

CONTENTS

Preface ix

Chapter 1 Introduction to Quantitative Research 1

- An Overview of Quantitative Research in Communication 5
- The Purpose of Quantitative Research 7
- The Nature of Variables and Data 9
- Types of Quantitative Research Designs 10
- Steps in Quantitative Research 14
- An Overview of the Book 15
- References 16

Chapter 2 Using Statistics in Quantitative Research 17

- Types of Statistics 18
 - Frequency Distributions* 18
 - Measures of Central Tendency* 19
 - Measures of Dispersion* 20
 - Tying It All Together in the Normal Distribution* 20
 - Looking Ahead to Test Statistics and Effect Sizes* 23
- The Logic of Hypothesis Testing 24
- Writing Results 28
- References 29
- Sample SPSS Printouts 31

Chapter 3 Independent Samples or Student's *t* Test 35

- Understanding the Independent Samples *t* Test 35
- Calculating the Independent Samples *t* Test 37
- Assumptions of the *t* Test 41
- Using Computer Programs to Calculate *t* Tests 41
- Interpreting Results of an Independent Samples *t* Test 43

The Independent Samples <i>t</i> Test in Communication Research	44
References	46
Sample SPSS Printouts	48

Chapter 4 ONEWAY Analysis of Variance 51

Understanding the ONEWAY ANOVA	52
Calculating a ONEWAY ANOVA	53
Assumptions of the ONEWAY ANOVA	59
Using a Computer to Calculate ONEWAY ANOVA	61
Interpreting the Results of a Significant ONEWAY	62
The ONEWAY ANOVA in Communication Research	64
References	66
Sample SPSS Printouts	67

Chapter 5 Factorial ANOVA 71

Understanding the Factorial ANOVA	72
Calculating a Factorial ANOVA	75
Assumptions of Factorial ANOVA	79
Using Computer Programs to Calculate Factorial ANOVAs	79
Interpreting the Results of a Significant ANOVA	80
The Factorial ANOVA in Communication Research	83
References	86
Sample SPSS Printouts	87

Chapter 6 Analysis of Covariance 91

Understanding the Analysis of Covariance	92
Assumptions of ANCOVA	97
Interpreting Results of ANCOVA	98
Concluding Comments on ANCOVA	99
The ANCOVA in Communication Research	100
References	102
Sample SPSS Printouts	103

Chapter 7 Multivariate ANOVA 107

Multivariate Designs	108
<i>Why Use Multivariate Designs?</i>	109
<i>Statistical Assumptions of Multivariate Designs</i>	110
<i>Reporting Requirements</i>	112
Repeated Measures	114
<i>Why Use Repeated Measures?</i>	115
<i>Interpretations and Assumptions</i>	116

The MANOVA in Communication Research	119
References	121
Sample SPSS Printouts	122

Chapter 8 Chi-Square Statistic 125

Understanding the Chi-Square Statistic	125
Calculating a Chi-Square	126
Assumptions of the Chi-Square Statistic	129
Using Computer Programs to Calculate a Chi-Square	130
Interpreting the Results of a Significant Chi-Square	131
The Chi-Square in Communication Research	133
References	136
Sample SPSS Printouts	137

Chapter 9 Simple Bivariate Correlation 139

Understanding the Correlation Coefficient	140
Calculating the Correlation Coefficient	141
Assumptions of the Correlation Coefficient	145
Using Computer Programs to Calculate Correlation Coefficients	146
Interpreting the Results of a Correlation	147
Correcting for Various Artifacts	148
The Correlation Coefficient in Communication Research	150
References	153
Sample SPSS Printouts	154

Chapter 10 Multiple Regression 155

Understanding Multiple Regression	155
Calculating a Multiple Regression	159
Assumptions of Multiple Regression	162
Using Computer Programs to Calculate Regression	164
Interpreting the Results of a Multiple Regression	166
Multiple Regression in Communication Research	168
References	170
Sample SPSS Printouts	171

Chapter 11 Factor Analysis 175

The Purpose of Factor Analysis	176
Exploratory Factor Analysis	179
Confirmatory Factor Analysis	183
Factor Analysis in Communication Research	189

References	192
Example SPSS Printouts	193

Chapter 12 Advanced Modeling Techniques 197

Understanding Advanced Modeling	198
Describing the Model	200
Understanding the Test	203
Two Methods of Analysis	204
<i>Ordinary Least Squares</i>	205
<i>Maximum Likelihood Estimation</i>	206
<i>Choosing a Technique</i>	206
Other Advanced Modeling Approaches	208
SEM in Communication Research	209
References	212

Chapter 13 Meta-Analysis 213

Mathematical Argument for Meta-Analysis	216
The Practical Argument for Meta-Analysis	218
Structure of Writing in Meta-Analysis	218
The Literature Review	218
Methods for Conducting the Meta-Analysis	219
Results Section Reporting of a Meta-Analysis	220
Meta-Analysis in Communication Research	222
References	225

Appendix A Critical Values for the t Statistic 227

Appendix B Critical Values for the Chi-Square Statistic 229

Appendix C Critical Values for the F Statistic 231

Appendix D Critical Values for the r Statistic 235

Index 237

About the Authors 241
