Foreword from <i>The Gastronomical Me</i> , M. F. K. Fisher,	xi
Preface to the Second Edition	xii
Acknowledgments	xiv
Introduction to the Second Edition	
<i>Carole Counihan and Penny Van Esterik</i>	1
Foundations	
1. The Problem of Changing Food Habits	17
<i>Margaret Mead</i>	
Mead's early government work explores recommendations for changing American food habits and establishes the importance of food studies.	
2. Toward a Psychosociology of Contemporary Food Consumption	28
<i>Roland Barthes</i>	
French structuralists explain how food acts as a system of communication and provides a body of images that mark eating situations.	
3. The Culinary Triangle	36
<i>Claude Lévi-Strauss</i>	
This classic structuralist statement, often critiqued, shows how food preparation can be analyzed as a triangular semantic field, much like language.	
4. Deciphering a Meal	44
<i>Mary Douglas</i>	
Hebrew dietary laws are not irrational but rather precoded messages about purity, defilement, and holiness as wholeness.	
5. The Abominable Pig	54
<i>Marvin Harris</i>	
Materialists like Harris reject symbolic and structuralist explanations and explain food prohibitions based on economic and ecological utility.	
6. The Nourishing Arts	67
<i>Michel de Certeau and Luce Giard</i>	
The "practice of everyday life" includes how French women constitute tradition as they carry out daily meal preparation.	

7. The Recipe, the Prescription, and the Experiment 78  
*Jack Goody*  
 Shopping lists, menus and recipes are among the earliest and most enduring evidence of written instructions for food use, reflecting significant advances in human knowledge.
8. Time, Sugar, and Sweetness 91  
*Sidney W. Mintz*  
 Colonialism made high-status sugar produced in the Caribbean into a working class staple.
9. Anorexia Nervosa and its Differential Diagnosis 104  
*Hilde Bruch*  
 Renowned eating disorder psychiatrist Bruch defines true anorexia nervosa as involving distorted body image, inaccurate perception of hunger, hyperactivity, and an overwhelming sense of ineffectiveness.
- Gender and Consumption
10. Fast, Feast, and Flesh: The Religious Significance of Food to Medieval Women 121  
*Caroline Walker Bynum*  
 Medieval women used food for personal religious expression, including giving food away, exuding foods from their bodies, and undertaking fasts to gain religious and cultural power.
11. The Appetite as Voice 141  
*Joan Jacobs Brumberg*  
 The origins of anorexia nervosa can be found in the nineteenth century fasting of Victorian girls, who used control of appetite as an important form of self-expression.
12. Anorexia Nervosa: Psychopathology as the Crystallization of Culture 162  
*Susan Bordo*  
 Anorexia nervosa can be viewed as a culturally over-determined psychological disorder resulting from longstanding cultural ideologies related to mind-body dualism, control, and gender power.
13. Feeding Hard Bodies: Food and Masculinities in Men's Fitness Magazines 187  
*Fabio Parasecoli*  
 Men's fitness magazines define masculinity through discussions of food and body, increasingly involving men in concerns about constructing corporeal perfection and regulating consumption to build muscle and strength.

14. The Overcooked and Underdone: Masculinities in Japanese Food Programming 202  
*T. J. M. Holden*  
 Cooking shows featuring male chefs predominate on Japanese television and propagate one-dimensional definitions of masculinity based on power, authority, and ownership of consumer commodities.
15. Japanese Mothers and *Obentōs*: The Lunch-Box as Ideological State Apparatus 221  
*Anne Allison*  
 Japanese mothers, in preparing elaborate lunch-boxes for their preschool children, reproduce state ideologies of power.
16. Conflict and Deference 240  
*Marjorie DeVault*  
 In feeding others, women sometimes reproduce their own subordination by deferring to men's preferences and thus reinforce the "naturalness" of women's service and undermine progress toward reciprocal nurturance.
17. Feeding Lesbigeay Families 259  
*Christopher Carrington*  
 Because feeding work is complex, laborious, and highly gendered, it is problematic in lesbigeay families because a full accounting of it would destroy illusions of equality and call into question masculinity of gay men who do it and femininity of lesbians who do not.
- Food and Identity Politics
18. How to Make a National Cuisine: Cookbooks in Contemporary India 289  
*Arjun Appadurai*  
 Cookbooks written for an Anglophone audience tell unusual tales about the development of a national cuisine, the boundaries of edibility, and the logic of meals in post-colonial India.
19. "Real Belizean Food": Building Local Identity in the Transnational Caribbean 308  
*Richard Wilk*  
 Transformations in Belizean food from colonial times to the present demonstrate transnational political, economic and culinary influences that have affected the ways Belizean people define themselves and their nation.
20. Let's Cook Thai: Recipes for Colonialism 327  
*Lisa Heldke*  
 Cultural food colonialism is reproduced by food adventurers who seek out ethnic foods to satisfy their taste for the exotic other.

21. More than Just the “Big Piece of Chicken”: The Power of Race, Class, and Food in American Consciousness 342  
*Psyche Williams-Forson*  
 Ethnographic, historical, and literary research reveals not only controlling and damaging stereotypes about African Americans and chicken but also the ways Black women have used chicken as a form of resistance and community survival.
22. *Mexicanas’ Food Voice and Differential Consciousness in the San Luis Valley of Colorado* 354  
*Carole Counihan*  
 Food-centered life histories portray the voices and perspectives of traditionally muted Hispanic women of rural southern Colorado whose food stories reveal differential behaviors and consciousness which promote empowerment.
23. Rooting Out the Causes of Disease: Why Diabetes is So Common Among Desert Dwellers 369  
*Gary Paul Nabhan*  
 Skyrocketing adult-onset diabetes among desert dwelling Seri Indians of Northern Mexico suggests that changes in diet have caused this major health problem and that traditional desert foods—especially legumes, cacti and acorns—are protective.
24. Slow Food and the Politics of Pork Fat: Italian Food and European Identity 381  
*Alison Leitch*  
 The Slow Food Movement has emerged as an important political force to preserve traditional, artisan foods such as lard from Colonnata, which serves as a case study revealing the politics of Slow Food in the context of European market economies.
25. Taco Bell, Maseca, and Slow Food: A Postmodern Apocalypse for Mexico’s Peasant Cuisine? 400  
*Jeffrey M. Pilcher*  
 Italy’s Slowfood Movement offers strategies for the maintenance of traditional, local, and sustainable Mexican food, which is threatened by the economies of scale and market dominance of multinational giants like Taco Bell.
26. The Raw and the Rotten: Punk Cuisine 411  
*Dylan Clark*  
 Punk cuisine—based on scavenged, rotten, and/or stolen food—challenges the hierarchy, commodification, toxicity, and environmental destruction of the capitalist food system.

27. Salad Days: A Visual Study of Children's Food Culture 423  
*Melissa Salazar, Gail Feenstra, and Jeri Ohmart*

This chapter is available with color illustrations online at [www.routledge.com/textbooks/9780415977777](http://www.routledge.com/textbooks/9780415977777). Photographic documentation of children's self-serve salads at Northern California elementary schools was designed to assess the nutritional content of children's meals, but also conveyed rich information about children's tastes, food aesthetics, and definitions of appropriate meals.

### Political Economy of Food: Transformation and Marginalization

28. The Chain Never Stops 441  
*Eric Schlosser*

The mistreatment of meatpacking workers in the United States is linked to the high rates of trauma in this dangerous industry and reveals general problems of corporate food production.

29. Whose "Choice"? "Flexible" Women Workers in the Tomato Food Chain 452  
*Deborah Barndt*

"Flexible," part-time, low-wage female labor is an increasingly important component of the global food economy that insures profits for agribusinesses, fast food corporations, and supermarkets, but threatens the livelihood and food security of women and families.

30. The Politics of Breastfeeding: An Advocacy Update 467  
*Penny Van Esterik*

The commodification of baby food has had severe consequences, but advocacy groups actively resist the promotional tactics of transnational food and pharmaceutical companies.

31. The Political Economy of Obesity: The Fat Pay All 482  
*Alice Julier*

The culture-wide denigration of the "obesity epidemic" is not only due to its health consequences, but also to the political and economic benefits to the food corporations, the diet industry, and the health professions.

32. Of Hamburger and Social Space: Consuming McDonald's in Beijing 500  
*Yunxiang Yan*

In Beijing Chinese consumers associate fast food with being American and being modern. They enjoy the standardization of meals, the hospitable service, the democratic environment, and the cleanliness, which create a desirable space to socialize and linger.

33.	<p>“Plastic-bag Housewives” and Postmodern Restaurants?: Public and Private in Bangkok’s Foodscape  <i>Gisèle Yasmeen</i></p> <p>Bangkok women can pick up small plastic bags of excellent quality traditional dishes that go with rice at local vendors near their home or workplace.</p>	523
34.	<p>The Political Economy of Food Aid in an Era of Agricultural Biotechnology  <i>Jennifer Clapp</i></p> <p>The advent of genetically modified organisms (GMOs) has seriously affected food aid, even in the context of famine and extreme hunger.</p>	539
35.	<p>Street Credit: The Cultural Politics of African Street Children’s Hunger  <i>Karen Coen Flynn</i></p> <p>In Mwanza, Tanzania, homeless children acquire food by working at market stands and restaurants, scavenging garbage, stealing, trading sex for food, and begging. The importance of charity suggests rethinking Sen’s entitlement theory explanation of hunger.</p>	554
36.	<p>Want Amid Plenty: From Hunger to Inequality  <i>Janet Poppendieck</i></p> <p>Because of great need, many U.S. volunteers feed the hungry, but charity not only fails to solve the underlying causes of hunger—poverty and inequality—but contributes to it by offering token rather than structural solutions and taking the government off the hook.</p>	572
