

Contents

Chapter 1 Introduction and Basic Concepts	1
The Forgotten Aspect of Socialization	1
Different Strategies in the Study of Parent-Child Interaction	3
Combining Dimensions in Different Ways	5
Different Strategies Compared	6
Experimental Situation in Laboratory Playroom	6
Naturalistic Observation in the Home	7
Hypothesis Testing in Naturalistic Observation Studies	9
Interview	10
Combining Process with Trait Analysis	11
About This Book	12
Examining Parent-Child Interaction	12
Genetic Analysis	15
Chapter 2 Design and Methods	17
Design	17
Subjects	19
Ethological Approach: Naturalistic Observation	21
Observations and Observers	21
Behavior Record and Code	21
Training Procedures	23
Behavior Units and Problems of Recording	24
Processing the Record	26
Interobserver Agreement	26
Intersituational Stability	32
Parents' Reactions to Home Observations	33

Interview-Rating Approach	37
Interviews and "Diary"	37
Ratings	38
Experimental Approach	40
Measures	40
Comments on the Three Approaches Employed	41
Comparative Yield of Different Data Sources	43
Summary	48

Chapter 3 Mothers, Fathers and Young Sons: Incidence, Structure, and Education Level Differences in Their Interactive Behavior 49

Incidence of Child and Parent Behavior	52
Child Actions	53
Active Play and Movement Behavior	53
Speech Behavior	54
Demands and Compliance	55
Positively and Negatively Toned Behavior	56
Attachment Behavior	56
Mother and Father Actions	59
Speech Behavior	59
Control Behavior and Compliance	59
Positively and Negatively Toned Behavior	61
Responsiveness	62
Multivariate Testing of Differences in Action Frequencies between Mothers' Education Groups	65
Education Level Differences in Vocabulary IQ and Ratings	66
Summary	67
Structure of Child and Parent Interactive Behavior	68
Interrelations of Mother and Father Characteristics	69
Summary	71
Discussion	74

Chapter 4 Being Two Makes a Difference: The Impact of Twinship on Parent-Child Interaction 79

Differences in Child and Parent Behavior between Twins and Singletons	81
Summary	87
Identical and Fraternal Twins and Biological Factors	87

Single-Parent Twin Families versus Two-Parent Twin Families	89
Summary	91
Other Aspects of Twinship	92
Discussion: The Effects of Twinship—Biological, Environmental, or Both?	93
Family Portraits	97
Chapter 5 Attachment	99
Attachment Behavior and Parent Actions: Sequence Analysis	102
Analysis	103
Effects of Parents' Single Actions on Attachment Behavior	104
Bidirectional Effects of Parents' Grouped Actions on Attachment Behavior and Vice Versa	109
"Attachment Behavior" as a Class of Response	114
Differences in Facilitation (Inhibition) Effects between Twins and Singletons	115
Summary	115
Attachment to Mother and Attachment to Father	116
Summary	119
Correlates and Determinants of Attachment Behavior	120
Remote Effects of Parent Actions and Child Attachment Behavior on Each Other	121
Attachment Viewed as a Behavior Tendency	123
Relationships with Demographic and Child Variables	128
Prediction from Parent Characteristics	130
Parental Responsiveness and Attachment Behavior	136
Attachment Behavior in the Experimental Situation	137
Summary	137
Discussion	138
Chapter 6 Compliance and the Rudiments of Conscience	143
Compliance and Parent Actions: Sequence Analysis	146
Analysis	146
Effects of Parents' Actions on Compliance and Noncompliance	148
First-Order Antecedents	150
Second-Order Antecedents	153
Differences in Facilitation Effects between Twins and Singletons	157

Parent Responses to Child Compliance and Noncompliance	157
“Second-Order Effects” of Father’s Presence on Mother’s Control Behavior	161
Summary	164
Other Aspects of Parents’ Control Behavior	165
Incidence and Effects of “Repeated Directions”	165
Example of Control Sequence	168
How Different Issues Affect the Mode of Control and the Use of Repeated Directions	169
Summary	172
Correlates and Determinants of Compliance	172
Remote Effects of Parent Control Behavior and Child Compliance on Each Other	172
Compliance and the Rudiments of Conscience: Relationships with Demographic and Child Variables	176
Prediction from Parent Characteristics	179
Summary	187
Discussion	187
Chapter 7 Child-Parent Communication	197
Who Initiates Child-Parent Dialogues and Who Responds?	200
“Second-Order Effects” Arising from the Presence of Both Parents	203
Twin-Singleton and Mother Education Level Differences	204
Summary	207
Examples of Parent-Child Interchanges	208
Correlates and Determinants of the Child’s Linguistic Competence	210
Relationships with Demographic and Child Variables	210
Prediction from Parent Characteristics	211
Summary	217
Discussion	217
Chapter 8 Other Domains of Interaction	221
Positively and Negatively Toned Actions	221
Parents’ Responses to Child’s Positively and Negatively Toned Actions	222
What Do Parents See as “Objectionable” Behavior?	224

Correlates and Determinants of Positively and Negatively Toned Actions	226
Remote Effects of Parents' and Children's Positive and Negative Actions, or: Who Influences Whom?	226
Relationships with Other Child Variables and Prediction from Parent Characteristics	230
Summary	235
Instrumental Independence	235
Correlates and Determinants of Instrumental Independence	237
Summary	241
Physical Activity Level	242
Correlates and Determinants of Activity Level	244
Summary	248
Discussion	248
Positively and Negatively Toned Actions	248
Instrumental Independence	250
Physical Activity Level	251
Chapter 9 Genetic Influences	253
An Assumption of the Twin Method Examined: Do Parents Create, or Respond to, Differences in Twins?	254
The Genetic Analysis	258
Twins as Each Other's Environment	258
Environmental and Genetic Causes of Variation	259
Variance between Observers	262
Summary	262
Discussion	263
Chapter 10 Conclusions and Implications	269
The Family System and Maternal and Paternal Roles	270
Attachment, Nurturance, and Play	271
Changing the Child's Behavior	272
Parent-Child Communication	273
Family Climate	274
Mothers' and Fathers' Complementary Roles	274
Socialization Effects: Who Shapes Whom?	278
Implications for Practice	283
Attachment and Dependence	284

Compliance and Moral Development	286
Language and Competence	289
Twins	290
Do Parents Make a Difference?	291

Appendices 293

I	Summary of Parent–Child Interaction Code (PACIC)	293
II	Parent Interviews I and II	297
III	Means, <i>SDs</i> , Etc., of Count Variables	305
IV	Factor Analysis of Child and Parent Interactive Behavior	309
V	Multivariate Analysis by Mother’s Education and Twinship	317
VI	Sequence Analysis (Including Detailed Tables for Attachment Behavior)	319
VII	Facilitation of Attachment Behavior in Twins’ and Singletons’ Subgroups	325
VIII	Remote Effects or Cross-Lagged Panel Analysis for Attachment Behavior	327
IX	Discriminant Function Analysis between Twins and Singletons (Compliance)	329
X	Remote Effects or Cross-Lagged Panel Analysis for Positive and Negative Actions	331
XI	Fitting Genotype–Environment Models to the Data	335
XII	Analysis of Variance between Observers	343
