

## CONTENTS

### List of Figures and Tables

Preface

Acknowledgements

1.	MICROELECTRONICS AND SPECIAL EDUCATION: OPPORTUNITIES FOR PROGRESS	1
	Classification and the Handicapped	2
	Relation between modern philosophy of Special Education and Technology.	5
2.	THE POTENTIAL OF MICROELECTRONICS	12
	The man-machine analogy	14
	The man-machine analogy and specific handicapped groups	16
	The physically-handicapped	17
	Sensory handicaps	18
	Microtechnology-what is involved ?	22
3.	COMPUTER MICROWORLDS FOR THE HANDICAPPED	38
4.	LINGUISTIC ISSUES IN PROFOUND PRE-LINGUAL DEAFNESS	58
5.	COMMUNICATION, INTERACTION AND READING	76
6.	MENTAL AND MOTOR HANDICAP	94
7.	OVERVIEW OF GENERAL PRINCIPLES AND ISSUES	133
8.	COMMUNICATING WITH MACHINES: WHAT CAN BE ACHIEVED ?	150

9.	THE CONSTRUCTION OF A NATURAL LANGUAGE UNDERSTANDING PROGRAM	168
	Reasons for developing natural language understanding programs	169
	LUCALD- a language understanding computer-assisted learning system	171
	How LUCALD deals with its language input	179
	Dictionary search	182
	Syntax analysis	185
	Semantic analysis	190
	Evaluation of LUCALD	192
	Implications for future computer-assisted learning	194
10.	DEVELOPMENT OF INTERACTIVE LEARNING PROGRAMS	196
	Square and Cross	202
	Shapes	206
	Colour the Shapes	209
	Hidden Shapes	212
	Munchymaths	216
	General comments on interactive learning programs	219
11.	DRILL AND PRACTICE PROGRAMS: EXAMPLES AND APPLICATIONS	224
	Some software for the Cambridgeshire Language Development Programme	226
	Further details of the CLDP	232
	CLDP in a practical context	241
	Another Larsp-based approach to language development	244
12.	MICROTECHNOLOGY FOR THE PHYSICALLY AND MENTALLY HANDICAPPED	253
	Microtechnology for the Physically Handicapped	254
	Machine Access for the Physically Handicapped	263
	Microtechnology for the Mentally Handicapped	266
	Computer-assisted learning environments for the moderately mentally handicapped	287
13.	CONCLUDING COMMENTS	299
	Index	308
