

Table of Contents

Preface
Acknowledgements
 <u>Chapter 1</u>	
Review of future programs from 1994 ATOVS) to the EOS era	1
Historical background for IASI <i>B. Bizzari</i>	3
IASI, infrared interferometer for operations and research <i>F. Cayla</i>	9
Requirements for an Operational Interferometer Thermal Sounder <i>M. Perrone</i>	21
Development of a Fourier Transform Infrared sounder. IMG <i>H. Shimoda, T. Ogawa</i>	37
 <u>Chapter 2</u>	
Next generation IR sounders : temperature and moisture analysis	61
The "Advanced-3I (Improved Initialization Inversion)" method for the processing of next generation sounder observations <i>A. Chedin, N.A. Scott, F. Cheruy, B. Tournier</i>	63
Extraction of atmospheric signals from radiance measurements : some limitations <i>M.J. Uddstrom, L.M. McMillin</i>	85

GLA and LMD approaches to the processing of AIRS and IASI observations	101
<i>F. Cheruy, J. Susskind, N.A. Scott, A. Chedin, J. Joiner</i>	
The impact of the initial guess on the accuracy of satellite retrievals	113
<i>L.M. McMillin, M. Uddstrom</i>	
Vertical sounding capabilities with high spectral resolution atmospheric radiation measurements. A demonstration with the High resolution Interferometer Sounder (HIS)	131
<i>W.L. Smith, H.E. Revercomb, H.L. Huang, R.O. Knuteson</i>	
 <u>Chapter 3</u>	
Next generation IR sounders and cloud field analysis	147
Determination of temperature and moisture profiles in a cloudy atmosphere using AIRS/AMSU	149
<i>J. Susskind, M.T. Chahine, J. Joiner</i>	
Topics in optimal inversion schemes applied to atmospheric structure retrieval	163
<i>V. Cuomo, U. Amato, R. Rizzi, C. Serio, U. Tramutoli</i>	
Retrieval of cloud parameters by multiple high spectral resolution observations in the near infrared under conditions of varying solar illumination	175
<i>T.J. Kleespies</i>	
Spectral variability of light scattering by atmospheric ice crystals	191
<i>A. Macke</i>	
Detection of Polar Stratospheric Clouds with next generation IR sounders	205
<i>R. Meerkotter</i>	
Problems in cloud identification and clearing	215
<i>R. Rizzi, C. Serio, V. Cuomo</i>	
The potential of medium resolution spectral infrared measurements for high cloud studies	229
<i>D. Spänkuch</i>	

Modelling reflecting and semi-transparent cloud for infrared sounding	243
<i>P.D. Watts, A.J. Baran</i>	

Chapter 4

Next generation IR Sounder and surface characteristics analysis	263
--	-----

Infrared remote sensing of surface temperature and surface spectral emissivities	265
<i>F. Becker, Z. Li</i>	

Effects of spectral resolution on satellite surface temperature retrieval	285
<i>A.E. Lipton</i>	

Investigation of infrared emissivities of Sahara dust powders and quartz from space	299
<i>T. Takashima, K. Masuda</i>	

Chapter 5

Next Generation IR sounders and trace gas analysis	307
---	-----

Trace gas remote sounding from near IR sun glint observation with tunable etalons	309
<i>Tad. Aoki, M. Fukabori, T. Aoki</i>	

"High resolution observation of the Earth's atmosphere in the far infrared"	323
<i>B. Carli</i>	

Remote sensing of atmospheric trace constituents using MID-IR Fourier transform spectrometry	341
<i>H. Fischer</i>	

The measurement of global carbon monoxide using the Atmospheric Infrared Radiation Sounder (AIRS)	351
<i>L. Larrabee Strow</i>	

Chapter 6

Next generation IR observations : impact on weather and climate analysis	363
Direct use of satellite sounding radiances in numerical weather prediction	365
<i>J. Eyre, E. Andersson, A.P. McNally</i>	
Retrieval and assimilation : system considerations	381
<i>A. C. Lorenc</i>	
On measuring the greenhouse effect of Earth	395
<i>G.L. Stephens, A. Slingo, M. Well</i>	
Multi-year statistics of total cloud amounts from the Nimbus-7, ISCCP and coads data sets	419
<i>B.C. Weare</i>	

Chapter 7

Forward modelling	429
Transmittance coefficient generation for fast radiative transfer models. Application to new satellite sounding systems	431
<i>P. Brunel, L. Lavanant, G. Rochard</i>	
Review of existing spectral line data catalogs	443
<i>N. Husson, A. Chedin, B. Bonnet</i>	
CO ₂ Q-branch spectral line shapes for atmospheric remote sensing	459
<i>L. Larrabee Strow</i>	
Optimal spectral estimation algorithms for Michelson interferometer spectrometers.	477
<i>C. Serio, U. Amato, V. Tramutoli R. Rizzi, V. Cuomo</i>
