Part I Physiology of Muscle Damage and Repair

CHAPTER 1	Physiology and Mechanisms of Skeletal Muscle Damage	3
	Timothy J. Koh, PhD	
	Foundations 3 • Fiber Type and Injury 4 • Mechanisms of Muscle Injury 5 • Nature of Exercise-Induced Muscle Injury 6 • Summary 12	
CHAPTER 2	Human and Animal Experimental Muscle Injury Models	13
	Gordon L. Warren, PhD, and Leigh E. Palubinskas, MPT	
	Human Muscle Injury Models 13 • Animal Muscle Injury Models 21 • Summary 35	
CHAPTER 3	Histological, Chemical, and Functional Manifestations of Muscle Damage	37
	Stephen P. Sayers, PhD, and Monica J. Hubal, PhD	
	Histological Evidence of Muscle Damage 37 • Biochemical and Histochemical Evidence of Muscle Damage 40 • Functional Evidence of Muscle Damage 43 • Summary 48	
CHAPTER 4	Neutrophils and Macrophages in Muscle Damage and Repair	49
	Francis X. Pizza, PhD	
	The Timing and Mechanism of Neutrophil and Macrophage Accumulation 49 • The Causative Factors in Neutrophil and Macrophage Accumulation 52 • Neutrophil- and Macrophage-Induced Injury 53 • Neutrophil- and Macrophage-Assisted Muscle Repair 54 • Summary 56	
CHAPTER 5	Muscle Soreness and Damage and the Repeated-Bout Effect	59
	Ken Nosaka, PhD	
	Muscle Soreness 59 • DOMS and Muscle Damage 64 • Repeated-Bout Effect 68 • Summary 75	
CHAPTER 6	Satellite Cells and Muscle Repair	77
	Karin Shortreed, MSc; Adam Johnston, MSc; and Thomas J. Hawke, PhD	
	Skeletal Muscle Stem Cell Populations 77 • Muscle Repair and the Myogenic Satellite Cell 79 • Extrinsic Regulation of Myogenic Satellite Cells 83 • Special Populations, Therapies, and Myogenic Satellite Cells 85 • Summary 88	
CHAPTER 7	Emerging Molecular Trends in Muscle Damage Research	89
	Douglas J. Mahoney, PhD, and Mark A. Tarnopolsky, MD, PhD	
	The “Omic” Revolution 90 • Gene Expression 91 • Transcriptomic Technology 93 • Limitations of DNA Microarray Muscle Damage Study 100 • The Future of Omics in Muscle Damage Research 101 • Summary 102	

Part II Muscle Damage and Repair in Applied Situations

CHAPTER 8	Changes With Aging	105
	Susan V. Brooks, PhD	
	Physical Frailty 105 • Contraction-Induced Injury 106 • Increasing Resistance to Contraction-Induced Injury 111 • Summary 112	
CHAPTER 9	Duchenne Muscular Dystrophy	113
	Tommy G. Gainer, MS; Qiong Wang, MS; Christopher W. Ward, PhD; and Robert W. Grange, PhD	
	Overview 113 • Dystrophin Structure, Glycoprotein Complex, and Gene 114 • Scientific Investigation 117 • Issues for Investigation 118 • Summary 122	
CHAPTER 10	Estrogen and Gender Effects	125
	Peter M. Tiidus, PhD	
	Estrogen Effects on Tissues 125 • Estrogen Effects on Skeletal Muscle Damage 126 • Reduction of Postexercise Inflammatory Response 129 • Possible Influence of Estrogen on Skeletal Muscle Repair 132 • Summary 134	
CHAPTER 11	Diabetes	135
	Lisa Stenho-Bittel, PhD, PT; Muhammel Al-Jarrah, PhD, PT; and S. Janette Williams	
	Alterations in Glucose Transport 137 • Diabetes and Oxidative Stress 140 • Fatty Acid Metabolism and Diabetes 140 • Extracellular Matrix Changes 141 • Vascular Complications 142 • Exercise 142 • Summary 145	
CHAPTER 12	Workplace and Other Overuse Injuries	147
	Mary F. Barbe, PhD, and Ann E. Barr, PT, PhD	
	Muscle Response to Injuries 147 • Workplace- and Overuse-Related Muscular Disorders 149 • Potential Interventions 161 • Summary 162	
CHAPTER 13	Muscle Function During Human Gait	163
	Michael Pierrynowski, PhD	
	Characterizing Muscle Function 163 • Measuring Muscle Function During Gait 164 • Muscle Function During Normal Gait 167 • Impact of Muscle Damage on Gait 170 • Summary 172	
CHAPTER 14	Overtraining Injuries in Athletic Populations	173
	Teet Seene, PhD; Maria Umnova, PhD; Priit Kaasik, PhD; Karin Alev, PhD; and Ando Pehme, PhD	
	Insufficient Recovery and Overload 173 • Overtraining Effects on Skeletal Muscle 174 • Changes in Skeletal Muscle Biochemistry 178 • Protein Isoforms 179 • Summary 183	
CHAPTER 15	Intersubject Variability in Developing Exertional Muscle Damage	185
	Priscilla M. Clarkson, PhD, and Stephen P. Sayers, PhD	
	Factors Affecting Development of Rhabdomyolysis 185 • Variability in Responses to Eccentric Exercise 187 • Genetic Differences in High Responders 189 • Summary 191	

Part III Treatments and Interventions in Muscle Damage and Repair

CHAPTER 16	Massage Therapy	195
	Peter M. Tiidus, PhD	
	Massage Effects on Indirect Indices of Damage and Repair 195 • Massage Effects on Fibrosis, Muscle Tension, and Mood 200 • Summary 201	
CHAPTER 17	Ultrasound	203
	Dawn T. Gulick, PhD, PT	
	Mechanisms of Ultrasound 203 • Effects of Ultrasound on Tissue 208 • Phonophoresis (or Sonophoresis) 214 • Efficacy 215 • Summary 218	
CHAPTER 18	Physical Therapy and Related Interventions	219
	Richard M. Lovering, PhD, PT	
	Muscle Injury and Recovery 219 • Types of Muscle Injury 221 • Current Therapies 224 • Prevention 228 • Summary 229	
CHAPTER 19	Antioxidant Supplementation	231
	Allan H. Goldfarb, PhD	
	Potential Mechanisms of Exercise-Induced Muscle Damage 231 • Vitamin Supplementation 234 • Supplementation with Other Antioxidants 239 • Combined Antioxidant Supplementation 240 • Summary 242	
CHAPTER 20	Therapies for Myofascial Trigger Points	245
	Leesa K. Huguenin, MBBS, MS	
	Defining and Explaining Trigger Points 245 • Investigating Trigger Points 248 • Proposed Therapies 250 • Summary 254	
CHAPTER 21	Hyperbaric Oxygen and Drug Therapies	257
	Peter M. Tiidus, PhD	
	Hyperbaric Oxygen Therapy 257 • Drug Therapies 260 • Summary 261
