<i>Preface</i>	ix
<b>Part 1 Define the Problem</b>	<b>1</b>
1. <b>Instruction, Instructional Systems and the Systems Approach</b>	<b>3</b>
1.1 Education and training: a question of goals, 3; 1.2 Instruction: what this book is about, 4; 1.3 Systems thinking, 5; 1.4 Defining problems in systems terms, 9; 1.5 Educational technology, 11; 1.6 An analysis of the growth and development of educational technology, 14; 1.7 The systems approach, 18; 1.8 Heuristics for instructional design, 24; 1.9 Levels of instructional design, 30	
2. <b>Approaches to Problems in Education and Training</b>	<b>31</b>
2.1 Macro and micro problems, 31; 2.2 Some basic viewpoints on the aims and problems of education, 33; 2.3 Industrial training, 36; 2.4 Trend towards the systems view, 37	
3. <b>The How and Why of Performance Objectives</b>	<b>43</b>
3.1 Aims and objectives in education and training, 43; 3.2 Extending the statement of objectives: the test instrument, 44; 3.3 Levels of objectives, 46; 3.4 When and how to state precise objectives, 46; 3.5 Selecting project objectives, 49; 3.6 Checking objectives for compatibility, 50; 3.7 Objections to objectives, 50; 3.8 The systems approach is based on objectives, 55; 3.9 Summary and preview, 55	
4. <b>The System in Its Environment</b>	<b>65</b>
4.1 The problem and its context, 65; 4.2 Case studies in problem definition, 66	
<b>Part 2 Analyse the Problem</b>	<b>79</b>
5. <b>From Project Objectives to Instructional Objectives</b>	<b>80</b>
5.1 The roads to instructional design, 80; 5.2 Level 1 analysis, 81; 5.3 Level 2 analysis, 83; 5.4 Summary, 93	
6. <b>Is Instruction the Solution?</b>	<b>95</b>
6.1 Approaches to the analysis of human performance problems, 95; 6.2 The systems approach applied to performance problem analysis, 98; 6.3 Analysis of performance problems, 101; 6.4 Training (and other) needs analysis, 109	
7. <b>Techniques and Procedures for Analysis at Levels 1 and 2</b>	<b>120</b>
8. <b>The Analysis of the Worth and Practicality of a Solution</b>	<b>151</b>
8.1 Introduction, 151; 8.2 A schema of factors affecting the worth and practicality of a given solution, 153; 8.3 Factors affecting the value of a solution, 154; 8.4 Factors affecting the cost of solving the problem, 155; 8.5 Factors affecting the practicality of system development, 158; 8.6 Factors affecting the practicality of system utilization, 159; 8.7 Developing the schema, 160; 8.8 Making the final decision, 160; 8.9 Going ahead, 161	

**9. Theories of Learning and Instruction**

165

9.1 The educational psychology battleground, 165; 9.2 The behaviourist position as exemplified by Skinner, 166; 9.3 The neo-behaviourist viewpoint exemplified by R Gagné, 168; 9.4 The cognitive/developmental viewpoint as exemplified by Piaget and Bruner, 171; 9.5 The subject matter viewpoint as exemplified by Ausubel, 173; 9.6 The cybernetic viewpoint as exemplified by Landa, 174; 9.7 Comparisons between the theories, 176; 9.8 The mastery learning model, 181; 9.9 Cyclic learning models, 183; 9.10 The cybernetics viewpoint – adaptive learning models, 184; 9.11 Summary and synthesis, 185

**10. From Instructional Objectives to Instructional Decisions:  
Analysis Levels 3 and 4**

187

10.1 Where are we going?, 187; 10.2 Level 3 analysis, 189; 10.3 The 'performance-type' approach of Mager and Beach, 192; 10.4 The 'CRAMP' model, 193; 10.5 The three models compared, 196; 10.6 Level 4 analysis, 203; 10.7 Similarities and differences between the models, 213; 10.8 When to perform a deep analysis, 215

**11. Plugging the Gaps in Present Approaches to Instructional Design**

216

11.1 Where we are going in this chapter, 216; 11.2 The missing domain – social, interpersonal, interactive, 216; 11.3 The affective domain – feelings or skills?, 224; 11.4 The neglected domain – physical skills, 227; 11.5 The cognitive domain – knowledge or skill?, 235

**12. Analysis of Knowledge and Skills: A Modified Approach**

241

12.1 The knowledge schema, 242; 12.2 The skills schema, 250; 12.3 The skill cycle, 252; 12.4 Analysis of some learning situations, 260; 12.5 Conclusion, 265

**13. The Four Levels of Instructional Design**

269

13.1 The four levels of analysis reviewed, 269; 13.2 The four design levels, 270; 13.3 Alternative 1: exit after level 1 analysis, 272; 13.4 Alternative 2: exit after level 2 analysis, 273; 13.5 Alternative 3: exit after level 3 analysis, 274; 13.6 Alternative 4: continue through to level 4 analysis, 275; 13.7 Defining the terminology, 276; 13.8 Designing the instructional process, 278; 13.9 Overview of the design process, 279

**14. The Question of Sequence**

281

14.1 Decisions at level 1, 281; 14.2 Decisions at level 2, 290

**15. Strategies, Plans and Methods**

292

15.1 Level 1: overall instructional strategies, 292; 15.2 Strategies for the teaching of knowledge, 296; 15.3 Matching instructional strategy to skill category, 300; 15.4 Level 2: developing a plan, 304; 15.5 A directory of commonly used instructional methods, 307

**16. Grouping**

324

16.1 Decisions at level 1: the data we have so far, 324; 16.2 Group or individual learning?, 326; 16.3 Grouping decisions for knowledge content, 327; 16.4 Grouping decisions for the skills content, 329; 16.5 Decisions at level 2: the group structure, 330; 16.6 Commonly used group structures, 333

**17. Media Selection**

339

17.1 Introduction, 339; 17.2 Media selection decisions at level 1, 343; 17.3 Media selection decisions at level 2, 348

**18. Control**

360

18.1 Control strategies, 360; 18.2 The output measures, 360; 18.3 Output controls, 361; 18.4 The control system, 363

<b>19. Evaluation</b>	<b>366</b>
19.1 The evaluation process, 366; 19.2 Evaluation strategies, 367; 19.3 Basic concepts in evaluation, 369; 19.4 Decisions at level 1, 372; 19.5 Decisions at level 2, 373; 19.6 Specific evaluation techniques, 374	
<b>20. Why Projects Fail</b>	<b>380</b>
20.1 Stages in implementing the plan, 380; 20.2 Scale effect, 381
