Preface	vii
CHAPTER 1 – Software Development Methodologies and Metamodelling	1
1.1 What is a Methodology?	2
1.2 Metamodelling Needs	11
1.3 What is Metamodelling?	17
1.4 Summary	18
References	19
CHAPTER 2 – Modelling Infrastructure	21
2.1 Models and Modelling	21
2.2 Modelling Languages	26
2.3 Categorization Issues	36
2.4 The Relationship Between Models and Metamodels	42
2.5 Infrastructure	44
2.6 Summary	48
References	48
CHAPTER 3 – Using Metamodels	53
3.1 Metamodelling for Modelling Languages	53
3.2 Metamodelling for Processes	58
3.3 Metamodelling for Development Methodologies	62
3.4 Metamodelling for Model Transformation	65
3.5 Using a Metamodelling Infrastructure	68
3.6 Summary	72
References	72
CHAPTER 4 – Problems with Traditional Approaches and Current Products	75
4.1 Terminology and Culture Clashes	76
4.2 Linguistic and Ontological Metamodels	79
4.3 Process and Modelling Conflicts	83
4.4 The Quality Aspect	95
4.5 Solutions and Guidelines	104
4.6 Summary	106
References	106

CONTENTS

CHAPTER 5 – New Approaches to Metamodelling	111
5.1 Deep Instantiation-Based Metamodelling	112
5.2 Powertype-Based Metamodelling	114
5.3 Comparison of Powertype Modelling and Potency	126
5.4 Summary	129
References	130
CHAPTER 6 – Software Engineering Metamodel for Development Methodologies	133
6.1 General Philosophy and Scope	133
6.2 High-Level View	141
6.3 Process Aspects	144
6.4 Modelling Aspects – Product Classes	148
6.5 People Aspects – Producer Classes	151
6.6 Linking Process and Product Aspects	153
6.7 Support Classes	154
6.8 Classes in ISO/IEC 24744	155
6.9 Extending the ISO/IEC 24744 Metamodel	157
6.10 Summary	161
References	161
CHAPTER 7 – Creating and Using a Methodology Generated from the Metamodel	163
7.1 Creating a Powertype-Based Methodology from its Metamodel	165
7.2 The Endeavour Domain	175
7.3 Summary	178
References	179
APPENDIX – Proposed Notation for ISO/IEC 24744	181
Index	203
