Contributors
Foreword by Peter J. Grubb
Preface
Acknowledgments

Part I | Introduction

Chapter 1 | Why seedlings?

Mary Allessio Leck, Robert L. Simpson, and V. Thomas Parker

1.1 Seedlings as part of a plant’s life cycle
1.2 Vulnerabilities and bottlenecks
1.3 Making it: filters, safe sites, and establishment
1.4 Seedlings: a primer
1.5 What seedlings can tell us
1.6 The scope of Seedling Ecology and Evolution

Part II | Seedling diversity

Chapter 2 | Seedling natural history

Mary Allessio Leck and Heather A. Outred

2.1 Introduction
2.2 The seedling stage and fate of seedlings
2.3 Seedling types
2.4 Seedling diversity – morphology
2.5 Seedling diversity – ecophysiology
2.6 Vivipary and seedling equivalents
2.7 Longevity
2.8 Dispersal
2.9 Environmental filters and safe sites
2.10 Summary
2.11 Acknowledgments
Appendixes

Chapter 3 | Specialized seedling strategies I: seedlings in stressful environments

José M. Facelli

3.1 Introduction
3.2 Seedling establishment in dense shade
3.3 Effects of litter on seedling establishment
3.4 Seedling establishment in dry environments
3.5 Seedling establishment in saline environments
10.2 The trade-off between offspring production and seedling survival 218
10.3 Understanding seed and seedling ecology as parts of a plant’s life history strategy 227
10.4 Correlations between seed and seedling strategy and other aspects of plant ecology 229
10.5 Seed and seedling strategies within species 232
10.6 Implications of a holistic understanding of plant life history strategies 235
10.7 Conclusions 237

Chapter 11 Seedling recruitment and population ecology 239
Ove Eriksson and Johan Ehrlén
11.1 Introduction 239
11.2 The causes of seedling mortality 241
11.3 Recruitment limitation 245
11.4 Seedling recruitment and population dynamics 248
11.5 Genetic structure and selection in seedling populations 251
11.6 Concluding remarks 254
11.7 Acknowledgments 254

Chapter 12 Seedling communities 255
Jon E. Keeley and Phillip J. van Mantgem
12.1 Introduction 255
12.2 Internal drivers 255
12.3 External drivers affecting seedling communities 265
12.4 Seedling community assembly rules 269
12.5 Conclusions 273

Chapter 13 Spatial variation in seedling emergence and establishment – functional groups among and within habitats? 274
Johannes Kollmann
13.1 Introduction 274
13.2 Description of the seedling stage 276
13.3 Definition of spatial scales 279
13.4 Microhabitat effects on seedling dynamics 280
13.5 Habitat effects on seedling dynamics 282
13.6 Landscape effects on seedling dynamics 285
13.7 Region effects on seedling dynamics 286
13.8 Biome effects on seedling dynamics: seed size and seedling survival 287
13.9 Synthesis 289
13.10 Acknowledgments 292
Part V | Applications

Chapter 14 | Does seedling ecology matter for biological invasions? | 295
Laura A. Hyatt

14.1 Introduction | 295
14.2 Invasive seedlings | 296
14.3 Invasive effects on native seedlings | 303
14.4 Conclusions | 305
14.5 Acknowledgments | 306

Chapter 15 | The role of seedlings in the dynamics of dryland ecosystems – their response to and involvement in dryland heterogeneity, degradation, and restoration | 307
Bertrand Boeken

15.1 Introduction | 307
15.2 Importance of the seedling stage | 308
15.3 Seedlings and spatial heterogeneity of drylands | 312
15.4 Seedlings and dryland system degradation | 322
15.5 Conclusions | 330

Chapter 16 | Anthropogenic disturbance in tropical forests: toward a functional understanding of seedling responses | 332
James W. Dalling and David F. R. P. Burslem

16.1 Introduction | 332
16.2 Significance of the seedling stage for forest management | 334
16.3 Effects of human disturbances on seedling regeneration | 335
16.4 Application of seedling functional ecology to tropical forest management and restoration | 341
16.5 Future directions | 349
16.6 Acknowledgments | 351

Chapter 17 | Seedling establishment in restored ecosystems | 352
Susan Galatowitsch

17.1 Introduction | 352
17.2 Selecting initial community composition for restoration | 353
17.3 Creating safe sites to promote seedling establishment | 359
17.4 Managing biotic interactions that affect seedling survival and growth | 364
Part VI | Synthesis

Chapter 18 | The seedling in an ecological and evolutionary context

V. Thomas Parker, Robert L. Simpson, and Mary Allessio Leck

18.1 Introduction
18.2 Dispersal, seed bank dynamics, and seedling banks
18.3 Dynamics of individual seedlings
18.4 Seedlings in heterogeneous environments
18.5 Alternative strategies
18.6 Conclusions
