

## CONTENTS

Preface . . . . .	V
List of Contributors . . . . .	VII
Symbols . . . . .	VIII
<b>CHAPTER 1. GENERAL GEOCHEMICAL PROPERTIES AND ABUNDANCES OF THE RARE EARTH ELEMENTS</b>	
P. Henderson	
1.1. Introduction . . . . .	1
1.2. Abundances in the solar system, Sun and Earth . . . . .	3
1.3. Data presentation . . . . .	6
1.4. Oxidation states . . . . .	10
1.5. Element co-ordination and ionic radii . . . . .	14
1.6. Element substitution and partition . . . . .	17
1.7. Geochemical reference literature . . . . .	28
References . . . . .	29
<b>CHAPTER 2. MINERALOGY OF THE RARE EARTH ELEMENTS</b>	
A.M. Clark	
2.1. Introduction . . . . .	33
2.2. Halides . . . . .	38
2.3. Carbonates . . . . .	39
2.4. Carbonates with fluoride . . . . .	40
2.5. Oxides . . . . .	41
2.6. Borate . . . . .	45
2.7. Silicates . . . . .	45
2.8. Silicates with other anions . . . . .	51
2.9. Phosphates . . . . .	51
2.10. Arsenates . . . . .	54
2.11. Sulphate . . . . .	54
References . . . . .	54
<b>CHAPTER 3. COSMOCHEMISTRY OF THE RARE EARTH ELEMENTS: METEORITE STUDIES</b>	
W.V. Boynton	
3.1. Introduction . . . . .	63
3.2. Condensation theory . . . . .	65
3.3. REE abundances in Ca, Al-rich inclusions . . . . .	71
3.4. REE in other components of chondrites . . . . .	86
3.5. Whole-rock chondrite analyses . . . . .	89
3.6. Analyses of achondrites . . . . .	94

3.7. REE in other differentiated meteorites . . . . .	103
3.8. Summary of REE cosmochemistry and future directions . . . . .	106
References . . . . .	107
CHAPTER 4. PETROGENETIC MODELLING — USE OF RARE EARTH ELEMENTS L.A. Haskin	
4.1. Introduction. . . . .	115
4.2. Modelling of separation processes . . . . .	117
4.3. Simple chemical partitioning — the Nernst $D$ . . . . .	118
4.4. Equilibrium melting and crystallization . . . . .	122
4.5. Fractional crystallization: continuous removal of crystals . . . . .	128
4.6. Fractional crystallization: crystal zoning-surface equilibrium . . . . .	133
4.7. Incremental partial melting . . . . .	138
4.8. Zone melting . . . . .	140
4.9. Extraction . . . . .	142
4.10. Mixing. . . . .	145
4.11. References to combined models, and other comments . . . . .	145
References . . . . .	148
CHAPTER 5. RARE EARTH ELEMENT ABUNDANCES IN UPPER MANTLE ROCKS F.A. Frey	
5.1. Introduction. . . . .	153
5.2. Alpine peridotites . . . . .	154
5.3. Ultramafics associated with ophiolites. . . . .	166
5.4. Ocean floor peridotites. . . . .	170
5.5. Ultramafic inclusions in basalts and kimberlites. . . . .	176
5.6. Implications of REE data for upper mantle composition and upper mantle processes . . . . .	192
References . . . . .	196
CHAPTER 6. THE RARE EARTH ELEMENT CHARACTERISTICS OF IGNEOUS ROCKS FROM THE OCEAN BASINS A.D. Saunders	
6.1. Introduction. . . . .	205
6.2. History of research . . . . .	206
6.3. Ocean ridge basalts . . . . .	208
6.4. Ocean islands . . . . .	214
6.5. Ocean plateau volcanism. . . . .	220
6.6. Factors controlling the distribution of REE in oceanic basalts . . . . .	222
6.7. Summary and conclusions. . . . .	229
References . . . . .	231
CHAPTER 7. RARE EARTH ELEMENTS IN IGNEOUS ROCKS OF THE CONTINENTAL CRUST: PREDOMINANTLY BASIC AND ULTRABASIC ROCKS R.L. Cullers and J.L. Graf	
7.1. Introduction. . . . .	237
7.2. Kimberlite . . . . .	239
7.3. Carbonatites and associated alkalic silicate rocks . . . . .	243
7.4. Lamprophyres . . . . .	249

7.5. Komatiites and associated basic rocks . . . . .	251
7.6. Alkaline mafic rocks and associated intermediate and felsic rocks . . . . .	254
7.7. Tholeiitic basalts — continental, back-arc basins and island arcs . . . . .	262
7.8. Summary . . . . .	267
References . . . . .	268

CHAPTER 8. RARE EARTH ELEMENTS IN IGNEOUS ROCKS OF THE CONTINENTAL CRUST: INTERMEDIATE AND SILICIC ROCKS — ORE PETROGENESIS  
R.L. Cullers and J.L. Graf

8.1. Introduction . . . . .	275
8.2. Andesites and associated rocks . . . . .	276
8.3. Anorthosites and associated jotunites, mangerites, and charnockites . . . . .	281
8.4. Granitic rocks — quartz diorite, tonalite, granodiorite, and trondhjemite . . . . .	285
8.5. Granitic rocks — monzogranites and syenogranites . . . . .	293
8.6. REE in hydrothermal systems . . . . .	301
8.7. Summary . . . . .	306
References . . . . .	308

CHAPTER 9. THE MOBILITY OF THE RARE EARTH ELEMENTS IN THE CRUST  
Susan E. Humphris

9.1. Introduction . . . . .	317
9.2. Factors affecting the degree of mobility of the REE . . . . .	318
9.3. Igneous crystallization history — the distribution of REE in the unaltered rock and their susceptibility to weathering and alteration . . . . .	319
9.4. The fluid phase . . . . .	322
9.5. Uptake of the REE by secondary minerals . . . . .	334
9.6. Conclusions . . . . .	337
References . . . . .	340

CHAPTER 10. AQUEOUS AND SEDIMENTARY GEOCHEMISTRY OF THE RARE EARTH ELEMENTS  
A.J. Fleet

10.1. Introduction . . . . .	343
10.2. Weathering and transport . . . . .	346
10.3. The marine environment . . . . .	350
10.4. REE contents of sediments and sedimentary rocks . . . . .	365
10.5. Diagenesis . . . . .	367
References . . . . .	369

CHAPTER 11. RADIOGENIC ISOTOPES — SOME GEOLOGICAL APPLICATIONS  
C.J. Hawkesworth and P.W.C. van Calsteren

11.1. Introduction . . . . .	375
11.2. Radioactive decay . . . . .	376
11.3. Geochronology — the dating of rocks and minerals . . . . .	379
11.4. Model Nd, or $T_{CHUR}^{Nd}$ ages . . . . .	383
11.5. Isotopes as tracers in petrogenesis . . . . .	388
11.6. Isotope variations in seawater . . . . .	405
11.7. Models for the evolution of the Earth's crust and mantle . . . . .	408
11.8. Lu-Hf isotopes . . . . .	411
11.9. Concluding remarks . . . . .	413

## XII

Appendix . . . . .	414
References . . . . .	416
<b>CHAPTER 12. THE ECONOMIC IMPORTANCE OF THE RARE EARTH ELEMENTS</b>	
C.R. Neary and D.E. Highley	
12.1. Introduction. . . . .	423
12.2. Abundance and ore mineralogy . . . . .	424
12.3. Geological characteristics of the deposits . . . . .	424
12.4. World reserves and resources . . . . .	436
12.5. Mining, mineral processing, extraction and separation. . . . .	438
12.6. Historical production and demand . . . . .	443
12.7. Current uses . . . . .	447
12.8. Use development. . . . .	460
References . . . . .	461
<b>CHAPTER 13 ANALYTICAL CHEMISTRY</b>	
P. Henderson and R.J. Pankhurst	
13.1. Introduction. . . . .	467
13.2. Neutron activation analysis . . . . .	468
13.3. Mass-spectrometric isotope dilution analysis . . . . .	478
13.4. Inductively coupled plasma emission spectrometry . . . . .	488
13.5. Other methods . . . . .	491
13.6. Concluding statement. . . . .	494
References . . . . .	495
Subject Index. . . . .	501
