Contents

Preface		7
Chapter 1	**Information Technology**	9
	Definitions of Information Technology	9
	Old and New Information Technology	13
	Publishing	15
	Telecommunications	19
	Computers	20
	Microelectronics	22
	Software	23
	Input and Output Devices	23
Chapter 2	**Curriculum Change in Further Education**	27
	Models of Curriculum Change	27
	Evaluation	38
Chapter 3	**Applications of Information Technology and the Curriculum in Further Education**	52
	IT and the Curriculum	53
	Computer Literacy	56
	Major Curriculum Bodies and IT	57
	Major Reports on IT and Education and Training in the UK	58
	Open Tech Projects	60
	Concepts of Open Learning	62
	Council for Educational Technology (CET)	63
	IT in Distance Education	66
	Microelectonics Education Programme (MEP)	70

Chapter 4 **Information Technology and the Curriculum of Disabled Students** 74

Learning Problems of Disabled Students 75
Visually Handicapped Students — Reading and Writing 78
Physically Handicapped Students 85
Deaf and Hearing — Impaired Students 88
Sources of Information 90

Chapter 5 **Issues: Vocational Education and Training; Economic (UK); Social and Political; and Educational** 92

Vocational Education and Training Issues 92
Economic issues and FE in the UK 102
Social and Political Issues 105
Educational Issues 107

Chapter 6 **The Future** 114

The Future and Computer-Based Education 116
IT Developments and the Future 119
Challenges for the 1980s 122

Index 124
