

## Contents

List of contributors .....	XI
Preface .....	XV
1. Introduction by A. H. L. Huiskes .....	2
2. List of Publications of W. G. Beeftink .....	10
3. Salt marsh communities of three West Frisian islands, with some notes on their long-term succession during half a century by V. Westhoff .....	16
4. Changes in salt-marsh area in the Netherlands Wadden Sea after 1600 by K. S. Dijkema ...	42
5. Utilization of different salt-marsh plant communities by cattle and geese by R. C. Looijen/ J. P. Bakker .....	52
6. Ecology of salt-marsh algae in the Netherlands: A review by P. H. Nienhuis .....	66
7. Fungi in intertidal regions by G. J. F. Pugh .....	86
8. Synecological relations in the moist grasslands of Ballyteige Innish, Ireland by K. V. Sykora/ M. van Katwijk/R. Meier .....	95
9. Leaf diversity of three vegetation types of Tenerife, Canary Islands by M. J. A. Werger/ H. J. During/H. van Rijnberk .....	107
10. Preliminary investigations on the texture of high arctic tundra vegetation by J. J. Barkman ..	120
11. Reflexions et observations sur le classement des végétations halophiles européennes par Jean-Marie Géhu .....	134
12. Decomposition of standing and fallen litter of halophytes in a Dutch salt marsh by G. J. C. Buth/L. A. C. J. Voeselek .....	146
13. Ecological differentiation of the microspecies <i>Salicornia dolichostachya</i> Moss and <i>Salicornia ramosissima</i> J. Woods by H. Schat/J. C. van der List/J. Rozema .....	164
14. Ecophysiological response of <i>Salicornia dolichostachya</i> and <i>Salicornia brachystachya</i> to seawater inundation by J. Rozema/J. C. van der List/H. Schat/J. van Diggelen/R. A. Broekman .....	180
15. <i>Salicornia europaea</i> agg. colonizing bare sand flats in the south-west of the Netherlands by A. W. Stienstra .....	188
16. Seed productivity and seed polymorphism in <i>Aster tripolium</i> L. by Ad H. L. Huiskes/Jos van Soelen .....	202
17. The relation between the halophyte <i>Aster tripolium</i> and <i>Agapanthia villosiviridescens</i> , an insect invader of estuarine salt marshes by M. A. Hemminga/J. van Soelen/M. M. Markusse	214

18. Aspects of seed dispersal by tidal movements <i>by</i> B. P. Koutstaal/M. M. Markusse/W. de Munck .....	226
19. Growth and interactions of salt-marsh species under different flooding regimes <i>by</i> A. M. Groenendijk/J. G. J. Spieksma/M. A. Vink-Lievaart .....	236
20. Growth and mineral relations of salt-marsh species on nutrient solutions containing various sodium sulphide concentrations <i>by</i> J. van Diggelen/J. Rozema/R. Broekman .....	260
21. The impact of competitive interactions on the growth and distribution of plant species in salt marshes <i>by</i> M. Scholten/P. A. Blaauw/M. Stroetenga/J. Rozema .....	270
22. Aspects of the population biology of sexual dandelions in the Netherlands <i>by</i> A. A. Sterk ..	284
23. Trace element correlations in the halophyte <i>Aster tripolium</i> from a salt marsh (Westerwaarde) of the Scheldt Estuary <i>by</i> M. Rossbach/M. Stoeppler .....	292
24. Metal fluxes to coastal ecosystems and the response of coastal vegetation <i>by</i> W. H. O. Ernst	302
25. Experimental plant ecology as an approach in coastal population biology <i>by</i> C. W. P. M. Blom .....	312
Index of authors cited .....	327
Index of species .....	331
Index of keywords .....	336
