<i>Foreword</i>	ix
<i>Preface</i>	xi
<i>Notes on contributors</i>	xiii
<i>Introduction</i>	xv
1 The stability of minerals	1
1.1 The development of mineralogy	
1.2 The function of mineral collections	
1.3 Mineral diversity, formation and stability	
1.4 Mineral stability, processing and storage	
1.5 Mineral conservation: basic principles	
1.6 Conclusions	
References	
2 Conserving light-sensitive minerals and gems	11
2.1 The effects of light on minerals and gems	
2.2 The nature of colour centres	
2.3 Other light-induced colour change mechanisms	
2.4 Listings of photosensitive minerals and gems	
2.5 Recommendations for protection	
References	
3 Temperature- and humidity-sensitive mineralogical and petrological specimens	25
3.1 Temperature	
3.2 Relative humidity	
3.3 Technical considerations	
3.4 Controlled climates	
References	
4 Elements, alloys and miscellaneous minerals	51
4.1 Corrosion and oxidation of native elements and alloys	
4.2 Control of storage environment	
4.3 Effects of acid vapours emitted by timbers and other materials on calcareous specimens	
References	

5 Sulphides and allied minerals in collections	56
5.1 Reactivity and oxidation mechanisms of sulphides and allied minerals	
5.2 Sulphosalts: reactivity and care in collections	
References	
6 Pyrite and marcasite	70
6.1 Oxidation and conservation	
6.2 Historical review of oxidation	
6.3 Mechanisms for the oxidation of pyrite and marcasite in collections	
6.4 Conserving pyrite and marcasite	
References	
7 Meteorites	85
7.1 Arrivals from space	
7.2 The nature and origin of meteoritic materials	
7.3 A guide to identifying meteorites	
7.4 Meteorite falls and finds - nomenclature, documentation and statistics	
7.5 Conservation and storage of meteorites	
7.6 Curatorial guidelines	
7.7 Preparation of iron meteorites for display	
References	
8 The lunar sample collection	102
8.1 Lunar mineralogy	
8.2 Basic descriptions	
8.3 Curatorial laboratory	
8.4 Scientific support	
8.5 Educational programmes	
References	
9 Hazards for the mineral collector, conservator and curator	114
9.1 Fieldwork: safety considerations	
9.2 Hazards from minerals	
9.3 Laboratory safety and chemical handling	
9.4 Controlling exposure to hazardous substances	
9.5 Physical hazards	
References	
Appendices	122
I Effects of construction materials on rock and mineral collections	
II Collecting rocks and minerals	
III Cleaning minerals	
IV Repair and consolidation of minerals and rocks	
Index	135
