rappoldt A Model of Spore Dispersal inside and above Canopies	407
G. Boehm and Ruth M. Leuschner Observations with an 'Individual Pollen Collector'	411
G. J. Harper The Use of Tracer Methods to Measure Aerosol Generation in Clinical and Laboratory Procedures	420
Y. Mäkinen Quantification of Dust in Aerobiological Slides	432
Anna Letizia Zanotti Censoni, C. Bettini, Clelia Giacobini, and P. Mandrioli Aerobiological Research in Enclosed Spaces of Historical and Artistic Interest . .	434
J. C. Gould Further Experiences with Unidirectional Air Flow in Surgical Theatres	439
R. P. Clark Clothing for the Operating Team — a 16 mm Film	439

S. U. Deshpande Meteorology and Atmospheric Grass Pollen at Nagpur	440
S. Nagarajan, L. M. Joshi, K. D. Srivastava, and D. V. Singh Synoptic Meteorological Conditions in Relation to Leaf Rust Spread in Northern India	446
P. Ånäs and Å. Bovallius Investigation of Natural Airborne Bacteria by Numerical Taxonomy	452
S. C. Birnbaum, M. Pinto, Tamar Kadar, and G. M. Goldberg The Synergistic Effect of Aerogenic Exposure of Mice to H₂SO₄ and a Particulate Antigen on the Immune Response and Pulmonary Histopathologic Changes .	456
W. Flückiger, S. Braun, and J. J. Oertli Effect of Air Pollution on Pollen Germination and Tube Growth	457
R. Guggenheim, W. Flückiger, H. Flückiger-Keller, and J. J. Oertli Pollution of Leaf Surfaces in the Vicinity of a Motorway	462
