## Contents

## Part I. Functional Anatomy

## 1 Introduction

1.1	The Subject						3
1.2	Hierarchy: A Concept of Ordered Relations				•		5
1.3	Geometry and Dimensions of Cells			•	•		6
1.4	Cell Walls						7
	1.4.1 General Aspects						7
	1.4.2 Pits						8
	1.4.3 Cell-Wall Polymers						10
	1.4.4 Water in Cell Walls						11
	1.4.5 Genesis and Ultrastructure of Cell Walls						12
	1.4.6 Incrustation of Cell Walls				•		16
	1.4.7 Adcrustation of Cell Walls	•			•		16
1.5	The Duality of Spatial Systems Within Plants						
	1.5.1 The Symplasm						
	1.5.2 The Apoplasm						
	1.5.3 Transfer Between Apoplasm and Symplasm						
1.6	The Morphological Classification of Tissues						20
2 Р	Protective Systems — Boundaries						
	Introduction						23
	Dermal Tissues						23
	2.2.1 Shoot Epidermis						24
	2.2.1 Shoot Epiderinis						25
	2.2.1.2 Cuticle and Water Relations						27
	2.2.2 Rhizodermis						28
<b>~</b> 2	Exodermis, Endodermis, and Metacutis						
	Periderm: Phellogen, Phellem, Phelloderm						
2.3	Rhytidome, or Outer Bark	•	• •	•	•	•••	31
	Absorbing Systems General Perspectives						33
J. 1		•	• •	•	•	• •	55

3.2	Structural Aspects of Absorption from Outside the Plant	34
	3.2.1 Embryonal and Cotyledonary Adaptations	34
	3.2.2 Shoot Tissues and Adaptations: Transcuticular Absorption	35
	3.2.3 Root Tissues and Adaptations	36
	3.2.3.1 Rhizodermis and Root Hairs	36
	3.2.3.2 Exodermis and Cortex	38
	3.2.3.3 Mycorrhizal and Cluster (Proteoid) Roots	38
	3.2.3.4 Other Adaptations	41
3.3	Structural Aspects of Internal Absorption and Transfer	42
	3.3.1 Wall Ingrowths and Transfer Cells	42
	3.3.2 Plasmatubules	44
4 S	Supportive Systems	
	Introduction	45
	Organs, Tissues, and Cells as Mechanical Components	45
	Mechanics of Complex Beams: General Consideration	47
	4.3.1 Normal Stresses, Normal Strains, and the Modulus of Elas-	
	ticity	47
	4.3.2 Bending and Stiffness	48
	4.3.3 Shear Stresses and Strains	50
	4.3.4 Buckling and the Slenderness Ratio	51
<u> </u>	Applications of Mechanics to Parenchyma Cells and Tissues	53
4.4	4.4.1 Cell-Wall Tensions and Parenchyma-Tissue Strength	53
	4.4.2 Arrangement of Reinforcing in Cell Walls	55
45	Dynamic Loading and Organ Resilience	57
4.5		57
	4.5.1 Strain Energy	
	4.5.2 Torsions	59
	Growth-Induced Tissue Stresses	60
4.1	Design and Construction Strategies	62
	4.7.1 Cantilever Beams and Stem Taper	62
	4.7.2 Design for Resistance to Buckling	63
	4.7.3 Design for Simultaneous Resistance to Static and Dynamic	
	Loads	64
	Photosynthetic System	
5.1	Structural Aspects of Photosynthetic Function	67
5.2	Alternate Pathways of Carbon Fixation	68
5.3	Structural Implications of Photosynthetic Pathways	71
	5.3.1 Leaf Structure in C3 Plants	72
	5.3.2 Leaf Structure in C4 Plants	74
5.4	CAM and Other Variations	76
5.5	Leaf Structure in Relation to Optical Properties	77
6 9	Storage Systems	
	Storage and Survival	79
	2 General Characteristics of Storage Organs and Tissues	

6.3	Systems that Store Water	. 81
	6.3.1 Water Storage in Vacuoles	
	6.3.2 Water Storage in Living or Dead Cells	. 82
	6.3.3 Water-Storage Systems Based on Mucilage	83
6.4	Systems that Store Elaborated Reserves	
	6.4.1 Storage in Vegetative Organs	. 83
	6.4.2 Storage for a Later Generation	. 85
6.5	Storage in Geophytes	. 87
6.6	Storage Organs of Some Lesser Known Crop Plants	. 87
7 1	Transporting Systems	
		80
	The Phloem: Long-Distance Rapid Transport in the Symplasm	
1.2	7.2.1 Phloem as a Tissue	
	7.2.2 Sieve Elements and Other Phloem Constituents	
	7.2.3 Transport Rates and Capacities	
	7.2.4 Phloem as a Link Between Sources and Sinks	
	7.2.5 Probable Mechanisms of Transport Within Sieve Elements	
73	Non-Phloic Symplasmic Transport	
	The Xylem: Long-Distance Rapid Transport in the Super Apoplasm	
1.4	7.4.1 Tracheary Elements	
	7.4.1.1 General Aspects	
	7.4.1.2 Types of Tracheary Elements; Vessels	
	7.4.2 Primary and Secondary Xylem	101
	7.4.2.1 Protoxylem and Metaxylem	101
	7.4.2.2 Secondary Xylem Systems: Functional Types	103
	7.4.3 Hydrodynamics of Transport in the Xylem	105
	7.4.3.1 Hydraulic Conductivity and Resistance in Tracheary	105
	Elements	105
	7.4.3.2 Motive Forces Driving Flow Through the Xylem	107
	7.4.3.3 Structural Adaptations of Tracheary Elements to	107
	Negative Pressures	110
	7.4.3.4 Embolism: Efficiency Versus Safety in Water	
	Transport	111
	7.4.4 Water Movement Through the Stem: Distribution in the Crown	114
	Primary Vascular Bundles and Rapid Long-Distance Transport Routes .	115
7.6	Structure in Relation to Transport Within Leaves	116
	7.6.1 General Perspectives	116
	7.6.2 Vascular Pathways in Leaves of Dicots	116
	7.6.3 Vascular Pathways in Leaves of Gymnosperms	119
	7.6.4 Nonvascular Routes of Translocation in Leaves	120
8 S	ecretory and Excretory Systems	
	Distinguishing Secretion from Excretion in Plants	123
	Deposition in Dead Cells, Tissues, and Organs	124
	General Aspects of Secretion	124

8.4 Structures of Exosecretion	125
8.4.1 Hydathodes and Glands Secreting Aqueous Solutions	125
8.4.2 Salt Glands	127
8.4.3 Nectaries	128
8.4.4 Stinging Emergences	129
8.4.5 Glandular Epidermis	129
8.4.6 The Root Cap as a Secreting Organ	131
8.5 Structures of Endosecretion	131
8.5.1 Diversity of Structures	131
8.5.2 Ducts and Cavities with Merocrine Secretions	131
8.5.3 Ducts and Cavities with Holocrine Endosecretions	133
8.5.4 Lithocysts	134
8.5.5 Oil Cells	134
8.5.6 Laticiferous Systems	134
9 Aerating Systems	
9.1 Introduction	137
9.2 Basic Features	137
9.3 Stomata and Stomatal Function	138
9.4 Stomata, Water Economy, and Photosynthetic Efficiency	140
9.5 Intercellular Space and Respiratory Gas Exchange	141
9.5.1 General Perspectives	141
9.5.2 The Special Significance of Gas Space in Roots and Rhizomes	142
9.5.3 Lenticels	144
	144
10 Movement Systems and Positional Perception	
10 Movement Systems and Positional Perception           10.1 The Phenomenology of Movements in Higher Plants	145
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> </ul>	
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> <li>10.2.1 Turgor Movements</li> </ul>	145
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> <li>10.2.1 Turgor Movements</li> <li>10.2.1.1 Seismonastic and Related Movements</li> </ul>	145 147
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells	145 147 147
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells         10.2.2 Growth Movements	145 147 147 147
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells	145 147 147 147 148
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells         10.2.2 Growth Movements         10.2.2.1 Gravitropism	145 147 147 147 147 148 149
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells         10.2.2.1 Gravitropism         10.2.2.2 Phototropism	145 147 147 147 148 149 150
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells         10.2.2 Growth Movements         10.2.2.1 Gravitropism         10.2.2.3 Thigmotropism         10.2.2.4 Nastic Movements	145 147 147 147 148 149 150 151
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells         10.2.2 Growth Movements         10.2.2.1 Gravitropism         10.2.2.3 Thigmotropism         10.2.2.4 Nastic Movements	145 147 147 147 148 149 150 151 152 152
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells         10.2.2 Growth Movements         10.2.2.1 Gravitropism         10.2.2.2 Phototropism         10.2.2.3 Thigmotropism         10.2.2.4 Nastic Movements         10.3 Movements with No Direct Participation of Living Protoplasts	145 147 147 147 148 149 150 151 152 152 153
10 Movement Systems and Positional Perception         10.1 The Phenomenology of Movements in Higher Plants         10.2 Movements Involving Direct Participation of Protoplasts         10.2.1 Turgor Movements         10.2.1.1 Seismonastic and Related Movements         10.2.1.2 Movements of Stomatal Guard Cells         10.2.2 Growth Movements         10.2.2.1 Gravitropism         10.2.2.3 Thigmotropism         10.2.2.4 Nastic Movements	145 147 147 147 148 149 150 151 152 152
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> <li>10.2.1 Turgor Movements</li> <li>10.2.1.1 Seismonastic and Related Movements</li> <li>10.2.1.2 Movements of Stomatal Guard Cells</li> <li>10.2.2 Growth Movements</li> <li>10.2.2.1 Gravitropism</li> <li>10.2.2.2 Phototropism</li> <li>10.2.2.3 Thigmotropism</li> <li>10.2.2.4 Nastic Movements</li> <li>10.3.1 Cohesion Movements</li> <li>10.3.2 Movements Based on Reaction Wood</li> </ul>	145 147 147 147 148 149 150 151 152 152 153 154
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> <li>10.2.1 Turgor Movements</li> <li>10.2.1.1 Seismonastic and Related Movements</li> <li>10.2.1.2 Movements of Stomatal Guard Cells</li> <li>10.2.2 Growth Movements</li> <li>10.2.2.1 Gravitropism</li> <li>10.2.2.2 Phototropism</li> <li>10.2.2.3 Thigmotropism</li> <li>10.2.2.4 Nastic Movements</li> <li>10.3 Movements with No Direct Participation of Living Protoplasts</li> <li>10.3.1 Cohesion Movements</li> <li>10.3.2 Movements Based on Reaction Wood</li> <li>11 Intra-Organismal Communication Systems</li> </ul>	145 147 147 147 148 149 150 151 152 152 153 154
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> <li>10.2.1 Turgor Movements</li> <li>10.2.1.1 Seismonastic and Related Movements</li> <li>10.2.1.2 Movements of Stomatal Guard Cells</li> <li>10.2.2 Growth Movements</li> <li>10.2.2.1 Gravitropism</li> <li>10.2.2.2 Phototropism</li> <li>10.2.2.3 Thigmotropism</li> <li>10.2.2.4 Nastic Movements</li> <li>10.3.1 Cohesion Movements</li> <li>10.3.2 Movements Based on Reaction Wood</li> <li>11 Intra-Organismal Communication Systems</li> <li>11.1 Some Fundamentals</li> </ul>	145 147 147 147 148 149 150 151 152 152 153 154
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> <li>10.2.1 Turgor Movements</li> <li>10.2.1.1 Seismonastic and Related Movements</li> <li>10.2.1.2 Movements of Stomatal Guard Cells</li> <li>10.2.2 Growth Movements</li> <li>10.2.2.2 Phototropism</li> <li>10.2.2.3 Thigmotropism</li> <li>10.2.2.4 Nastic Movements</li> <li>10.3.1 Cohesion Movements</li> <li>10.3.2 Movements Based on Reaction Wood</li> <li>11 Intra-Organismal Communication Systems</li> <li>11.1 Some Fundamentals</li> <li>11.2 Translocation of Substantive Signals</li> </ul>	145 147 147 147 148 149 150 151 152 152 153 154 155
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> <li>10.2.1 Turgor Movements</li> <li>10.2.1.1 Seismonastic and Related Movements</li> <li>10.2.1.2 Movements of Stomatal Guard Cells</li> <li>10.2.2 Growth Movements</li> <li>10.2.2.1 Gravitropism</li> <li>10.2.2.2 Phototropism</li> <li>10.2.2.3 Thigmotropism</li> <li>10.2.2.4 Nastic Movements</li> <li>10.3.1 Cohesion Movements</li> <li>10.3.2 Movements Based on Reaction Wood</li> <li>11 Intra-Organismal Communication Systems</li> <li>11.1 Some Fundamentals</li> <li>11.2 Translocation of Substantive Signals</li> <li>11.3 Rapid Transmission of Nonsubstantive Signals</li> </ul>	145 147 147 147 148 149 150 151 152 152 153 154 155
<ul> <li>10 Movement Systems and Positional Perception</li> <li>10.1 The Phenomenology of Movements in Higher Plants</li> <li>10.2 Movements Involving Direct Participation of Protoplasts</li> <li>10.2.1 Turgor Movements</li> <li>10.2.1.1 Seismonastic and Related Movements</li> <li>10.2.1.2 Movements of Stomatal Guard Cells</li> <li>10.2.2 Growth Movements</li> <li>10.2.2.2 Phototropism</li> <li>10.2.2.3 Thigmotropism</li> <li>10.2.2.4 Nastic Movements</li> <li>10.3.1 Cohesion Movements</li> <li>10.3.2 Movements Based on Reaction Wood</li> <li>11 Intra-Organismal Communication Systems</li> <li>11.1 Some Fundamentals</li> <li>11.2 Translocation of Substantive Signals</li> </ul>	145 147 147 147 147 148 149 150 151 152 152 153 154 155 157

	11.3.3 Mechanical Stresses as Rapidly Transmitted Signals	161
11.4	The Significance of Plasmodesmata in Communication and Integration	163

## Part II Developmental Anatomy

12 Basic Concepts from an Organismal Perspective	
12.1 Introduction	167
12.2 Cellular Aspects of Development	
12.2.1 Cell Division and the Cell Cycle	169
12.2.2 Cytodifferentiation	172
12.2.2.1 Cytodifferentiation and the Cell Cycle	173
12.2.2.2 Unequal Cell Divisions in Differentiation	174
12.2.3 Cell Growth	175
12.2.3.1 General Perspectives	175
12.2.3.2 Symplastic Growth and Intrusive Growth	177
12.3 Patterns of Symplastic Growth at Supracellular Levels	178
12.3.1 Symplastic Growth and Cell Patterns	178
12.3.2 A Description of Symplastic Growth in Terms of a Grow	th
Tensor; Periclines, and Anticlines	180
12.4 Positional Information and Regulatory Factors in Differentiation and	1
Pattern Formation	183
12.4.1 Axiality, Polarity, and Differentiation	
12.4.2 Morphogens, Phytohormones: Their Possible Modes of A	Action 186
12.4.2.1 Auxin Flow and Differentiation	187
12.4.2.2 Gradients of Morphogens	189
12.4.3 Wave Phenomena in Differentiation	189
12.4.4 Cell Lineages, Polyclonal Compartments, and Histogens	193
12.4.5 Differentiation in Relation to Existing Patterns	
12.4.6 The Role of Stresses and Strains in Growth and Develop-	
ment	
13 The Embryo	
13.1 General Developmental Concepts	201
13.1.1 The Scope of the Subject	
13.1.2 The Milieu of Embryogeny: Megagametophytes, Egg Cel	
13.1.2.1 Megagametophytes, Archegonia, and Eggs in C	
nosperms	•
13.1.2.2 Megagametophytes (Embryo Sacs) and Eggs in	
Angiosperms	
13.1.3 Syngamy, Fusion Nuclei, and Zygotes	
13.1.3.1 In Gymnosperms	
13.1.3.2 In Angiosperms	204
13.1.4 Polarities and Symmetries	205
13.2 Proembryogeny in Gymnosperms	
13.2.1 The Conifer Type: A "Basal Plan"	
15.2.1 The Conner Type. A Dasar Flan	207

13.2.2 Suspensor Systems	209
13.2.3 Polyembryony	
13.2.4 The Embryonal Mass	
13.3 Proembryogeny in Angiosperms	211
13.3.1 Orientations and Patterns of Early Cell Divisions	211
13.3.1.1 Segmentation Types and Classification Systems	212
13.3.1.2 Proembryogeny to the Globular Stage	212
13.3.2 Suspensor Systems	
13.3.3 Polyembryony	215
13.4 Late Embryogeny in Gymnosperms	
13.4.1 Embryonic Meristems, Cytohistological Zonation, and Histo-	
genesis	216
13.4.2 Organogenesis: Cotyledons and Root Cap	
13.5 Late Embryogeny in Angiosperms	
13.5.1 Monocot-Dicot Divergence	220
13.5.2 Embryonic Meristems, Cytohistological Zonation, and Histo-	
genesis	
13.5.3 Organogenesis: Cotyledons and Root Cap	222
13.6 Developmental Controls During Embryogeny	223
14 The Primary Shoot: Apex and Caulis	
14.1 The Primary Shoot Meristem	
14.1.1 General Characteristics	
14.1.2 Initial Cells: Their Location and Slow Growth	. 228
14.1.3 Concepts and Terminologies of Shoot Apical Structure and	
Function	. 232
14.1.3.1 Established Perspectives, Based on Origin, Histo-	
genic Function, and Cytohistological Zonation	. 232
14.1.3.2 A Newer Perspective: Structured Versus Stochastic	
Apices	
14.1.4 The Functional Germ Line and Its Protection by Low Mitotic	
Rates	. 236
14.1.5 Shoot Apical Chimeras and Development	
14.1.5.1 Attributes, Definitions, Origins	. 238
14.1.5.2 What Studies of Chimeras Have Revealed About	0.41
Ontogeny	. 241
14.1.6 Theoretical Considerations of Growth Rates and Orientation	
of Cell Division in the Shoot Apex	. 243
14.1.7 Deductions About Apical Structure Based on Surgical and	
Excision Experiments	. 246
14.2 Development of the Primary Shoot Axis	. 246
14.2.1 Formation of Internodes	. 246
14.2.2 Primary Thickening of the Stem	. 248
14.2.3 Monopodial Versus Sympodial Growth	. 250
14.2.4 Formation of Buds	. 251
	. 251

		14.2.4.2 Lateral, or Axillary, Buds	251
		14.2.4.3 Adventitious Buds	253
	14.2.5	Abortion and Senescence of the Shoot Tip	253
14.3	Vasculari	ization of the Primary Shoot	255
	14.3.1	Development of Provascular Strands, Leaf Traces, and Vas-	
		cular Sympodia	255
	14.3.2	Differentiation and Maturation of Primary Phloem and Prim-	
		ary Xylem	258
		14.3.2.1 Protoxylem and Protophloem	259
		14.3.2.2 Metaphloem and Metaxylem	260
	14.3.3	Vascularization of Axillary Buds	261
		Hormonal Regulation of Shoot Vascularization	262
15 T	he Prima	ry Shoot: Phyllotaxy	
15.1	An Appr	oach to Phyllotaxy	263
15.2	Some At	tributes of Phyllotactic Patterns	265
	15.2.1	Decussate, Distichous, and Spiral Patterns; Generative Spirals	265
	15.2.2	Parastichies: Contact and Noncontact	267
