

CONTENTS

	vii	Preface
	viii	Organising Committee
J. L. Alty	1	The impact of microtechnology. A case for reassessing the role of computers in learning
Thomas A. Dwyer and Margot Critchfield	7	Multi-computer systems for the support of inventive learning
David J. Skyrme	13	The evolution of graphics in CAL
J. M. Jenkin	25	Some principles of screen design and software for their support
J. W. Brahan and David Godfrey	33	A marriage of convenience: Videotex and Computer Assisted Learning
Charles van der Mast	39	A portable program to present courseware on microcomputers
Richard J. Phillips	45	An investigation of the microcomputer as a mathematics teaching aid
W. J. Emond	51	Some benefits of micro-computers in teaching statistics
T. Vincent	55	Computer assisted support for blind students. The use of a microcomputer linked voice synthesizer
P. David Mitchell	61	Representation of knowledge in CAL courseware
Sture Hägglund, Johan Elfström, Hans Holmgren, Olle Rosin and Ove Wigertz	67	Specifying control and data in the design of educational software
Hugh Burkhardt, Rosemary Fraser and Colin Wells	77	Teaching style and program design
J. A. M. Howe, P. M. Ross, K. R. Johnson, F. Plane and R. Inglis	85	Teaching mathematics through programming in the classroom
J. B. H. du Boulay and J. A. M. Howe	93	LOGO building blocks. Student teachers using computer-based mathematics apparatus
Gösta Grahne	99	Adaptive features of a CAL system based on information retrieval

Gary Boyd, Arnold Keller and Roger Kenner	105	Remedial and second language English teaching using Computer Assisted Learning
Brian Farrington	113	Computer based exercises for language learning at university level
Robert Ariew	117	A management system for foreign language tests
Francoise Demaiziere	121	An experiment in Computer Assisted Learning of English grammar at the University of Paris VII
J. Driscoll	127	A study of an application of Computer Aided Learning to business simulation
A. Demaid, P. G. Butcher and J. Verrier	133	Understanding phase diagrams. An example of the integration of interactive graphics into a CAL authoring system
P. J. Murphy	141	Biological simulations in distance learning
Joachim P. E. Wedekind	145	Computer aided model building and CAL
R. Min, H. van Kan and H. Struyker Boudier	155	Computer simulation programs in problem-oriented medical learning at the University of Limburg
M. D. Leiblum	159	A CAI service group considers computer managed instruction and the interactive instructional system
C. Blandford	165	CAL software design for transferability
Jesús Vázquez-Abad, Laura R. Winer and P. David Mitchell	175	Integrative CAL. Multi computer and multi media
	179	Index
