Foreword VI

Preface to the Third Edition XI

Abbreviations XIII

1	Synthesis of Carbon Chains	1
1.1	Introduction	1
1.2	Functional Group Arrangements	3
1.3	Umpolung	6
1.4	Alcohols	6
1.5	Synthesis of Alkenes and their Coupling Reactions	13
1.6	Aldehydes, Ketones, and Carboxylic Acids	36
1.7	1,2-Difunctional Compounds	40
1.8	1,3-Difunctional Compounds	43
1.9	1,4-Difunctional Compounds	54
1.10	1,5-Difunctional Compounds	62
1.11	1,6-Difunctional Compounds	64
2	Carbocycles	69
2.1	Introduction	69
2.2	Radicals	70
2.3	Ring Closing Metathesis	73
2.4	Macrocyclization	76
2.5	Cyclopropane and Cyclopropene Derivatives	82
2.6	Cyclobutane Derivatives	87
2.7	Cyclopentane Derivatives	91
2.7.1	Prostaglandins	105
2.8	Cyclohexane and Cyclohexene Derivatives	111
2.8.1	Steroids	123
2.9	Bridged Carbocycles	133

3	Functional Group Interconversion (FGI)	137
3.1	Introduction	137
3.2	Reduction	138
3.2.1	General Considerations	138
3.2.2	Hydrogenation of Carbon–Carbon Multiple Bonds and Cyclopropane Rings	143
3.2.3	Reduction of Aldehydes, Ketones, and Carboxylic Acid Derivatives	150
3.2.4	Reduction of Nitrogen Compounds	160
3.2.5	Reductive Cleavage of Carbon–Heteroatom and Heteroatom–Oxygen Bonds	163
3.3	Oxidation	165
3.3.1	General Considerations	165
3.3.2	Oxidation of Non-Functional Carbon Atoms	167
3.3.3	Oxidation of Carbon Atoms in Carbon–Carbon Multiple Bonds	172
3.3.4	Oxidation of Alcohols to Aldehydes, Ketones, and Carboxylic Acids	186
3.3.5	Oxidative Rearrangement and Cleavage of Ketones and Aldehydes	190
3.3.6	Olefin Syntheses by Dehydrogenation and Other Elimination Reactions	192
3.4	Synthesis of Carboxylic Acid Derivatives	197
3.5	Ethers	201
3.6	Phosphonates	204
3.7	Sulfides and Sulfonates	205
3.8	Halides	206
3.9	Protection of Functional Groups	208
3.9.1	Reactive Carbon–Hydrogen and Carbon–Carbon Bonds	209
3.9.2	Alcoholic Hydroxyl Groups	212
3.9.3	Amino Groups and Thiols	218
3.9.4	Carboxyl Groups	222
3.9.5	Aldehyde and Keto Groups	222
3.9.6	Phosphate Groups	224
4	Heterocycles and Arenes	225
4.1	Introduction	225
4.2	Nitrogen-Containing Heterocycles and Arenes in Drugs	225
4.3	Lactones (Oxetanones) and Lactams (Azetidiones)	252
4.4	Porphyryns, Chlorophyll <i>a</i> , and Corrinns	269
4.5	Alkaloids	291
4.6	Self-Reproduction of Chirality	300
4.7	Monosaccharides and Protected Derivatives	301
5	Biopolymers and Dendrimers	309
5.1	Introduction	309
5.2	Oligonucleotides	309
5.3	Peptides	325
5.3.1	Stages of Peptide Synthesis	325

5.4	Di- and Oligosaccharide Syntheses	344
5.5	Dendrimers	357
6	Combinatorial Mixtures and Selection	359
6.1	Introduction	359
6.2	The Split Method and Multicomponent Reactions	360
6.3	Coding	364
6.4	Libraries for Different Purposes	367
6.4.1	Ligands for Metal Ions	368
6.4.2	Catalysts	369
6.4.3	Proteins	373
6.4.4	Nucleic Acids	380
6.4.5	Heterocycles	382
6.4.6	Carbocycles	386
6.4.7	Chiral Compounds	387
7	Concepts in Nanometer-Sized Skeletons and Modules	389
7.1	Introduction	389
7.2	Nucleic Acids	390
7.2.1	DNA with a Site-Specifically, Covalently Bound Mutagen	390
7.2.2	Cationic Oligonucleotides	392
7.2.3	A Synthetic Scissor for Sequence-Specific DNA Cleavage	392
7.2.4	Hexose Oligonucleotides	394
7.2.5	DNA Helicates with a Central Copper(I) Ion Wire	395
7.3	Kemp's Acid: Enzyme-Cleft and Self-Replication Models	395
7.3.1	Enzyme-Cleft Models with Convergent Functional Groups	396
7.3.2	A Synthetic Self-Replicating System	397
7.4	Covalent and Non-Covalent Porphyrin Assemblies	398
7.5	Molecular Assemblies of Amphiphiles	400
7.5.1	Vesicle Membranes	401
7.5.2	Helical Micellar Fibers	402
7.6	Capsules	404
7.7	Fullerenes and Carbon Rods	406
7.8	Rotaxanes and Catenanes	408
8	The Internet and the Feedstock	413
8.1	Introduction	413
8.2	Starting Materials	413
8.3	Literature Search	416
8.3.1	Science Finder Scholar (Chemical Abstract Service, CAS)	417
8.3.2	American Chemical Society (ACS)	418
8.3.3	European Journals	420
8.3.4	Organic Chemistry Handbooks	421
8.4	Feedstock	421

9	Retrosynthetic Analysis, Sketches of Syntheses, Tandem Reactions and Green Chemistry 425
9.1	Introduction 425
9.2	Elementary Retrosynthetic Analysis 425
9.2.1	Open-chain Compounds 429
9.2.2	Mono- and Bicyclic Target Molecules 441
9.2.3	Bridged Polycyclic Molecules 446
9.2.4	Summary of Antithetical Analysis of Simple Molecules 448
9.3	Learning from Research Papers 448
9.4	Tandem Reactions 456
9.5	Green Chemistry 458
10	Seventy-Seven Conclusions in Alphabetical Order 461
10.1	Introduction 461
10.2	Conclusions in Alphabetical Order 461
11	References 469
	Subject Index 505
