Preface	xiii
Introduction	1
1 The deposition, adsorption, and desorption of biomacromolecules	23
1.1 Elementary physico-chemical considerations	24
1.2 Monolayer adsorption	32
1.2.1 Effect of flow rate	38
1.3 Desorption	41
1.4 Competitive adsorption and protein exchange	42
1.5 Multilayer adsorption	44
1.6 Multicomponent adsorption	45
1.7 Adsorption onto heterogeneous surfaces	45
1.8 Conclusions	46
1.9 Further reading	47
2 Chemical and physical attributes of biomedical surfaces	49
2.1 Interaction energetics	51
2.1.1 Pairwise interactions	51
2.1.2 Protein surface heterogeneity	54
2.1.3 Three-body interactions	57
2.2 Wettability	59
2.2.1 The wetting transition	61
2.2.2 Wetting dynamics	62

2.2.3	Dewetting dynamics	63
2.2.4	Wetting on rough and chemically inhomogeneous surfaces	65
2.3	Morphology	66
2.3.1	Roughness	67
2.3.2	Porosity	70
2.4	Chemistry	71
2.4.1	The principles of molecular recognition	71
2.5	Biodegradability	78
2.6	Further reading	79
3	The basis of biofluid compatibility	81
3.1	Water	82
3.2	Hemocompatibility	85
3.2.1	The composition of human blood	86
3.2.2	Initial recognition events	87
3.2.3	The coagulation cascade	90
3.2.4	The immune system	94
3.2.5	The innate immune system	95
3.2.6	The adaptive immune system	96
3.2.7	Hemodialysis to combat renal failure	99
3.2.8	Stents	100
3.3	Hemocompatibility testing	102
3.4	Urine compatibility	106
3.5	Lachrymal secretions	108
3.6	Buccal secretions	108
3.7	Bioanalytical surfaces	110
3.8	Biocompatibility testing of fluids other than blood	111
3.8.1	Quantifying biocompatibility	111
3.9	Further reading	112
4	Cell and tissue interactions with artificial surfaces	113
4.1	Principles of eukaryotic cell architecture	114
4.2	Cell adhesion	117
4.3	Principles of tissue architecture	122

4.3.1	Inflamed tissue	123
4.4	Bone	123
4.5	Assimilation	125
4.6	The adhesion of cells to artificial surfaces	127
4.6.1	Cell spreading	129
4.6.2	Substratum topography effects on cell response	130
4.7	Implant cytotoxicity	132
4.8	Bacterial infection of implants	133
4.8.1	Bacterial structure and dynamics	134
4.8.2	Biofilms	137
4.8.3	Bacterial adhesion	137
4.9	Further reading	138
5	Lubrication, wear, and corrosion	139
5.1	Fundamentals of tribology	140
5.1.1	Dry friction	140
5.1.2	Lubrication	141
5.2	Friction in hip endoprostheses	143
5.3	Possible physiological effects of particles released as a result of wear	146
5.3.1	Physical properties of (nano)particles	148
5.3.2	Chemical properties of (nano)particles	148
5.3.3	Corrosion	152
5.4	Further reading	155
6	Surface generation, engineering, and coating	157
6.1	Machining	159
6.1.1	Mechanical operations	161
6.1.2	Laser micromachining	164
6.1.3	Electrochemical methods	168
6.2	Surface engineering	168
6.2.1	Plasma modification	170
6.2.2	Ion implantation	170
6.2.3	Anodizing	172
6.3	Surface coating	172

6.3.1	Physical vapor deposition (PVD)	174
6.3.2	Chemical vapor deposition (CVD)	175
6.3.3	Ceramic coatings by plasma spraying	179
6.3.4	Sol-gel coatings	180
6.3.5	Soft self-assembled coatings	182
6.4	Prospects	190
6.5	Further reading	190
7	The metrology of biomedical surfaces	193
7.1	Energetics	196
7.1.1	Wetting	196
7.1.2	Probe particles	198
7.2	Morphology	200
7.2.1	Contact techniques	200
7.2.2	Porosity	207
7.2.3	Noncontact (optical) techniques	208
7.2.4	Layer thickness and density	214
7.3	Dynamical structure measurements	215
7.3.1	Viscoelasticity	215
7.3.2	Nonimaging uses of scanning probe microscopy	215
7.3.3	Tribology	217
7.4	Chemical surface analysis	218
7.4.1	Electrical surface properties	221
7.4.2	Protein adsorption and desorption	221
7.4.3	Layer chemistry and multicomponent distribution	225
7.5	Cytometry	226
7.6	Analysis of cell internal components	233
7.6.1	Microarrays	234
7.6.2	Two-dimensional gel electrophoresis (2DGE)	239
7.7	Multifunctional metrology	241
7.8	Further reading	242
8	Prospects for smart and nanomaterials	245
8.1	The nature of responsiveness	248
8.2	Bioactive coatings	252

8.2.1	Cell adhesion-promoting coatings	254
8.2.2	Cell adhesion-inhibiting coatings	255
8.2.3	Drug delivery surfaces	255
8.2.4	Biocidal surfaces	257
8.3	Nanomaterials	258
8.4	A complexity sciences perspective for biomaterials design .	259
8.5	Recapitulation	261
8.6	Further reading	262
	List of acronyms	263
	About the author	265
	Index	267
