

Brief Contents

Chapter 1 Why Do Research? 1

Part 1 Beginning the Research Process

Chapter 2 Planning a Study 24

Chapter 3 Becoming an Ethical Researcher 60

Chapter 4 Sampling: How to Select a Few to Represent the Many 86

Chapter 5 Measuring Social Life 112

Chapter 6 The Survey: Asking People Questions 142

Part 2 Quantitative Data Collection and Analysis

Chapter 7 The Experiment 178

Chapter 8 Research with Nonreactive Measures 204

Chapter 9 Making Sense of the Numbers 230

Part 3 Qualitative Data Collection and Analysis

Chapter 10 Observing People in Natural Settings 262

Chapter 11 Looking at the Past and Across Cultures 292

Part 4 Research Report

Chapter 12 Writing a Research Report 322

Appendices

Appendix A Sample Research Proposals 346

Appendix B Data and Literature Research 354

Appendix C Sample Articles Based on Different Research Methods 358

Contents

Preface ix

Chapter 1 Why Do Research? 1

- On What Basis Do You Make Decisions? 3
- How Do We Know What We Know? 4
 - Ways of Knowing Without Research* 4
 - Developing Critical Thinking Skills* 6
- What Is Empirical Social Research? 8
 - What Evidence?* 10
 - Research Is a Process that Results in a Product* 11
 - Varieties of Social Research* 11

Fit the Question You Want to Answer with a Type of Social Research 12

- Exploring* 13
- Describing* 13
- Explaining* 14
- Evaluating* 15

How to Use Research 18

- Basic Research* 18
- Applied Research* 18

Steps in the Research Process 20

What Have You Learned? 22

Apply What You've Learned 22

Part 1 Beginning the Research Process

Chapter 2 Planning a Study 24

- Picking a Study Topic 26
- Conducting a Review of Past Studies 27
 - Where Do You Find Research Literature?* 27
 - How to Conduct a Literature Review: A Six-Step Process* 34
- Focusing on a Research Question 44
- The Research Proposal 46
 - A Proposal for Quantitative or Qualitative Research* 46
- What Have You Learned? 57
- Apply What You've Learned 57

Chapter 3 Becoming an Ethical Researcher 60

- The Ethical Imperative 62
 - Scientific Misconduct* 63
 - Unethical but Legal* 64
- Ethical Issues Involving Research Participants 65
 - The Origin of Ethical Principles for Research with Humans* 66
 - Protect Research Participants from Harm* 66
 - Participation Must Be Voluntary and Informed* 69
 - Limits to Using Deception in Research* 70
 - Privacy, Anonymity, and Confidentiality* 73

- Extra Protection for Special Populations* 75
- Formal Protections for Research Participants* 76

Ethics and the Sponsors of Research 79

- Arriving at Particular Findings* 79

Political Influences on Research 81

Value-Free and Objective Research 82

What Have You Learned? 83

Apply What You've Learned 84

Chapter 4 Sampling: How to Select a Few to Represent the Many 86

How and Why Do Samples Work? 88

Focusing on a Specific Group: Four Types of Nonrandom Samples 88

- Convenience Sampling* 88
- Quota Sampling* 89
- Positive or Judgmental Sampling* 90
- Snowball Sampling* 91

Coming to Conclusions About Large Populations 92

- Why Use a Random Sample?* 93
- Types of Random Samples* 94

Three Specialized Sampling Situations 103

- Random-Digit Dialing* 103
- Within-Household Sampling* 104
- Sampling Hidden Populations* 104

Inferences from Sample to Population	105
<i>How to Reduce Sampling Errors</i>	105
<i>How Large Should My Sample Be?</i>	106
<i>How to Create a Zone of Confidence</i>	107
What Have You Learned?	108
Apply What You've Learned	109

Chapter 5 Measuring Social Life 112

Why Measure?	114
Making Aspects of the Social World Visible	115
Measuring with Numbers of Words	116
<i>Two Parts of the Measurement Process</i>	116
<i>Quantitative Conceptualization and Operationalization</i>	118
<i>Qualitative Conceptualization and Operationalization</i>	120
How to Create Good Measures: Reliability and Validity	122
<i>Reliability and Validity in Quantitative Research</i>	122
<i>Reliability and Validity in Qualitative Research</i>	125
<i>Putting Reliability and Validity Together</i>	125
A Guide to Quantitative Measurement	126
<i>Levels of Measurement</i>	126
<i>Specialized Measures: Scales and Indexes</i>	129
Adding Measures to Get a Score: Index Construction	130
<i>Two Complications in Index Construction</i>	131
Capturing Intensity: Scale Construction	132
<i>Commonly Used Scales</i>	133
What Have You Learned?	139
Applying What You've Learned	139

Chapter 6 The Survey: Asking People Questions 142

What Is a Social Survey?	144
How to Conduct a Survey	153
<i>Start-Up Stage</i>	153
<i>Execution Stage</i>	157
<i>Data Analysis Stage</i>	157
Writing Good Survey Questions	157
<i>What Are Leading Questions?</i>	158
<i>Getting Answers to Survey Questions</i>	160
Effective Questionnaire Design Tips	166
<i>Length of Survey or Questionnaire</i>	166
<i>Question Order or Sequence</i>	166
Advantages and Disadvantages of Different Survey Formats	168
<i>Mail and Self-Administered Questionnaires</i>	168
<i>Telephone Interviews</i>	168
<i>Face-to-Face Interviews</i>	169
<i>Web Surveys</i>	169
Survey Interviewing	170
<i>The Interviewer's Role</i>	170
<i>The Interview Stages</i>	171
<i>Training Interviewers</i>	172
<i>Using Probes</i>	172
<i>Interviewer Bias</i>	173
<i>Computer-Assisted Telephone Interviewing</i>	174
The Ethical Survey	174
What Have You Learned?	175
Applying What You've Learned	176

Part 2 Quantitative Data Collection and Analysis

Chapter 7 The Experiment 178

Doing Experiments in Everyday Life	180
What Questions Can You Answer with the Experimental Method?	180
Why Assign People Randomly?	181
Do You Speak the Language of Experimental Design?	183
<i>Managing Experiments</i>	186
<i>Types of Experimental Design</i>	186
<i>Design Notation</i>	193
Experimental Validity Inside and Out	194
<i>Looking at an Experiment's Internal Validity</i>	194
<i>External Validity and Field Experiments</i>	196

Making Comparisons and Looking at Experimental Results	199
How to Be Ethical in Conducting Experiments	201
What Have You Learned?	201
Applying What You've Learned	202

Chapter 8 Research with Nonreactive Measures 204

Analyzing Physical Evidence for Clues About Social Life	206
<i>Limitations of Physical Evidence</i>	207
Revealing the Content Buried Within Communication Messages	208

<i>How to Measure and Code in Content Analysis</i>	209
<i>How to Conduct Content Analysis Research</i>	213
<i>Limitations of Content Analysis</i>	216
Mining Existing Statistical Sources to Answer New Questions	216
<i>Locating Data</i>	218
<i>Verifying Data Quality</i>	220
<i>Creative Thinking About Variables of Interest</i>	223
<i>Standardization of Data</i>	223
<i>Secondary Sources</i>	225
<i>Limitations of Secondary Data Sources</i>	226
Conducting Ethical Nonreactive Research	227
What Have You Learned?	228
Applying What You've Learned	228

Chapter 9 Making Sense of the Numbers 230

What to Do Once You Have the Numbers	233
Cleaning Up the Numbers	235
How to Describe Quantitative Results	235
<i>Looking at Results with One Variable</i>	235
<i>Results with Two Variables</i>	244
<i>Results with More than Two Variables</i>	252
Going Beyond Description: Inferential Statistics	255
<i>Statistical Significance</i>	255
<i>Levels of Significance</i>	256
What Have You Learned?	259
Applying What You've Learned	260

Part 3 Qualitative Data Collection and Analysis

Chapter 10 Observing People in Natural Settings 262

What Is Field Research?	264
<i>Ethnography</i>	264
Studying People in the Field	267
1. <i>Preparing for a Field Study</i>	267
2. <i>Starting the Research Project</i>	268
3. <i>Being in the Field</i>	271
4. <i>Strategies for Success in the Field</i>	274
5. <i>Observing and Collecting Data</i>	276
6. <i>Interviewing in Field Research</i>	282
7. <i>Leaving the Field</i>	284
8. <i>Writing the Field Research Report</i>	285
Ethics and the Field Researcher	286
Focus Groups	287
What Have You Learned?	289
Applying What You've Learned	290

Chapter 11 Looking at the Past and Across Cultures 292

What Is Historical-Comparative Research?	294
<i>How Are Field Research and H-C Research Alike?</i>	295
<i>What Is Unique about H-C Research?</i>	297
How to Do a Historical-Comparative Research Study	300
<i>Acquire the Necessary Background</i>	300
<i>Conceptualize the Issue</i>	300
<i>Locate and Evaluate the Evidence</i>	301
<i>Organize the Evidence</i>	301
<i>Synthesize and Develop Concepts</i>	301
<i>Write a Report</i>	301
Researching the Past	302
<i>Types of Historical Evidence</i>	302
Research That Compares Across Cultures	308
<i>Can You Really Compare?</i>	310
<i>Galton's Problem</i>	312
<i>Gathering Comparative Data</i>	312
<i>The Issue of Equivalence</i>	315
Being an Ethical H-C Researcher	318
What Have You Learned	319
Applying What You've Learned	319

Part 4 Research Report

- Chapter 12 Writing a Research Report** 322
- Why Write a Report? 324
 - The Writing Process 325
 - Know Your Audience* 325
 - Pick a Style and Tone* 326
 - Organize Your Thoughts* 326
 - Go Back to the Library* 326
 - Engage in Prewriting Activities* 328
 - Rewrite Your Report* 329
 - Show Cause-Effect Relations 331
 - The Quantitative Research Report 332
 - Abstract or Executive Summary* 332
 - Presentation of the Problem* 333
 - Description of the Method* 333
 - Results and Tables* 333
 - Discussion* 333
 - Conclusions* 334
 - The Qualitative Research Report 335
 - Report on Field Research* 335
 - Report on Historical-Comparative Research* 337
 - The Research Proposal 338
 - Proposals for Research Grants* 338
 - Undergraduate Research 343
 - What Have You Learned? 344
 - Applying What You've Learned 344

Appendices

- Appendix A** Sample Research Proposals 346
- Appendix B** Data and Literature Research 354
- Appendix C** Sample Articles Based on Different Research Methods 358
- Name Index** 379
- Subject Index** 381
