

Contents

Chapter I	Principles of Carbonate Sedimentation	1
	The Requisite Marine Environment: Warmth, Light, Water Movement	1
	Carbonate Production Is Basically Organic	4
	Principal Hydrographic Controls on Carbonate Accumulation The Local Origin of Carbonate Particles—Textural Inter- pretation and Classification	5
	Carbonate Deposition Is Rapid but Is Easily Inhibited and Therefore Sporadic during Geologic Time	7
	Carbonate Sediments and Rock Are Peculiarly Subject to Many Stages of Diagenesis	14
	Summary	16
	Summary	17
Chapter II	The Stratigraphy of Carbonate Deposits	20
	Definitions	20
	The Basic Facies Pattern	24
	Paleotectonic Settings for Carbonate Facies	29
	Stratigraphic Sequences, Geometry, and Facies of Carbonate Shelf Margins and Basins	33
	Stratigraphic Sequences in Carbonates of Epeiric Seas on Shelves and in Shallow Basins	46
Chapter III	Outline of Carbonate Petrography	56
	Techniques for Examining Carbonate Rocks	56
	Microfacies Interpretations	60
	Standard Microfacies Types	63
	Diagenetic Changes in Carbonate Sediments	69
	Biological Observations	71
	Glossary of Sedimentary Structures in Carbonate Rocks	75
	Environmental Analysis of a Carbonate Thin Section	86
	Significance of Color in Carbonate Rocks	89
	Clastic Content in Carbonates	90
	Porosity and Permeability	93
Chapter IV	The Advent of Framebuilders in the Middle Paleozoic	96
	The Earliest Buildups	96
	Silurian Buildups — Paleotectonic Settings	103
	Devonian Buildups	118
	Summary	140

Chapter V	The Lower Carboniferous Waulsortian Facies	148
	Relation of Waulsortian Facies to Regional Paleostucture	150
	Composition of Typical Waulsortian Facies	162
	Theories of Mound Origin	165
	Conclusions	167
Chapter VI	Pennsylvanian-Lower Permian Shelf Margin Facies in Southwestern United States of America	169
	Paleotectonic Setting, Geologic History, and Climate	169
	Special Organic Communities Forming Carbonate Buildups in Late Paleozoic Strata	171
	Examples of Permo-Pennsylvanian Carbonate Buildups	174
	Conclusions	198
Chapter VII	Late Paleozoic Terrigenous-Carbonate Shelf Cycles	202
	Introduction	202
	Yoredale Cycles	203
	Pennsylvanian and Wolfcampian Shelf Cyclothems of the Midcontinent and Southern Rocky Mountains	206
Chapter VIII	Permo-Triassic Buildups and Late Triassic Ecologic Reefs	217
	Permian Reef Complex	217
	The Middle Triassic of the Dolomites	233
	Upper Triassic Reef-Lined Banks and Basinal Mounds of Austria and Bavaria	244
	Similarities and Differences between Permian and Triassic Reef Complexes	254
Chapter IX	Reef Trends and Basin Deposits in Late Jurassic Facies of Europe and the Middle East	257
	Regional Settings	258
	Basic Microfacies	262
	The Reef Girdle of Central Europe	266
	The Solnhofen Facies	274
Chapter X	Shoaling upward Shelf Cycles and Shelf Dolomitization	281
	Oolite-Grainstone Cycles	283
	Lime Mud-Sabkha Cycles	297
	Platform Cycles with Intense Diagenesis	304
	Dolomitization of Carbonate Banks and Interior Shelf Cycles	310
	Conclusions	318

Chapter XI The Rise of Rudists; Middle Cretaceous Facies in Mexico and the Middle East 319

The Rudist Bivalves 319

Shelf Margin and Plattform-Bank Interior Facies of Middle Cretaceous of Mexico and the Gulf Coast 325

Middle and Lower Cretaceous Facies in the Middle East . . 339

Chapter XII Summary 348

Stratigraphic Principles 348

Nine Standard Facies Belts in an Ideal Model of a Carbonate Complex 350

Three Major Types of Shelf Margin Profiles 361

Carbonate Mounds and Associated Ecologic Reefs 364

Interrelations of Parameters Controlling and Modifying Carbonate Accumulations 369

Review of Tectonic Settings for Carbonate Buildups and Cycles 375
