

# CONTENTS

<b>CHAPTER 1. HISTORY AND SCOPE OF THE METHOD</b>	<b>1</b>
1.1 Early History of the Understanding of Light	1
1.2 The Nineteenth Century: The Beginnings of Chemical Spectroscopy	3
1.3 Early Developments in the Atomic Absorption Field	6
1.4 Advantages and Scope of the AAS Method	9
1.5 Some Limitations of the AAS Method	13
<b>CHAPTER 2. ATOMIC PROCESSES</b>	<b>15</b>
2.1 The Quantum Theory	15
2.2 Units and Symbols	17
2.2.1 <i>The Energy Level Diagram</i> , 18	
2.3 Transfer of Energy by Resonance	21
2.3.1 <i>Miscellaneous Factors Pertaining to Resonance Absorption</i> , 22	
2.4 Wavelength Lists and Line Atlases	24
2.4.1 <i>Selection of the Analytical Line</i> , 25	
<b>CHAPTER 3. INSTRUMENTATION</b>	<b>27</b>
3.1 Optical Path Arrangements	27
3.2 Monochromators	30
3.2.1 <i>Optics of the Monochromator</i> , 31	
3.2.2 <i>Illumination of the Slit</i> , 33	
3.2.3 <i>Grating Theory</i> , 34	
3.2.4 <i>The Multiplier Phototube Detector</i> , 37	
3.2.5 <i>Readout Devices</i> , 40	
3.3 Excitation Sources	42
3.3.1 <i>Hollow-Cathode Lamps</i> , 42	

3.3.2	<i>Electrodeless Discharge Lamps</i> , 49	
3.3.3	<i>Other Excitation Sources</i> , 50	
3.4	Flames	51
3.5	Burners and Nebulizers	56
3.6	The Furnace or Flameless Atomizer	59
3.6.1	<i>Temperature Programming</i> , 63	
3.6.2	<i>Background Correction</i> , 64	
3.7	The Delves Cup Atomizer	65
3.8	Flame Emission Methods	67
3.8.1	<i>Flame Emission Spectroscopy</i> , 67	
3.8.2	<i>Atomic Fluorescence Spectroscopy</i> , 69	
3.9	Multielement Analysis	71
<b>CHAPTER 4.</b>	<b>TECHNIQUE</b>	<b>72</b>
4.1	Preparation of the Sample	72
4.1.1	<i>Sampling Techniques</i> , 72	
4.1.2	<i>Dissolution Methods</i> , 74	
4.1.3	<i>Chemical Preparation</i> , 76	
4.1.4	<i>Special Treatments</i> , 80	
4.2	Interferences	89
4.2.1	<i>Chemical Interferences</i> , 90	
4.2.2	<i>Physical Interferences</i> , 91	
4.2.3	<i>Spectroscopic Interferences</i> , 92	
4.3	Organizational Details	94
4.3.1	<i>Adjustment of Analytical Parameters</i> , 94	
4.3.2	<i>Selection of Wavelength</i> , 96	
4.3.3	<i>Optical Arrangements</i> , 96	
4.3.4	<i>Sensitivity and Detection Limits</i> , 97	
4.4	The Calibration or Working Curve	99
4.4.1	<i>The Calculation of Absorbance</i> , 99	
4.4.2	<i>The Calibration Plot</i> , 100	
4.5	Statistical Operations	103
4.5.1	<i>The Linear Calibration Curve</i> , 103	
4.5.2	<i>Tests of Reliability</i> , 104	
4.5.3	<i>Photometric Error Function</i> , 108	

<b>CHAPTER 5. PHYSICAL AND CHEMICAL DATA ON THE ELEMENTS</b>	<b>110</b>
5.1 Alkalies: Lithium, Sodium, Potassium, Rubidium, Cesium	114
5.2 Alkaline Earths: Beryllium, Calcium, Magnesium, Strontium, Barium	115
5.3 Copper, Silver, Gold	116
5.4 Transition Metals: Vanadium, Chromium, Manganese, Iron, Cobalt, Nickel	117
5.5 Low Melting Metals: Zinc, Gallium, Germanium, Cadmium, Indium, Tin, Mercury, Thallium, Lead	118
5.6 Titanium, Zirconium, Hafnium	120
5.7 Boron, Aluminum, Silicon	121
5.8 Arsenic, Antimony, Bismuth	122
5.9 Molybdenum, Technitium, Rhenium	123
5.10 Platinum Group: Ruthenium, Rhodium, Palladium, Osmium, Iridium, Platinum	124
5.11 Heavy Metals: Tungsten, Thorium, Uranium	126
5.12 Phosphorus, Selenium, Tellurium	127
5.13 Rare Earths	128
5.14 Elements Determinable by Indirect Methods	130
<b>CHAPTER 6. APPLICATIONS</b>	<b>131</b>
6.1 Industrial Applications	132
6.2 Biological Applications, Including Foods and Animal Feeds	132
6.3 Geological and Metallurgical Applications	132
6.4 Environmental Applications—Air, Waters, and Food Contamination	132
6.5 Miscellaneous Applications	132
<b>Appendix 1 Commercial Equipment</b>	<b>169</b>
<b>Appendix 2 Safe Practices in the Laboratory</b>	<b>173</b>
<b>References</b>	<b>177</b>
<b>INDEX</b>	<b>189</b>
