

# Contents

I. The Geochemistry of Rubidium and Strontium . . . . .	1
1. Introduction . . . . .	1
2. Rubidium . . . . .	1
3. Strontium . . . . .	4
4. The Rubidium/Strontium Ratio . . . . .	6
5. Summary . . . . .	8
II. Measurement of Geologic Time by the Rubidium-Strontium Method . . . . .	9
1. Introduction . . . . .	9
2. Radioactive Decay of $^{87}\text{Rb}$ to $^{87}\text{Sr}$ . . . . .	10
3. The Half-life of $^{87}\text{Rb}$ . . . . .	11
4. The Growth of Radiogenic $^{87}\text{Sr}$ in Rocks and Minerals . . . . .	12
5. The Rubidium-Strontium Isochron Method of Dating . . . . .	13
6. A Useful Approximation . . . . .	15
7. Analytical Methods . . . . .	17
8. Summary . . . . .	21
III. Uses of Strontium Isotopes in Petrogenesis . . . . .	23
1. Introduction . . . . .	23
2. Evolution of Strontium in the Continental Crust and the Upper Mantle . . . . .	23
3. Applications to Petrology . . . . .	26
4. Summary . . . . .	27
IV. Volcanic Rocks . . . . .	28
1. Introduction . . . . .	28
2. The Strontium Isotopic Data for Volcanic Rocks . . . . .	28
a) General Comment . . . . .	28
b) Basaltic Rocks from Oceanic Islands . . . . .	30
c) Sea-Floor Basalts . . . . .	31
d) Andesites of Volcanic Arcs . . . . .	33
e) Antarctic and Tasmanian Dolerites . . . . .	34
3. Variations in the Initial $^{87}\text{Sr}/^{86}\text{Sr}$ Ratio among and within Geologic Provinces . . . . .	36
a) Oceanic Islands . . . . .	36
b) Continental Volcanic Rocks . . . . .	37
4. Possible Causes of Variations in Isotopic Composition among Cogenetic Rocks . . . . .	39
5. Summary . . . . .	41

V. Granitic Rocks . . . . .	43
1. Introduction . . . . .	43
2. The Granite Problem . . . . .	43
3. Observed Initial $^{87}\text{Sr}/^{86}\text{Sr}$ Ratios of Granitic Rocks . . . . .	44
4. Interpretation and Discussion of Initial $^{87}\text{Sr}/^{86}\text{Sr}$ Ratios of Granites . . . . .	46
a) Granites with Initial Ratios within the Basalt Field . . . . .	46
The Salisbury Pluton, North Carolina . . . . .	47
b) Granites with High Initial $^{87}\text{Sr}/^{86}\text{Sr}$ Ratios . . . . .	48
The Heemskirk Granite, Western Tasmania . . . . .	48
c) Granites with Intermediate Initial $^{87}\text{Sr}/^{86}\text{Sr}$ Ratios . . . . .	50
The Isle of Skye . . . . .	51
Phanerozoic Batholiths of North America . . . . .	52
5. Summary . . . . .	54
VI. Alkalic Rocks and Carbonatites . . . . .	55
1. Introduction . . . . .	55
2. Carbonatites . . . . .	56
3. Alkalic Rocks . . . . .	59
a) Potassic Rocks . . . . .	62
b) Sodic Rocks . . . . .	64
c) Comparison of North American and African Alkalic Rocks . . . . .	64
4. Summary . . . . .	65
VII. Ultramafic and Related Rocks . . . . .	66
1. Introduction . . . . .	66
2. $^{87}\text{Sr}/^{86}\text{Sr}$ Ratios of Ultramafic Rocks . . . . .	66
a) The Layered Gabbro-Norite-Peridotite Association in Major Intrusions . . . . .	66
Anorthosites . . . . .	68
b) The Alpine-Type Peridotite-Serpentinite Association . . . . .	69
c) Ultramafic Rocks in Differentiated Basic Sills and in Minor Intrusions . . . . .	75
d) Kimberlites . . . . .	75
e) Ultramafic Nodules . . . . .	75
3. Summary . . . . .	77
VIII. Sedimentary Rocks and the Oceans . . . . .	78
1. Introduction . . . . .	78
2. Marine Carbonate Rocks and the Oceans . . . . .	78
3. Marine Evaporites . . . . .	84
4. Dating of Detrital Sedimentary Rocks . . . . .	85
5. Glauconite . . . . .	87
6. Nonmarine Carbonate Rocks . . . . .	90
7. Summary . . . . .	90
IX. Isotopic Homogenization of Strontium in Open Systems . . . . .	92
1. Introduction . . . . .	92
2. Contact Metamorphism . . . . .	93

3. Regional Metamorphism . . . . .	98
4. Open-System Behavior of Total-Rock Samples . . . . .	100
5. Chemical Weathering . . . . .	102
6. Summary . . . . .	104
X. Meteorites . . . . .	105
1. Introduction . . . . .	105
2. Rubidium and Strontium in Stony Meteorites . . . . .	106
3. The Ages of Stony and Iron Meteorites . . . . .	109
4. The Initial $^{87}\text{Sr}/^{86}\text{Sr}$ Ratios of Stony Meteorites . . . . .	116
5. Summary . . . . .	119
XI. The Moon . . . . .	120
1. Introduction . . . . .	120
2. Lunar Basalt . . . . .	120
3. Initial $^{87}\text{Sr}/^{86}\text{Sr}$ Ratios . . . . .	125
4. Luny Rock 1 and Sample 12013 . . . . .	126
5. The Soil . . . . .	127
6. Luna 16 . . . . .	128
7. Summary . . . . .	128
XII. The Evolution of the Isotopic Composition of Terrestrial Strontium	129
1. Introduction . . . . .	129
2. Evolution of Strontium in the Mantle . . . . .	129
3. Initial $^{87}\text{Sr}/^{86}\text{Sr}$ Ratios of Gabbro and Basalt . . . . .	131
4. Continental Growth . . . . .	135
5. Summary . . . . .	138
Appendix . . . . .	139
References for Appendix . . . . .	142
Bibliography . . . . .	148
Author Index . . . . .	172
Subject Index . . . . .	179
