

# CONTENTS

	vii	Preface
	viii	Organising Committee
<b>Alfred Bork</b>	<b>1</b>	Computers and the future: education
<b>J. L. Alty</b>	<b>5</b>	Path algebras: a useful CAI/CAL analysis technique
<b>Kenneth Tait</b>	<b>15</b>	The building of a computer-based teaching system
<b>Peter Jackson</b>	<b>21</b>	Towards a theory of topics
<b>Jesús Vázquez-Abad and Réal Larose</b>	<b>27</b>	Computers, adaptive teaching and operational learning systems
<b>Deryn M. Watson</b>	<b>31</b>	The role of CAL in decision-making in the humanities
<b>A. G. Law, R. B. Maguire, D. F. G. Sabo and B. M. Shuparski</b>	<b>35</b>	Computer voice support for visually-handicapped students
<b>M. Ferraris, V. Midoro and G. Olimpo</b>	<b>41</b>	Petri nets as a modelling tool in the development of CAL courseware
<b>Robert D. Harding</b>	<b>51</b>	Everyone is a programmer now
<b>John Whiting</b>	<b>59</b>	Cognitive and student assessments of a CAL package designed for mastery learning
<b>R. J. Hartley</b>	<b>69</b>	Evaluation of a CAL package for modelling
<b>Marilyn E. Kidd and Glyn Holmes</b>	<b>77</b>	CAL evaluation: a cautionary word
<b>Jim Ridgway, David Benzie, Hugh Burkhardt, Jon Coupland, Graham Field, Rosemary Fraser and Richard Phillips</b>	<b>85</b>	Investigating CAL?
<b>Jim Ridgway, David Benzie, Hugh Burkhardt, Jon Coupland, Graham Field, Rosemary Fraser and Richard Phillips</b>	<b>93</b>	Conclusions from CALtastrophes
<b>J. W. Smith</b>	<b>101</b>	Using computers to teach structural analysis
<b>P. A. Tinson</b>	<b>107</b>	CAL in nuclear engineering: a personal case study

<b>Robert D. Harding</b>	<b>113</b>	CATAM revisited
<b>Bruce C. Benward</b>	<b>127</b>	CAL in music designed for use with a companion text
<b>L. A. Wood</b>	<b>133</b>	Some experiences with CAL in geotechnical engineering
<b>J. Driscoll</b>	<b>137</b>	General manufacturing management learning through computer simulation
<b>J. Dale Burnett and Larry Miller</b>	<b>145</b>	Computer-assisted learning and reading: developing the product or fostering the process?
<b>A. G. Law, D. G. Vandenberghe, K. C. Wellsch and J. H. Weston</b>	<b>151</b>	CAL: a user-simple masonry block simulator
<b>M. D. Leiblum, R. van Haarlem and W. H. T. Huisman</b>	<b>155</b>	Computer-based learning in a University Zoology course
<b>Jenny Preece</b>	<b>159</b>	A study of pupils' graph concepts with a qualitative interactive graph sketching program
<b>Chris Sadler and Sue Eisenbach</b>	<b>165</b>	Selecting microcomputers for schools
<b>Richard J. Phillips, Hugh Burkhardt, Jon Coupland, Rosemary Fraser and Jim Ridgway</b>	<b>173</b>	The future of the microcomputer as a classroom teaching aid: an empirical approach to crystal gazing
<b>K. A. Shaw, S. J. Swallow and P. Chapman</b>	<b>179</b>	A use of microcomputers in training at ICI
<b>I. Every and E. Scanlon</b>	<b>183</b>	Discovering physics with microcomputers
<b>Jane Petty, Hugh Burkhardt, Rosemary Fraser and Jan Stewart</b>	<b>189</b>	Micros in the primary curriculum: the ITMA approach
<b>Richard C. Smith</b>	<b>197</b>	Technical management of a microcomputer-assisted learning project
<b>Richard Freeman</b>	<b>203</b>	MAIL: micro aided learning
<b>Pamela Fiddy and Lloyd Yam</b>	<b>209</b>	Prestel and home education for young children
<b>Noel Wilson</b>	<b>213</b>	Educational software development and exchange: present and future
<b>F. H. D. Gastkemper</b>	<b>219</b>	The integrated use of computer assisted instruction (CAI) and videodisk (VLP) for observation training
	<b>225</b>	Index
