<b>Preface to the First Edition</b> . . . . .	ix
<b>Preface to the Second Edition</b> . . . . .	xiii
<b>1 Introduction to Galois Theory</b> . . . . .	1
1.1 Some Introductory Examples . . . . .	1
<b>2 Field Theory and Galois Theory</b> . . . . .	7
2.1 Generalities on Fields . . . . .	7
2.2 Polynomials . . . . .	11
2.3 Extension Fields . . . . .	15
2.4 Algebraic Elements and Algebraic Extensions . . . . .	18
2.5 Splitting Fields . . . . .	22
2.6 Extending Isomorphisms . . . . .	24
2.7 Normal, Separable, and Galois Extensions . . . . .	25
2.8 The Fundamental Theorem of Galois Theory . . . . .	29
2.9 Examples . . . . .	37
2.10 Exercises . . . . .	40
<b>3 Development and Applications of Galois Theory</b> . . . . .	45
3.1 Symmetric Functions and the Symmetric Group . . . . .	45
3.2 Separable Extensions . . . . .	54
3.3 Finite Fields . . . . .	56
3.4 Disjoint Extensions . . . . .	60
3.5 Simple Extensions . . . . .	66
3.6 The Normal Basis Theorem . . . . .	69
3.7 Abelian Extensions and Kummer Fields . . . . .	73

3.8	The Norm and Trace	79
3.9	Exercises	82
<b>4</b>	<b>Extensions of the Field of Rational Numbers</b>	<b>89</b>
4.1	Polynomials in $\mathbf{Q}[X]$	89
4.2	Cyclotomic Fields	93
4.3	Solvable Extensions and Solvable Groups	97
4.4	Geometric Constructions	101
4.5	Quadratic Extensions of $\mathbf{Q}$	107
4.6	Radical Polynomials and Related Topics	112
4.7	Galois Groups of Extensions of $\mathbf{Q}$	122
4.8	The Discriminant	128
4.9	Practical Computation of Galois Groups	131
4.10	Exercises	137
<b>5</b>	<b>Further Topics in Field Theory</b>	<b>143</b>
5.1	Separable and Inseparable Extensions	143
5.2	Normal Extensions	151
5.3	The Algebraic Closure	155
5.4	Infinite Galois Extensions	160
5.5	Exercises	171
<b>6</b>	<b>Transcendental Extensions</b>	<b>173</b>
6.1	General Results	173
6.2	Simple Transcendental Extensions	181
6.3	Plane Curves	185
6.4	Exercises	191
<b>A</b>	<b>Some Results from Group Theory</b>	<b>195</b>
A.1	Solvable Groups	195
A.2	$p$ -Groups	199
A.3	Symmetric and Alternating Groups	200
<b>B</b>	<b>A Lemma on Constructing Fields</b>	<b>205</b>
<b>C</b>	<b>A Lemma from Elementary Number Theory</b>	<b>207</b>
	<b>Index</b>	<b>209</b>
