

## CONTENTS

<i>Acknowledgements</i> .....	VI
<i>Preface</i> .....	VII
<i>Abbreviations</i> .....	VIII
<b>Part 1 INTRODUCTION</b> .....	<b>1</b>
1.1 Atmospheric N <sub>2</sub> .....	1
1.2 Non-Biological Forms of N <sub>2</sub> Fixation .....	1
1.3 Biological Forms of N <sub>2</sub> Fixation .....	4
1.4 N <sub>2</sub> Fixation in Natural Ecosystems .....	10
1.5 N <sub>2</sub> Fixation in Forestry and Recultivation .....	12
1.6 N <sub>2</sub> Fixation in Agriculture .....	14
<b>Part 2 N<sub>2</sub> FIXATION OF THE LEGUMINOSAE</b> .....	<b>16</b>
2.1 The Microsymbiont .....	16
2.1.1 Introduction .....	16
2.1.2 Surface Properties .....	18
2.1.3 Effectivity of Rhizobia and Survival in the Soil .....	20
2.2 The Macrosymbiont .....	26
2.3 Nodulation .....	29
2.3.1 Recognition and Attachment of Rhizobia .....	31
2.3.2 Root Infection .....	36
2.3.3 Autoregulation .....	50
2.4 Different Forms of Nodules .....	53
2.4.1 Determinate Nodules .....	56
2.4.2 Indeterminate Nodules .....	59
2.5 Metabolism of N <sub>2</sub> Fixation .....	60
2.5.1 The Enzyme Nitrogenase .....	60
2.5.2 H <sub>2</sub> Production .....	64
2.5.3 The Oxygen Paradox .....	66
2.5.3.1 Endosymbiont Controlled Regulatory Mechanisms .....	68
2.5.3.2 Physiological Adaptations of the Host .....	70
2.5.3.3 Morphological Adaptations of the Host .....	74
2.5.4 Ammonia Assimilation .....	76

2.6 Influence of the Environment.....	79
2.6.1 Nutrient Requirements .....	80
2.6.2 Soil pH.....	89
2.6.3 Temperature.....	91
2.6.4 Soil Moisture .....	92
2.6.5. Salinity.....	95
2.6.6 Presence of Compatible Rhizobia.....	96

### **Part 3 ASSESSMENT TECHNIQUES FOR N<sub>2</sub> FIXATION..... 98**

3.1 Introduction .....	98
3.2 Direct Methods .....	100
3.2.1 Stable Isotope Techniques .....	100
3.2.1.1 Methodology for <sup>15</sup> N Analyses.....	100
3.2.1.2 Utilisation of <sup>15</sup> N <sub>2</sub> .....	102
3.2.1.3 <sup>15</sup> N Dilution Measurements .....	103
3.2.1.4 <sup>15</sup> N Natural Abundance Measurements.....	109
3.2.2 The Nitrogen-Difference Method.....	115
3.2.2.1 Basis of the Technique .....	115
3.2.2.2 Applicability .....	115
3.3 Indirect Methods.....	117
3.3.1 Xylem Solute Technique .....	117
3.3.1.1 The Principle Behind the Technique.....	117
3.3.1.2 Collection of N-Solutes .....	124
3.3.1.3 Advantages and Drawbacks of the Xylem Sap Technique .....	126
3.3.2 The Acetylene Reduction Assay.....	128
3.3.2.1 Introduction .....	128
3.3.2.2 The Principle Behind the Technique.....	128
3.3.2.3 Analysis of Ethylene by Gas Chromatography .....	131
3.3.2.4 Incubation Techniques .....	132
3.3.2.5 Calibrations of Acetylene Reduction Assays.....	136
3.3.2.6 Merits and Problems of Acetylene Reduction Assays.....	138

3.3.2.7 Alternative Procedures to Measure N <sub>2</sub>	
Fixation.....	139
3.3.2.8 Conclusions.....	141
<b>Part 4 SUPERNODULATING LEGUMES.....</b>	<b>144</b>
4.1 Introduction.....	144
4.2 General Characteristics.....	146
4.3 Symbiotic Performance and the Effect of Nitrate.....	149
4.4 Carbon and Nitrogen Metabolism.....	154
4.4.1 Introduction.....	154
4.4.2 Nodules as Sinks for Carbon and Nitrogen.....	155
4.4.3 The Significance of Recently Fixed Carbon.....	159
4.4.4 Effects of Irradiance.....	162
4.4.5 Does Fruit Production Affect N <sub>2</sub> Fixation?.....	163
4.4.6 Agricultural Value of the Supernodulation	
Character.....	165
<b>Part 5 MEANS TO IMPROVE N<sub>2</sub> FIXATION.....</b>	<b>167</b>
5.1 Introduction.....	167
5.2 Current Approaches.....	168
5.2.1 General Aspects.....	168
5.2.2 Inoculant Production.....	170
5.2.3 Types of Inoculant and their Application.....	171
5.2.4 How Successful Can Inoculation be in the Field?.....	174
5.2.5 Production of Superior Rhizobia.....	175
5.2.6 Production of Superior Legumes.....	176
5.2.7 Environmental Limitations.....	179
5.3 Potential for Future Benefits.....	181
5.3.1 Common Considerations.....	181
5.3.2 Future Research Priorities.....	182
<i>References</i> .....	186
<i>Subject Index</i> .....	240
<i>Appendices</i> .....	246
Appendix 1.....	246
Appendix 2.....	247
Appendix 3.....	248
