Contents

1 Optimal Filtering for Polynomial Systems 1

1.1 Filtering Problem for Polynomial State over Linear Observations 1

1.1.1 Problem Statement 1

1.1.2 Optimal Filter for Polynomial State over Linear Observations 2

1.1.3 Optimal Third-Order State Filter for Automotive System 8

1.1.4 State Estimation of Bilinear Terpolymerization Process 10

1.2 Filtering Problem for Polynomial State with Partially Measured Linear Part 17

1.2.1 Problem Statement 17

1.2.2 Optimal Filter for Polynomial State with Partially Measured Linear Part over Linear Observations 18

1.2.3 Example 21

1.3 Filtering Problem for Polynomial State with Multiplicative Noise 24

1.3.1 Problem Statement 24

1.3.2 Optimal Filter for Polynomial State with Multiplicative Noise over Linear Observations 25

1.3.3 Example 29

1.4 Filtering Problem for Polynomial State with Partially Measured Linear Part and Multiplicative Noise 33

1.4.1 Problem Statement 33

1.4.2 Optimal Filter for Polynomial State with Partially Measured Linear Part and Polynomial Multiplicative Noise over Linear Observations 35

1.4.3 Cubic Sensor Optimal Filtering Problem 38

1.5 Filtering Problem for Linear State over Polynomial Observations 40
1.5.1 Problem Statement 40
1.5.2 Optimal Filter for Linear State over Polynomial Observations 41
1.5.3 Example: Third-Order Sensor Filtering Problem 43

2 Further Results: Optimal Identification and Control Problems 47
2.1 Optimal Joint State and Parameter Identification Problem for Linear Systems 47
2.1.1 Problem Statement 47
2.1.2 Optimal State Filter and Parameter Identifier for Linear Systems 48
2.1.3 Example 50
2.2 Dual Optimal Control Problems for Polynomial Systems 53
2.2.1 Optimal Control Problem for Bilinear State with Linear Input 53
2.2.2 Optimal Regulator for Terpolymerization Reactor 56
2.2.3 Optimal Control for Third-Order Polynomial State with Linear Input 61
2.2.4 Optimal Third-Order Polynomial Regulator for Automotive System 62
2.3 Optimal Controller Problem for Third-Order Polynomial Systems 65
2.3.1 Problem Statement 65
2.3.2 Separation Principle for Polynomial Systems 66
2.3.3 Optimal Controller Problem Solution 68
2.3.4 Optimal Third-Order Polynomial Controller for Automotive System 69

3 Optimal Filtering Problems for Time-Delay Systems 75
3.1 Filtering Problem over Observations with Multiple Delays 75
3.1.1 Problem Statement 75
3.1.2 Optimal Filter over Observations with Multiple Delays 76
3.1.3 Example 80
3.2 Filtering Problem for Linear Systems with State Delay 84
3.2.1 Problem Statement 84
3.2.2 Optimal Filter for Linear Systems with State Delay 85
3.2.3 Example 89
3.3 Filtering Problem for Linear Systems with State and Observation Delays 94
3.3.1 Problem Statement 94
3.3.2 Optimal Filter for Linear Systems with State and Observation Delays 95

3.3.3 Optimal Filter for Linear Systems with Commensurable State and Observation Delays 98
3.3.4 Example 99
3.3.5 Discussion 103
3.4 Filtering Problem for Linear Systems with State and Multiple Observation Delays 103
3.4.1 Problem Statement 103
3.4.2 Optimal Filter for Linear Systems with State and Multiple Observation Delays 105
3.4.3 Optimal Filter for Linear Systems with Commensurable State and Observation Delays 108
3.4.4 Example 110
3.5 Filtering Problem for Linear Systems with Multiple State and Observation Delays 113
3.5.1 Problem Statement 113
3.5.2 Optimal Filter for Linear Systems with Multiple State and Observation Delays 114
3.6 Alternative Optimal Filter for Linear State Delay Systems 118
3.6.1 Example 120
3.7 Filtering Problem for Nonlinear State over Delayed Observations 122
3.7.1 Problem Statement 122
3.7.2 Optimal Filter for Nonlinear State over Delayed Observations 123
3.7.3 Example 127

4 Optimal Control Problems for Time-Delay Systems 131
4.1 Optimal Control Problem for Linear Systems with Multiple Input Delays 131
4.1.1 Problem Statement 131
4.1.2 Optimal Control Problem Solution 132
4.1.3 Example 132
4.1.4 Proof of Optimal Control Problem Solution 134
4.1.5 Duality between Filtering and Control Problems for Time-Delay Systems 138
4.2 Optimal Control Problem for Linear Systems with Equal State and Input Delays 141
4.2.1 Problem Statement 141
4.2.2 Optimal Control Problem Solution 141
4.2.3 Example 142
4.2.4 Proof of Optimal Control Problem Solution 146
4.3 Optimal Control Problem for Linear Systems with Multiple State Delays 148
4.3.1 Problem Statement 148
4.3.2 Optimal Control Problem Solution 148
4.3.3 Example 150

4.3.4 Proof of Optimal Control Problem Solution 153
4.4 Optimal Control Problem for Linear Systems with Multiple State and Input Delays 156
4.4.1 Problem Statement 156
4.4.2 Optimal Control Problem Solution 157
4.4.3 Example 159
4.4.4 Proof of Optimal Control Problem Solution 163
4.5 Optimal Controller Problem for Linear Systems with Input and Observation Delays 166
4.5.1 Problem Statement 166
4.5.2 Separation Principle for Time-Delay Systems 167
4.5.3 Optimal Control Problem Solution 168
4.5.4 Example 168

5 Sliding Mode Applications to Optimal Filtering and Control 175
5.1 Optimal Robust Sliding Mode Controller for Linear Systems with Input and Observation Delays 175
5.1.1 Problem Statement 175
5.1.2 Design Principles for State Disturbance Compensator ... 176
5.1.3 Design Principles for Observation Disturbance Compensator 177
5.1.4 Robust Sliding Mode Controller Design for Linear System with Input and Observation Delays 179
5.1.5 Example 181
5.2 Optimal and Robust Control for Linear State Delay Systems ... 185
5.2.1 Optimal Control Problem 185
5.2.2 Optimal Control Problem Solution 185
5.2.3 Robust Control Problem 186
5.2.4 Design Principles 187
5.2.5 Robust Sliding Mode Control Design for Linear State Delay Systems 189
5.2.6 Example 189
5.2.7 Proof of Optimal Control Problem Solution 192
