

CONTENTS

Foreword		ix
Chapter 1	Why the Study of Human Size is Important <i>Thomas T. Samaras</i>	1
Chapter 2	Human Scaling and the Body Mass Index <i>Thomas T. Samaras</i>	17
Chapter 3	Advantages of Taller Human Height <i>Thomas T. Samaras</i>	33
Chapter 4	Advantages of Shorter Human Height <i>Thomas T. Samaras</i>	47
Chapter 5	Body Height and its Relation to Chronic Disease and Longevity <i>Thomas T. Samaras</i>	63
Chapter 6	BMI and Weight: Their Relation to Diabetes, CVD, Cancer and all-cause Mortality <i>Thomas T. Samaras</i>	113
Chapter 7	The Obesity Epidemic, Birthweight, Rapid Growth and Superior Nutrition <i>Thomas T. Samaras</i>	147
Chapter 8	Long-lived Mutant, Gene Knockout and Transgenic Mice <i>Andrzej Bartke</i>	191
Chapter 9	The Evolutionary Ecology of Body Size with Special Reference to Allometry and Survivorship <i>C. David Rollo</i>	213
Chapter 10	Overview of Research on Giant Transgenic Mice with Emphasis on the Brain and Aging <i>C. David Rollo</i>	235

Chapter 11	Speculations on the Evolutionary Ecology of <i>Homo sapiens</i> with Special Reference to Body Size, Allometry and Survivorship <i>C. David Rollo</i>	261
Chapter 12	Birthweight, Height, Brain Size and Intellectual Ability <i>Thomas T. Samaras</i>	301
Chapter 13	Impact of Body Size on Resources, Pollution, the Environment and Economics <i>Thomas T. Samaras</i>	319
Chapter 14	Final Remarks on Human Size, Scaling and Ecological Implications <i>Thomas T. Samaras</i>	329
Appendix A	Symbols, Acronyms, and Abbreviations Used in Text	333
Appendix B	Technical Review of Molecular and Physiological Aspects Relevant to Size, Free Radicals and Aging <i>C. David Rollo</i>	341
Index		359
