1 Science, for the Benefit of Mankind

<i>H.H. Rohrer</i>	1
1.1 Introduction	1
1.2 Which Benefit? Which Mankind?	1
1.3 Mankind in Science	2
1.4 Mankind and Benefits in Society	3
1.5 Science, for the Benefit of Mankind	4
1.6 Freedom in Science	4
1.7 Reform of Science	6
1.8 The Benefits of the Future?	7

Part I Novel Materials for Electronics

2 Trends of Condensed Matter Science: A Personal View

<i>H. Fukuyama</i>	11
2.1 Introduction	11
2.2 Carrier Doping into Insulators	13
2.2.1 Doped Band Insulators	13
2.2.2 Doped Mott Insulators	15
2.3 From Bulk to Local	16
2.4 Electronic Properties of Molecular Solids	18
2.4.1 Strongly Correlations in Molecular Solids	19
2.4.2 p-d Systems	22
2.5 Electronic Properties of Molecular Assemblies	24
2.6 Some Concrete Targets of <i>Bio-Material Science</i>	25
References	26

3 Measurements and Mechanisms of Single-Molecule Conductance Switching

<i>A.M. Moore, B.A. Mantooth, A.A. Dameron, Z.J. Donhauser, P.A. Lewis, R.K. Smith, D.J. Fuchs, and P.S. Weiss</i>		29
3.1	Introduction	29
3.2	Methods	30
3.2.1	Sample Preparation	30
3.2.2	Imaging	33
3.2.3	Apparent Height Determination	34
3.2.4	Dipole Moment Calculations	34
3.3	Results and Discussion	35
3.3.1	Stochastic Conductance Switching	35
3.3.2	Conductance Switching Mechanisms	36
3.3.3	Driven Conductance Switching	41
3.4	Conclusions	43
References		44

4 Exploration of Oxide Semiconductor Electronics Through Parallel Synthesis of Epitaxial Thin Films

<i>M. Kawasaki</i>		49
4.1	Introduction	49
4.2	Atomically Regulated Oxide Epitaxy	51
4.3	Integration of Oxide Epitaxy	54
4.4	High Throughput Characterization	57
4.5	Oxide Semiconductors	60
4.5.1	Ferromagnetic Oxide Semiconductors	60
4.5.2	Optical Devices	64
4.5.3	Field Effect Devices	67
4.6	Conclusion and Future Prospects	69
References		71

5 Epitaxial Growth and Transport Properties of High-Mobility ZnO-Based Heterostructures

<i>A. Tsukazaki, A. Ohtomo, and M. Kawasaki</i>		77
References		84

6 A Scaling Behavior of Anomalous Hall Effect in Cobalt Doped TiO₂

<i>T. Fukumura, H. Toyosaki, K. Ueno, M. Nakano, T. Yamasaki, and M. Kawasaki</i>		87
References		92

7 Synthesis, Phase Diagram, and Evolution of Electronic Properties in Li_xZrNCl Superconductors

<i>Y. Taguchi, A. Kitora, T. Takano, T. Kawabata, M. Hisakabe, and Y. Iwasa</i>		93
References		100

8 Ambipolar Tetraphenylpyrene (TPPy) Single-Crystal Field-Effect Transistor with Symmetric and Asymmetric Electrodes

<i>S.Z. Bisri, T. Takahashi, T. Takenobu, M. Yahiro, C. Adachi, and Y. Iwasa</i>	103
References	109

9 Bulk Zinc Oxide and Gallium Nitride Crystals by Solvothermal Techniques

<i>D. Ehrentraut and T. Fukuda</i>	111
9.1 Introduction	111
9.2 Hydrothermal Growth of ZnO	113
9.3 Ammonothermal Growth of Gallium Nitride	117
9.4 Conclusion	119
References	119

Part II Materials for Ecological and Biological Systems

10 High-Quality Si Multicrystals with Same Grain Orientation and Large Grain Size by the Newly Developed Dendritic Casting Method for High-Efficiency Solar Cell Applications

<i>K. Nakajima, K. Fujiwara, and N. Usami</i>	123
10.1 In-Situ Observation System to Directly Observe the Growing Interface of Si Crystals	125
10.2 Formation Mechanism of Parallel Twins Related to Si-Faceted Dendrite Growth	129
10.3 Growth of High-Quality Si Multicrystals by the Dendritic Casting Method	131
10.4 Solar Cells Prepared by Si Multicrystals with the Same Orientation	135
10.5 Quality of Si Multicrystals Grown by the Dendritic Casting Method	137
10.6 Summary	139
References	140

11 Growth of High-Quality Polycrystalline Si Ingot with Same Grain Orientation by Using Dendritic Casting Method

<i>K. Fujiwara, W. Pan, N. Usami, M. Tokairin, Y. Nose, A. Nomura, T. Shishido, and K. Nakajima</i>	141
11.1 Introduction	141
11.2 Experiments	142
11.3 Results and Discussion	142
11.3.1 Direct Observations of Crystal Growth Behavior of Si Melt	142

11.3.2	Dendritic Casting Method	144
11.3.3	Growth of Poly-Si Ingot by Dendritic Casting Method	145
11.4	Conclusion	147
	References	147
12 Floating Cast Method as a New Growth Method of Silicon Bulk Multicrystals for Solar Cells		
	<i>I. Takahashi, Y. Nose, N. Usami, K. Fujiwara, and K. Nakajima</i>	149
12.1	Introduction	149
12.2	Experimental Procedure	150
12.3	Results and Discussion	151
12.4	Summary	156
	References	156
13 Dehydrating Reaction of Hydrides Enhanced by Microwave Irradiation		
	<i>M. Matsuo, Y. Nakamori, K. Yamada, T. Tsutaoka, and S. Orimo</i>	157
13.1	Introduction	157
13.2	Experimental	158
13.3	Results and Discussion	158
13.3.1	Microwave Irradiation on Metal Hydrides MH_n	158
13.3.2	Microwave Irradiation on Complex Hydrides MBH_4	160
13.3.3	Mechanism of Rapid Heating of TiH_2 and $LiBH_4$	161
13.3.4	Difference of the Amounts of Released Hydrogen Between TiH_2 and $LiBH_4$	163
13.3.5	Microwave Irradiation on the Composites of $LiBH_4$ and TiH_2	164
13.4	Summary	165
	References	166
14 Mechanically Multifunctional Properties and Microstructure of New Beta-Type Titanium Alloy, Ti-29Nb-13Ta-4.6Zr, for Biomedical Applications		
	<i>M. Nakai, M. Niinomi, and T. Akahori</i>	167
14.1	Introduction	167
14.2	Experimental Procedures	168
14.2.1	Alloying Elements and Alloy Composition	168
14.2.2	Thermomechanical Treatment	169
14.2.3	Microstructure Analysis	169
14.2.4	Mechanical Tests	169
14.2.5	Evaluation of Mechanical Biocompatibility	171
14.3	Results and Discussion	171
14.3.1	Microstructure	171
14.3.2	Young's Modulus	174
14.3.3	Tensile Properties	176
14.3.4	Superelasticity	177

14.3.5	Fatigue Properties	179
14.3.6	Mechanical Biocompatibility	180
14.4	Conclusions	182
	References	182

Part III Precise Control of Microscopic and Complex Systems

15 Atom Probe Tomography at The University of Sydney

	<i>B. Gault, M.P. Moody, D.W. Saxe, J.M. Cairney, Z. Liu, R. Zheng, R.K.W. Marceau, P.V. Liddicoat, L.T. Stephenson, and S.P. Ringer</i> ...	187
15.1	Introduction	187
15.2	Field Evaporation Theory	189
15.3	Atom Probe Tomography	191
	15.3.1 Projection of the Ions: the Third Dimension	191
	15.3.2 Pulsing Modes	193
15.4	Specimen Preparation	194
	15.4.1 'Cut-Out' Method	195
	15.4.2 'Lift-Out' Method	197
15.5	Experimental	198
15.6	The Dual Beam SEM/FIB	201
15.7	Applications: Nanostructural Analysis of Materials	202
	15.7.1 Al-Cu-Mg Alloys	204
	15.7.2 Fe-Base Alloys: Femimnal Spinodal Alloy	206
	15.7.3 Al-Zn-Mg-Cu Alloys	209
15.8	Summary	212
	References	213

16 A Study on Age Hardening in Cu-Ag Alloys by Transmission Electron Microscopy

	<i>E. Shizuya and T.J. Konno</i>	217
16.1	Introduction	217
16.2	Experimental Procedure	218
16.3	Results	219
16.4	Discussion	224
16.5	Conclusions	225
	References	226

17 Rubber-Like Entropy Elasticity of a Glassy Alloy

	<i>M. Fukuhara, A. Inoue, and N. Nishiyama</i>	227
17.1	Introduction	227
17.2	Experimental	228
17.3	Results and Discussions	229
	17.3.1 Temperature Dependence of the Elastic Parameters	229
	17.3.2 Gough-Joule Effect	232

17.4 Conclusion	233
References	233
18 Formation and Mechanical Properties of Bulk Glassy and Quasicrystalline Alloys in Zr-Al-Cu-Ti System	
<i>J.B. Qiang, W. Zhang, G.Q. Xie, and A. Inoue</i>	235
18.1 Introduction	235
18.2 Experimental	236
18.3 Results and Discussion	236
18.3.1 Formation of BMG and QCs by Liquid Cooling	236
18.3.2 Formation of Bulk QCs by Glass Devitrification	240
18.3.3 Mechanical Properties of BMG and Bulk QCs	241
18.4 Conclusions.....	243
References	244
19 Fabrication and Characterization of Metallic Glassy Matrix Composite Reinforced with ZrO₂ Particulate by Spark Plasma Sintering Process	
<i>G.Q. Xie, D.V. Louzguine-Luzgin, W. Zhang, H. Kimura, and A. Inoue</i>	245
19.1 Introduction	245
19.2 Experimental Procedures	247
19.3 Results	248
19.3.1 Preparation of Metallic Glassy Alloy Powders	248
19.3.2 Fabrication and Characterization of Metallic Glassy Matrix Composite	249
19.3.3 Mechanical Properties of Metallic Glassy Matrix Composite	252
19.4 Discussion	253
19.5 Conclusions.....	254
References	255
20 Nucleation and Growth of Thin Pentacene Films Studied by LEEM and STM	
<i>J.T. Sadowski, A. Al-Mahboob, Y. Fujikawa, and T. Sakurai</i>	257
20.1 Introduction	257
20.2 Experimental Setup.....	258
20.3 Results and Discussion	261
20.3.1 Highly Ordered Pentacene Films on Bi(0001)	263
20.3.2 Anisotropic Growth of Pentacene	269
20.3.3 Self-Polycrystallization in Epitaxial Pentacene Films on H-Si(111)	272
20.4 Conclusions.....	277
References	278

21 Mechanism of Chiral Growth of 6,13-Pentacenequinone Films on Si(111)

<i>A. Al-Mahboob, J.T. Sadowski, T. Nishihara, Y. Fujikawa, and T. Sakurai</i>	281
21.1 Introduction	281
21.2 Experimental and Calculation Procedures	282
21.3 Results and Discussion	282
21.3.1 Growth and Thin Film Phase of PnQ on Si(111)	282
21.3.2 Growth Anisotropy	286
21.3.3 Chiral Evolution of the Islands	290
21.4 Conclusions	292
References	292

22 GaN Integration on Si via Symmetry-Converted Silicon-on-Insulator

<i>Y. Fujikawa, Y. Yamada-Takamura, Z.T. Wang, G. Yoshikawa, and T. Sakurai</i>	295
22.1 Introduction	295
22.2 Interface Control of GaN Film Growth on Si(111)	296
22.3 Integration of Wurtzite GaN on Si(001) via Symmetry-Converted SOI	298
22.4 Conclusions	302
References	302

23 Functional Probes for Scanning Probe Microscopy

<i>K. Akiyama, T. Eguchi, M. Hamada, T. An, Y. Fujikawa, Y. Hasegawa, and T. Sakurai</i>	305
23.1 Introduction	305
23.2 Fabrication of Functional Probes	306
23.2.1 Fabrication of a Metal-Tip Cantilever for KFM and AFM Lithography	306
23.2.2 Fabrication of a Glass-Coated Tungsten Tip for SR-STM	308
23.3 Characterization of the Functional Probes	309
23.3.1 TEM Observation of the Metal-Tip Cantilevers	309
23.3.2 SEM/EDX Observation of Glass-Coated Tungsten Tips	311
23.4 Results and Discussions	312
23.4.1 KFM Observation with a Tungsten-Tip Cantilever	312
23.4.2 AFM Lithography with a Au-Tip Cantilever	314
23.4.3 SR-STM Observation with a Glass-Coated Tungsten Tip	316
23.5 Conclusions	319
References	320
