

# Table of contents

List of contributors	VII
Preface	IX
Introduction to early language development: Bridging brain and behavior <i>Guillaume Thierry and Angela D. Friederici</i>	XI
CHAPTER 1	
The method of event-related brain potentials in the study of cognitive processes: A tutorial <i>Claudia Männel</i>	1
CHAPTER 2	
Event-related potential studies of early language processing at the phoneme, word, and sentence levels <i>Barbara T. Conboy, Maritza Rivera-Gaxiola, Juan Silva-Pereyra and Patricia K. Kuhl</i>	23
CHAPTER 3	
Behavioral and electrophysiological exploration of early word segmentation in French: Distinguishing the syllabic and lexical levels <i>Thierry Nazzi, Galina Iakimova, Josiane Bertoncini, Sylvain Mottet, Josette Serres and Scania de Schonen</i>	65
CHAPTER 4	
Reflections on reflections of infant word recognition <i>Valesca Kooijman, Elizabeth K. Johnson and Anne Cutler</i>	91
CHAPTER 5	
The onset of word form recognition: A behavioural and neurophysiological study <i>Guillaume Thierry and Marilyn May Vihman</i>	115

CHAPTER 6

- Neurophysiological correlates of picture-word priming in one-year-olds** 137  
*Manuela Friedrich*

CHAPTER 7

- The effects of early word learning on brain development** 161  
*Elizabeth A. Sheehan and Debra L. Mills*

CHAPTER 8

- From perception to grammar** 191  
*Jacques Mehler, Ansgar Endress, Judit Gervain and Marina Nespors*

CHAPTER 9

- The development of syntactic brain correlates during the first years of life** 215  
*Angela D. Friederici and Regine Oberecker*

CHAPTER 10

- Language acquisition and ERP approaches: prospects and challenges** 233  
*David Poeppel and Akira Omaki*

- Glossary** 257

- Index** 261
