

# contents

---

## one

---

growth of the concept	1
THE MEDIEVAL MYTH,	7
JAMES HUTTON: THE CONCEPT OF UNIFORMITARIANISM,	3
WERNER: THE DOCTRINE OF NEPTUNISM,	4
CHARLES LYELL: THE ACCEPTANCE OF UNIFORMITARIANISM,	7
UNIFORMITARIANISM TODAY,	7
ORGANIC EVOLUTION: THE CRUCIAL REQUIREMENT OF TIME,	9
ESTIMATES OF GEOLOGIC TIME BASED ON SALINITY,	12
ESTIMATES BASED ON RATES OF DEPOSITION,	13
KELVIN'S ESTIMATES,	15
DISCOVERY OF RADIOACTIVITY,	16
THE MAGNITUDE OF GEOLOGIC TIME,	18

## two

---

the rock record	20
SEDIMENTARY ROCKS,	20
MAJOR PATTERNS OF SEDIMENT DISTRIBUTION,	26
SEDIMENTARY ENVIRONMENTS,	28
SEDIMENTARY STRUCTURES,	32
THE LOCAL SECTION,	35
FACIES,	41
GAPS IN THE RECORD,	45

## three

---

the time-stratigraphic record	52
EARLY EFFORTS TO TIE TIME TO ROCKS,	52
DISCOVERY OF ORGANIC EXTINCTION,	55
FOUNDING OF THE GEOLOGIC SYSTEMS,	56
TIME-STRATIGRAPHIC UNITS AND GEOLOGIC TIME UNITS,	60
BIOSTRATIGRAPHIC UNITS,	64
UNCONFORMITY-BOUNDED UNITS,	64
THE PROBLEM OF SUBDIVIDING PRECAMBRIAN TIME,	65

## four

---

correlation, stratigraphic mapping, and paleogeography	68
MEANING OF CORRELATION,	68
THE PROBLEM OF RECOGNIZING FACIES,	70
TIME CORRELATION BY PHYSICAL MEANS,	74
LITHOFACIES MAPS,	83
PALEOGEOGRAPHIC MAPS,	84
CHANGING POSITIONS OF THE CONTINENTS,	86
PLATE TECTONICS,	93

## five

---

biostratigraphy	94
GEOGRAPHIC DIFFERENCES IN ORGANISMS,	95
CHANGES IN ORGANISMS THROUGH TIME,	96
COMBINED EFFECTS OF GEOGRAPHIC DIFFERENCES AND TIME CHANGES IN ORGANISMS,	98
THE BASIS FOR BIOSTRATIGRAPHIC ZONATION,	99
INTERPRETING THE RECORD,	101
CONCURRENT RANGE ZONES,	107
INDEX FOSSILS AND PEAK ZONES,	110
QUANTITATIVE BIOSTRATIGRAPHIC METHODS,	112

# six

---

radiometric dating	118
HOW RADIOMETRIC DATING WORKS,	119
POTASSIUM-ARGON METHOD,	123
RUBIDIUM-STRONTIUM METHOD,	125
URANIUM-LEAD METHOD,	129
METHODS FOR THE RECENT GEOLOGIC PAST,	131
RADIOMETRIC TIME SCALE,	133
SUBDIVISION OF PRECAMBRIAN TIME,	135
AGE OF THE EARTH,	137
suggestions for further reading	141
literature cited	143
index	145
geologic time scale	152
