<i>Foreword</i>	v
<i>Preface</i>	vii
1 THE WORLD OF COPPER	1
1.1 Copper in History	1
1.2 Copper in the Crust	2
1.3 Copper in Natural Waters	3
1.4 The Copper Cycle	5
1.5 Copper Biogeochemistry	6
1.6 Distribution of Copper in Some Geochemical Units	8
1.7 Production from Various Types of Copper Ore	8
1.8 Porphyry Copper Deposits	9
1.9 Deep-Sea Nodules	11
1.10 The World's Major Copper Areas	11
1.11 The Self-Sufficiency of the USA	13
1.12 World Copper Consumption and Related Factors	13
1.13 The Market for Copper	14
1.14 Planetary Reserves of Copper	16
1.15 The Future of Copper in the Twentieth Century and the Longer View	18
2 COPPER ORES AND PLATE TECTONICS	21
2.1 Classification of Copper Ores	21
2.2 Distribution of Porphyry Copper Ores	24
2.3 The Interrelations Between Plate Tectonics and Porphyry Copper Deposits	42
2.4 Other Sulphide Ores	45
2.5 The Evolution of the Crust and Copper Genesis	50
2.6 Time and Ore Deposition	56
3 COPPER DEPOSITS OF PLUTONIC ASSOCIATION	61
3.1 The Porphyry Coppers	61
3.2 Genetic Models of Porphyry Copper Deposition	64
3.3 The Lowell-Guilbert Model (the Andean Type)	65
3.4 The Vertical Extent of Porphyry Bodies	76
3.5 The Diorite Model	80

3.6	Comparison of Lowell-Guilbert and Diorite Models	81
3.7	Regional Characteristics of Porphyry Deposits	83
3.8	Genesis of Porphyry Copper and Evidence Bearing Upon its Origins	92
3.9	Transport of Ore Metals	101
3.10	Mafic Minerals as a Source of Copper in Porphyry Deposits	105
3.11	Stable Isotope Studies and Their Bearing Upon the Origin of Porphyry Coppers	106
3.12	Fluid Inclusion Studies	114
3.13	Copper Deposits of Mafic and Ultramafic Complexes	115
3.14	Copper Mineralisation in Carbonatite Complexes	117
3.15	Copper in Pyrometamorphic Skarns	119
4	COPPER ORES OF HYDROTHERMAL VEIN ASSOCIATION	129
4.1	Introduction	129
4.2	Types of Veins	130
4.3	Zoning Characteristics	131
4.4	Vein Associations	133
4.5	Hydrothermal Breccia Pipes Containing Copper	139
4.6	Hydrothermal Copper Deposits Associated with Under- saturated Magmas	145
4.7	Conclusion	149
5	COPPER DEPOSITS OF VOLCANOGENIC-SEDIMENTARY ASSOCIATION	152
5.1	Introduction	152
5.2	Genetic Relationships to Host Rocks and Age of Mineral- isation	155
5.3	Crustal Evolution and Massive Sulphide Deposits	158
5.4	Environments of Formation of Massive Sulphide Deposits	164
5.5	The Kuroko Deposits of Japan	169
5.6	The Troodos Deposits of Cyprus	183
5.7	Cyprus Type and Kuroko Type Deposits Contrasted	187
5.8	The Hydrothermal System, Metal Transport and Massive Sulphide Deposition	190
5.9	Diagenesis and Metamorphism	196
5.10	Volcanic Emanation Reaching Sea-floors	198
5.11	Genetic Affinities Between Massive Sulphides and Porphyry Copper	201
6	STRATIFORM COPPER DEPOSITS	211
6.1	Introduction	211
6.2	Classification of Stratiform Copper Deposits	218
6.3	The Central African Copperbelt as a Model of Stratiform Ore Deposition	218
6.4	Mineral Zoning	239
6.5	Copper Deposits of Non-Marine Origin	242
6.6	Models of Sedimentary Sulphide Ore Genesis	243

6.7	Detrital Deposition of Sulphides	267
6.8	Some Palaeogeographic Considerations	270
6.9	The Origins of Stratiform Copper	272
7	THE COPPER INDUSTRY AND ITS FUTURE (1)	279
7.1	Mining and Refining Copper	279
7.2	Dewatering in Mines	286
7.3	Subsidence in Mines	288
7.4	Scrap Copper	291
7.5	London Metal Exchange	292
7.6	World Copper Prices: Controls and Tendencies	294
7.7	State Control in the Copper Industry	301
7.8	Who Uses Copper	304
7.9	And Why	305
7.10	Substitution: The Rivals of Copper	306
7.11	The Immediate Future	308
8	THE COPPER INDUSTRY AND ITS FUTURE (2)	313
8.1	Development of Deep-Ocean and Continental Margin Resources	313
8.2	Deep-Sea Manganese Nodules	314
8.3	Exploitation of Manganese Nodules	320
8.4	Economics	324
8.5	Politico-Legal Aspects	329
8.6	Submarine Minerals Other than Nodules	334
8.7	Continental Margin Resources	334
8.8	Developments in Ocean Resource Development Technology	335
8.9	Copper—Towards the Twenty-First Century	339
8.10	Beyond the Twenty-First Century	341
	APPENDIX	345
A.1	Alphabetical List of Copper Minerals	345
A.2	World Copper Consumption 1974	351
A.3	USA Main Copper Mine Statistics 1972	352
A.4	Additional USA Copper Mine Statistics 1976	354
A.5	Identification of Potential Ore Bodies Through Biogeochemical Techniques	355
	<i>Index</i>	357
