

Contents

The colour plates referred to in the text are between pp. 38 and 39.

List of contributors	ix
1. Introduction <i>Glyn W. Humphreys, John Duncan, and Anne Treisman</i>	1
Section 1 Visual selective attention	11
2. Visual attention mediated by biased competition in extrastriate visual cortex <i>Robert Desimone</i>	13
3. Sensory gain control (amplification) as a mechanism of selective attention: electrophysiological and neuroimaging evidence <i>Steven A. Hillyard, Edward K. Vogel and Steven J. Luck</i>	31
4. A computational theory of visual attention <i>Claus Bundesen</i>	54
5. How do we select perceptions and actions? Human brain imaging studies <i>Geraint Rees and Christopher D. Frith</i>	72
Section 2 Attention and perceptual integration	89
6. Feature binding, attention and object perception <i>Anne Treisman</i>	91
7. Converging levels of analysis in the cognitive neuroscience of visual attention <i>John Duncan</i>	112
8. Cross-modal links in spatial attention <i>Jon Driver and Charles Spence</i>	130
Section 3 Spatial representation and attention	151
9. Place cells, navigational accuracy, and the human hippocampus <i>John O'Keefe, Neil Burgess, James G. Donnett, Kathryn J. Jeffery and Eleanor A. Maguire</i>	153
10. Neural representation of objects in space: a dual coding account <i>Glyn W. Humphreys</i>	165
11. Human cortical mechanisms of visual attention during orienting and search <i>Maurizio Corbetta and Gordon L. Shulman</i>	183

Section 4	Visual attention and action	199
12.	Neural coding of 3D features of objects for hand action in the parietal cortex of the monkey <i>Hideo Sakata, Masato Taira, Makoto Kusunoki, Akira Murata, Yuji Tanaka and Ken-ichiro Tsutsui</i>	201
13.	Neuropsychological studies of perception and visuomotor control <i>A.D. Milner</i>	217
14.	Action-based mechanisms of attention <i>Steven P. Tipper, Louise A. Howard and George Houghton</i>	232
Section 5	The control of attention	249
15.	Prefrontal cortex and the neural basis of executive functions <i>Earl K. Miller</i>	251
16.	Task-switching: positive and negative priming of task-set <i>Alan Allport and Glenn Wylie</i>	273
17.	Sustained attention deficits in time and space <i>Ian H. Robertson and Tom Manly</i>	297
18.	Interaction between perception and action systems: a model for selective action <i>Robert Ward</i>	311
	Index	333
