Motto	V
Preface	VII
List of Symbols	IX
Symbols for Languages	IX
Symbols for Chemical Structures	IX
Prefixes of Words	IX
Quantity Symbols	X
Table of Contents	XIII
1 Introduction	1
Literature to Chapter 1	5
2 Structure and Properties of Polymers	7
2.1 Chemical Structure	7
2.1.1 Fundamental Terms	7
2.1.2 Names of Polymers	8
2.1.3 Constitution	9
Structure-related Terms	9
Process-related Terms	12
Molecular Weights	12
2.1.4 Configuration	15
2.2 Physical Structure	17
2.2.1 Microconformations	17
2.2.2 Macroconformations	18
2.2.3 Morphology of Solid Polymers	19
2.2.4 Structure in Solutions, Melts, and Glasses	20
2.3 Physical Properties	21
2.3.1 Thermal Properties	22
2.3.2 Mechanical Properties	23
2.3.3 Electrical Properties	24
2.3.4 Other Properties	24
Literature to Chapter 2	24
Reference to Chapter 2	24
3 Raw Materials and Energy	25
3.1 Feedstocks	25
3.1.1 Natural Raw Materials	25
3.1.2 Fossil Feedstocks	26
3.2 Energy	29
3.2.1 Physical Units for Energy	29
3.2.2 Energy Production	30

3.2.3	Energy Consumption	32
3.2.4	Range of Fossil Fuels	34
3.2.5	Ecology	36
3.2.6	Non-Fossil Energy Sources	38
3.3	Coals	40
3.3.1	Chemical Structure of Coals	40
3.3.2	Coal Production and Reserves	41
3.3.3	Coals as Raw Materials	43
3.4	Oil	45
3.4.1	Crude Oil	45
	Occurrence	45
	Production and Reserves	46
3.4.2	Petroleum Processing	49
	Refineries	50
	Distillation	51
	Refining	53
	Treating	53
3.4.3	Petrochemistry	54
3.5	Kerogens and Bituminous Substances	57
3.5.1	Oil Shale	57
3.5.2	Tar Sands	57
3.5.3	Bitumens and Asphalts	58
3.6	Natural Gas	60
3.6.1	Composition	60
3.6.2	Production, Consumption, and Reserves	60
3.7	Wood	64
3.7.1	General Aspects	64
	Structure	64
	Growth, Production, and Consumption	65
3.7.2	Natural Wood	67
3.7.3	Pressurized Wood	69
3.7.4	Plywood and Veneer	69
3.7.5	Polymer Wood	70
3.7.6	Plasticized Wood	71
3.7.7	Mechanical Pulp	71
3.7.8	Chemical Pulp	72
3.7.9	Wood Gasification	74
3.7.10	Wood Saccharification	75
3.7.11	Bioethanol and Sundiesel	75
3.8	Lignins	77
3.9	Natural Resins	78
3.10	Natural Oils and Biomass	80
	Literature to Chapter 3	83
	References to Chapter 3	85
4	Base Chemicals, Intermediates, and Monomers	87

4.1	Base Chemicals	87
4.1.1	Survey	87
4.1.2	From Feedstocks and Base Chemicals to Polymers	88
4.1.3	Synthesis Gas	89
	Definitions	89
	Syngas from Coke	90
	Syngas from Natural Gas, Crude Oil, and Naphtha	91
	Uses of Syngas	91
4.1.4	Carbon Monoxide	92
4.1.5	Hydrogen	92
4.2	C ₁ Compounds	93
4.2.1	Methane	93
4.2.2	Methanol	94
4.2.3	Formaldehyde	95
4.2.4	Formic acid	96
4.2.5	Hydrogen Cyanide	96
4.3	C ₂ Compounds	98
4.3.1	Ethane	98
4.3.2	Ethene	99
4.3.3	Ethyne	103
4.3.4	Ethanol	105
4.3.5	Acetaldehyde	106
4.3.6	Acetic Acid	106
4.4	C ₃ Compounds	106
4.4.1	Propene	106
4.4.2	Isopropanol and Acetone	110
4.5	C ₄ Compounds	110
4.5.1	1,3-Butadiene	111
4.5.2	Butane	115
4.5.3	Butenes	115
4.5.4	Isobutene	115
4.6	C ₅ Compounds	117
4.6.1	Isoprene	117
4.6.2	Cyclopentadiene	117
4.7	Aromatics	118
4.7.1	Sources and Syntheses	118
	Coal as Feedstock	119
	Crude Oil as Feedstock	119
4.7.2	Benzene	120
4.7.3	Phenol	122
4.7.4	Toluene	124
4.7.5	Higher Aromatics	126
4.8	Cycloaliphatics	127
4.8.1	Adipic Acid	127
4.8.2	1,6-Hexamethylenediamine	128
4.8.3	ϵ -Caprolactam	128

A 4	Appendix: Characterization of Reactions	130
	Literature to Chapter 4	132
	Reference to Chapter 4	132
5	Polymerization Processes	133
5.1	Types of Polymerization	133
5.1.1	Monomers for Polymers	133
5.1.2	Classification of Polymerizations	134
5.1.3	Thermodynamic Requirements	140
5.1.4	Elementary Reactions	140
5.1.5	Polycondensations and Polyadditions	143
	Linear Equilibrium Reactions	143
	Multifunctional Equilibrium Reactions	144
	Kinetically Controlled Reactions	145
5.1.6	Ionic Chain Polymerizations	145
5.1.7	Insertion Polymerizations	147
5.1.8	Free-Radical Polymerizations	148
	Initiation	149
	Propagation and Termination	150
5.1.9	Copolymerizations	152
5.1.10	Polymer Transformations	154
5.2	Industrial Polymer Productions	155
5.2.1	Overview	155
5.2.2	Two-Phase Systems	156
5.2.3	Bulk Polymerizations	157
5.2.4	Suspension Polymerizations	158
5.2.5	Emulsion Polymerizations	160
	Phenomena	160
	Types of Emulsion Polymerizations	162
	Processes in Direct Macroemulsion Polymerizations	165
	Rates of Polymerization	167
	Formation of Latex Particles	169
	Properties of Emulsion Polymers	170
5.2.6	Solution Polymerizations	171
5.2.7	Precipitation Polymerizations	172
5.2.8	Gas-Phase Polymerizations	174
5.3	Polymerization Reactors	176
5.3.1	Viscosities	176
5.3.2	Types of Reactors	178
	Ideal Reactors	178
	Batch Reactors (BR)	180
	Continuous Stirred Tank Reactors (CSTR)	181
	Continuous Plug Flow Reactors (CPFR)	182
	Cascades	182
	Operation of Reactors	183
5.3.3	Agitators	185

	Types	185
	Power of Agitators	186
5.3.4	Segregated Reactors	187
5.4	Work-up of Polymers	191
5.5	Economic Aspects	192
5.5.1	Energy Consumption	192
5.5.2	Capacities	193
5.5.3	Prices	193
5.5.4	Economy of Scale	195
	Historical Notes on Emulsion Polymerization	196
	Literature to Chapter 5	197
	References to Chapter 5	199
6	Carbon Chains	201
6.1	Carbons	201
6.1.1	Diamonds	201
	Natural Diamonds	202
	Synthetic Diamonds	202
6.1.2	Diamondoids	204
6.1.3	Graphite	205
6.1.4	Fullerenes	206
6.1.5	Nanotubes	208
6.1.6	Carbon and Graphite Fibers	209
6.1.7	Glass Carbon	211
6.1.8	Nanofoams	211
6.1.9	Carbon Black	211
	Manufacture	212
	Structure and Properties	212
6.1.10	Charcoal	213
6.1.11	Activated Carbon	214
6.2	Poly(olefin)s	214
6.2.1	Definitions	214
6.2.2	Poly(methylene)	215
6.2.3	Poly(ethylene)s	215
	Natural Poly(ethylene)	215
	Types of Industrial Poly(ethylene)s	216
	Low-Density Poly(ethylene)s (LDPE, PE-LD)	218
	High-Density Poly(ethylene)s HDPE, PE-HD)	222
	Linear Low-Density Poly(ethylene)s (LLDPE, PE-LLD) ..	224
	Very Low-Density Poly(ethylene)s (VLDPE, PE-VLD) ...	225
	Metallocene-Poly(ethylene)s (mLLDPE)	225
	Properties of Poly(ethylene)s	226
6.2.4	Modified Poly(ethylene)s	228
6.2.5	Ethene Copolymers	229
	Copolymers with 1-Olefins or Dienes	229
	Copolymers with Vinyl Monomers	230

	Copolymers with Acrylic Monomers	231
6.2.6	Poly(propylene)	232
	History	232
	Isotactic Poly(propylene)s by Transition Metal Catalysts	232
	Metallocene Poly(propylene)s	236
	Atactic Poly(propylene)s	236
	Syndiotactic Poly(propylene)s	237
	Copolymer with Carbon Monoxide	237
6.2.7	Poly(1-butene)	238
6.2.8	Poly(4-methyl-1-pentene)	239
6.2.9	Higher Poly(1-olefins)	239
6.2.10	Poly(isobutylene)s	239
6.3	Poly(diene)s	241
6.3.1	Overview	241
6.3.2	Poly(butadiene)s	242
	Anionic Polymerizations	242
	Alfin Polymerizations	243
	Free-Radical Polymerizations with Styrene	244
	Free-Radical Polymerizations with Acrylonitrile	244
	Ziegler-Natta Polymerizations	245
6.3.3	Poly(isoprene)s	246
	Natural Poly(isoprene)s	246
	Synthetic Poly(isoprene)s	247
	Derivatives of Poly(isoprene)s	249
6.3.4	Poly(2,3-dimethylbutadiene)	250
6.3.5	Poly(chloroprene)	250
6.4	Poly(cycloolefins) and Poly(cyclodiolefin)s	252
6.4.1	Overview	252
6.4.2	Poly(pentenamer)	253
6.4.3	Poly(octenamer)	253
6.4.4	Norbornene Polymers	253
6.4.5	Cycloolefin Copolymers	254
6.4.6	Poly(dicyclopentadiene)	255
6.5	Acetylene Polymers	256
6.5.1	Poly(acetylene)s	256
6.5.2	Poly(diacetylene)s	257
6.6	Aromatic Poly(hydrocarbon)s	257
6.6.1	Poly(phenylene)s	257
	Branched Poly(phenylene)s	258
	Linear Poly(phenylene)s	258
6.6.2	Poly(<i>p</i> -xylylene)s	260
6.6.3	Phenolic Resins	261
	Acid Catalysis	262
	Base Catalysis	263
	Properties	263
6.6.4	Poly(armethylene)s	265

6.6.5	Poly(benzocyclobutene)s	265
6.7	Other Poly(hydrocarbon)s	266
6.7.1	Coumarone-Indene Resins	267
6.7.2	Resin Oils	267
6.7.3	Pinene Resins	267
6.7.4	Polymers from Unsaturated Natural Oils	268
6.8	Vinyl Polymers	268
6.8.1	Overview	268
6.8.2	Poly(styrene)s	269
	Atactic Homopolymers	269
	Stereoregular Poly(styrene)s	272
	Styrene Copolymers	273
6.8.3	Substituted Poly(styrene)s	274
6.8.4	Poly(vinyl acetate)	275
6.8.5	Poly(vinyl alcohol)	276
6.8.6	Poly(vinyl acetal)s	277
6.8.7	Poly(vinyl ether)s	277
6.8.8	Poly(<i>N</i> -vinyl compound)s	278
	Poly(<i>N</i> -vinyl carbazole)	279
	Poly(<i>N</i> -vinyl pyrrolidone)	279
6.9	Chlorine-containing Polymers	280
6.9.1	Poly(vinyl chloride)	280
	Homopolymerization	281
	Structure	282
	Properties	282
	Derivatives	284
	Copolymers	284
6.9.2	Poly(vinylidene chloride)	284
6.10	Fluorine-containing Polymers	285
6.10.1	Poly(tetrafluoroethylene)	285
	Polymerization	285
	Processing and Properties	286
6.10.2	Copolymers of Tetrafluoroethylene	287
6.10.3	Poly(chlorotrifluoroethylene)	288
6.10.4	Poly(vinyl fluoride)	288
6.10.5	Poly(vinylidene fluoride)	289
6.11	Acrylic Polymers	289
6.11.1	Poly(acrylic acid)	289
6.11.2	Poly(acrylate)s	290
6.11.3	Poly(acrolein)	292
6.11.4	Poly(acrylonitrile)	292
6.11.5	Poly(acrylamide)	293
6.11.6	Poly(α -cyanoacrylate)s	294
6.11.7	Poly(methyl methacrylate)	294
	Polymerization in Bulk	295
	Solution and Emulsion Polymerizations	296

	Suspension Polymerization	296
6.11.8	Poly(2-hydroxyethyl methacrylate)	297
6.11.9	Poly(methacrylimide)	298
6.11.10	Poly(methacrylonitrile)	298
6.12	Allylic Polymers	298
6.13	Aliphatic Polyketones	300
	Literature to Chapter 6	300
	References to Chapter 6	300
7	Carbon–Oxygen Chains	309
7.1.	Overview	309
7.2	Polyacetals and Polyketals	309
7.2.1	Monomers	309
7.2.2	Poly(oxymethylene)s	310
	Monomers	310
	Poly(formaldehyde)	311
	Acetal Copolymers	312
	Stabilization of Acetal Copolymers	314
	Properties	314
7.2.3	Poly(acetaldehyde)	315
7.2.4	Poly(flural)	316
7.2.5	Poly(chloral)	316
7.2.6	Poly(phthalaldialdehyde)	316
7.2.7	Poly(diphenolformal)s	316
7.2.8	Poly(1,3-dioxolane)	317
7.2.9	Poly(acetone)	318
7.3	Polyethers	318
7.3.1	Poly(oxyethylene)s	318
7.3.2	Poly(propylene oxide)	319
7.3.3	Poly(epichlorohydrin)	320
7.3.4	Poly(1,2-di(chloromethyl)ethylene oxide)	320
7.3.5	Phenoxy Resins	321
7.3.6	Epoxy Resins	322
	Syntheses	322
	Curing	323
7.3.7	Poly(tetrahydrofuran)	326
7.3.8	Furan Resins	326
7.3.9	Poly(phenylene oxide)s	327
	Synthesis	327
	Properties	328
7.4	Polyketones	329
7.4.1	Poly(carbon suboxide)	329
7.4.2	Polyaryletherketones	330
7.5	Aliphatic AB Polyesters	332
7.5.1	Poly(α -hydroxyacetic acid)	333
7.5.2	Poly(lactide)s	333

7.5.3	Poly(hydroxypropionic acids)	334
7.5.4	Poly(hydroxyalkanoic acid)s	335
7.5.5	Poly(pivalolactone)	338
7.5.6	Poly(β -malic acid ester)s	338
7.5.7	Poly(ϵ -caprolactone)	339
7.5.8	Other Poly(α -hydroxyalkanoate)s	339
7.6	Aliphatic AA _i /BB _j Polyesters	340
7.6.1	Poly(alkylene carbonate)s	340
7.6.2	Other Poly(alkylene alkanoate)s	341
7.6.3	Alkyd Resins	341
7.6.4	Unsaturated Polyesters	342
7.7	Aromatic Polyesters	343
7.7.1	Polycarbonates	343
	Syntheses	344
	Properties	345
7.7.2	Poly(<i>p</i> -hydroxybenzoate)s	347
7.7.3	Liquid Crystalline Polyesters	348
7.7.4	Poly(ethylene oxybenzoate)	350
7.7.5	Poly(ethylene terephthalate)	350
	Chemical Processes	350
	Reaction Engineering	352
	Chemical Structure	353
	Properties	354
7.7.6	Poly(1,4-bismethylenecyclohexane terephthalate)	354
7.7.7	Poly(trimethylene terephthalate)	355
7.7.8	Poly(butylene terephthalate)	355
	Conventional Poly(butylene terephthalate)	355
	Cyclic Butylene Terephthalate	357
7.7.9	Thermoplastic Polyetherester Elastomers	358
7.7.10	Poly(alkylene naphthalate)s	359
7.7.11	Polyarylates	360
7.8	Polyorthoesters	360
7.9	Polyanhydrides	361
	Literature to Chapter 7	362
	References to Chapter 7	364
8	Polysaccharides	365
8.1	Saccharides	365
8.1.1	Overview	365
8.1.2	Simple Sugars	365
8.1.3	Oligosaccharides and Polysaccharides	370
8.1.4	Nomenclature	371
8.1.5	Biosynthesis	373
8.1.5	Economic Importance	374
8.2	Poly(α -glucose)s	375
8.2.1	Overview	375

8.2.2	Starch	376
	Occurrence	376
	Biosynthesis	378
	Industrial Isolation	378
	Technical Use	379
	Modified Starches	379
	Starch as Raw Material	380
	Molecular Weights	381
8.2.3	Amylose	381
8.2.4	Amylopectin	383
8.2.5	Glycogen	384
8.2.6	Dextrins	385
8.2.7	Dextrans	386
8.2.8	Poly(dextrose)	387
8.2.9	Poly[α -(1 \rightarrow 3)-D-glucose]	387
8.2.10	Pullulan	387
8.3	Cellulose	388
8.3.1	Chemical Structure	388
8.3.2	Physical Structure	389
8.3.3	Physical Properties	392
8.3.4	Plant Fibers	392
	Occurrence	392
	Structure of Natural Fibers	395
8.3.5	Microbial Cellulose	397
8.3.6	Synthetic Cellulose	397
8.3.7	Regenerated Celluloses	397
	Cuoxam Process	398
	Viscose Process	398
	Organosolv Process	400
8.3.8	Mercerization	400
8.3.9	Cellulose Derivatives	401
	Reactions of Cellulose	401
	Cellulose Nitrates	403
	Cellulose Acetates	404
	Cellulose Ethers	406
8.3.10	Chitin and Chitosan	406
8.3.11	Xanthan	407
8.4	Mucopolysaccharides	408
8.4.1	Hyaluronic Acid	409
8.4.2	Chondroitin Sulfates	409
8.4.3	Heparin	410
8.4.4	Keratane Sulfate	410
8.4.5	Murein	410
8.5	Poly[β -(1 \rightarrow 3)-D-glucose]s	411
8.6	Gellan Group	412
8.7	Poly(galactose)s	413

8.7.1	Agar	414
8.7.2	Agarose and Agaropectin	414
8.7.3	Carrageen	415
8.7.4	Furcelleran and Funoran	416
8.7.5	Pectin	416
8.7.6	Tragacanth	417
8.7.7	Gum Ghatti	418
8.7.8	Gum Arabic	418
8.8	Poly(mannose)s	419
8.8.1	Guar	419
8.8.2	Carob	420
8.8.3	Algins	420
8.9	Hemicelluloses	420
8.9.1	Hemicelluloses of Hard Woods	421
8.9.2	Hemicelluloses of Soft Woods	422
8.9.3	Hemicelluloses of Grasses	423
8.10	Poly(fructose)s	423
	Literature to Chapter 8	424
	References to Chapter 8	427
9	Carbon–Sulfur Chains	429
9.1	Aliphatic Polysulfides with Monosulfur Groups	429
9.1.1	Polythioacetals	429
9.1.1	Polysulfides	429
9.2	Aliphatic Polysulfides with Polysulfur Groups	431
9.3	Poly(phenylene sulfide)	432
9.3.1	Syntheses	432
9.3.2	Properties	435
9.4	Aromatic Polysulfide Ethers	435
9.5	Polysulfones	436
9.5.1	Poly(alkylene sulfone)s	436
9.5.2	Poly(sulfo-1,4-phenylene)	436
9.5.3	Aromatic Polyether Sulfones	437
	Polysulfonylations	438
	Polyether Syntheses	439
	Polyarylene Sulfide Sulfones	439
	Properties	440
9.6	Polymers with Sulfur in Ring Systems	441
9.6.1	Poly(thiophene)	441
	Syntheses	441
	Properties	442
9.6.2	Other Cyclic Sulfur Polymers	442
	Literature to Chapter 9	443
10	Carbon–Nitrogen Chains	445
10.1	Cyanide Polymers	445

10.1.1	Polycyanides	445
10.1.2	Polyisocyanides	446
10.1.3	Polydinitriles and Polytetranitriles	447
10.1.4	Polycyanoacetylenes	447
10.2	Imine and Amine Polymers	447
10.2.1	Nomenclature	447
10.2.2	Poly(ethyleneimine)s	448
	Linear Poly(ethyleneimine)	448
	<i>N</i> -Substituted Linear Poly(ethyleneimine)s.....	449
	Unsubstituted Branched Poly(ethyleneimine)s	449
	<i>N</i> -Substituted Poly(ethyleneimine)s	450
10.2.3	Poly(formaldazine)	450
10.2.4	Poly(aniline)	450
10.2.5	Amine Dendrimers	453
	Poly(1,3-trimethyleneimine) Dendrimers (PPI)	454
	Polyamidoamine Dendrimers (PAMAM)	454
10.2.6	Benzoquinone Polyimines	456
10.3	Polyamides	456
10.3.1	Overview	456
10.3.2	Linear Aliphatic AA/BB Polyamides	457
	Types	457
	Monomers	458
	Industrial Syntheses	459
	Properties	461
	Applications	463
10.3.3	Aliphatic AB Polyamides	464
	Survey	464
	Monomers	465
	Hydrolytic Polymerization	466
	Anionic Lactam Polymerization	468
	Cationic Lactam Polymerizations	469
	Polycondensations	470
	Properties and Applications	470
10.3.4	Branched AA/BB Polyamides	472
	Versamid®	472
	Hyperbranched Polyamides	472
10.3.5	Aramids	473
	AB Types	473
	AA/BB Types	475
10.3.6	Partly Aromatic Polyamides	477
	Polyamide 6-3.T (PA TMDT)	478
	Other Transparent Polyamides	478
	Semicrystalline Aromatic Polyamides	480
10.3.7	Other Polyamides	481
	Poly(<i>m</i> -xylylene adipamide)	481
	Poly[bis(4-aminocyclohexane)methylene dodecanamide] .	481

10.4	Polyureas and Amino Resins	482
10.4.1	Polyureas	482
10.4.2	Amino Resins	483
	Monomers	483
	Synthesis	484
	Industrial Resins	485
10.4.3	Polyhydrazides	486
10.5	Polycyanates	486
10.5.1	Introduction	486
10.5.2	Polyamide 1 and Cyamelide	487
10.5.3	Polyisocyanates	488
10.5.4	Cyanate Ester Resins	488
10.5.5	Polyisocyanurates	489
10.6	Polyurethanes	489
10.6.1	Overview	489
10.6.2	Syntheses	490
10.6.3	Monomers	492
	Diisocyanates	492
	Polyols	493
10.6.4	Applications	494
	Elastomers	495
	Foams	496
	Coatings and Paints	497
	Adhesives	497
	Reprography	498
10.7	Polyimides	498
10.7.1	<i>In-situ</i> Formation	498
	Polyimides (PI)	498
	Polyesterimides	501
	Polyamideimides	502
	Polyetherimides	502
	PMR Polyimides	503
10.7.2	Preformed Imide Groups	504
	Polybismaleimides (BMI)	504
	BT Resins	505
10.7.3	Other Polyimides	506
10.7.4	Polycarbodiimides	506
10.7.5	Polyuretdiones	507
10.8	Polyazoles	507
10.8.1	Overview	507
10.8.2	Poly(pyrrole)s	508
10.8.3	Poly(benzimidazole)s	510
10.8.4	Poly(benzoxazole)s and Poly(benzthiazole)s	511
10.8.5	Oxazoline Polymers	512
10.8.6	Oxazolidone Polymers	514
10.8.7	Oxadiazole Polymers	515

10.8.8	Poly(terephthaloyloximidrazone)s	516
10.8.9	Polyhydantoines	517
10.8.10	Polyparabanic Acids	518
10.8.11	Triazole Polymers	519
10.9	Polyazines	520
10.9.1	Overview	520
10.9.2	Polyquinolines	520
10.9.3	Polyquinazolines	521
10.9.4	Polytriazines	521
10.9.5	Heptazines	523
10.10	Other Carbon–Nitrogen Polymers	523
10.10.1	Nitroso Rubber	523
10.10.2	Azo Polymers	524
	Literature to Chapter 10	524
	References to Chapter 10	528
11	Peptides and Proteins	529
11.1	Overview	529
11.1.1	Definitions	529
11.1.2	α -Amino Acids	531
11.1.3	Macroconformations	533
11.2	Poly(α -amino acid)s	533
11.2.1	Syntheses	533
11.2.2	Polymers	534
11.3	Poly(β -amino acid)s	535
11.3.1	Poly(β -alanine)s	535
11.3.2	Poly(β -aspartate)s	536
11.4	Proteins	537
11.4.1	Survey	537
11.4.2	Enzymes	538
	Classification	538
	Structure of Enzymes	538
	Immobilization of Enzymes	540
	Industrial Use of Enzymes	541
11.4.3	Collagen	543
	Scleroproteins	543
	Structure of Collagen	543
	Use of Collagen	544
11.4.4	Protein Gums	544
	Elastin	544
	Resilin and Abductin	545
11.4.5	Protein Fibers	546
	Silk	546
	Wool	547
	Protein Fibers	548
	Casein	548

11.4.6 Synthetic Proteins	549
Literature to Chapter 11	549
References to Chapter 11	552
12 Inorganic and Semi-Organic Polymers	553
12.1 Introduction	553
12.2 Boron Polymers	554
12.2.1 Elementary Boron	554
12.2.2 Boron–Nitrogen Polymers	555
12.2.3 Boron–Carbon Polymers	555
12.2.4 Carborane–Siloxane Polymers	555
12.2.5 Boron–Hydrogen and Boron–Oxygen Compounds	557
12.3 Silicon Polymers	557
12.3.1 Silanes and Polysilylenes	558
12.3.2 Polycarbosilanes	559
12.3.3 Polysilazanes	561
12.3.4 Poly(silicic acid)s	561
12.3.5 Silicates	562
Structures	562
Syntheses	564
12.3.6 Silicate Glasses	565
12.3.7 Fibrous Silicates	566
12.3.8 Layer Silicates	567
12.3.9 Cement and Concrete	569
12.3.10 Ceramic Materials	570
12.3.11 Silicones	571
Silicate Transformations	572
Polymerizations	572
Equilibration	574
Organofunctional Polysiloxanes	575
Properties and Applications	575
12.3.12 Silicon Dioxide	577
12.4 Germanium and Tin Polymers	578
12.5 Phosphorus Polymers	578
12.5.1 Elementary Phosphorus	578
12.5.2 Poly(phosphoric acid) and its Salts	578
12.5.3 Esters of Poly(phosphoric acid)	580
12.5.4 Polyphosphonates	580
12.5.5 Polyphosphazenes	581
12.6 Sulfur Polymers	583
12.6.1 Elementary Sulfur	583
12.6.2 Poly(thiazyl)	585
12.7 Selenium, Tellurium, and Gallium Polymers	586
12.7.1 Elements	586
12.7.2 Gallium Chalcogenides	586
12.8 Organometallic Polymers	587
