

Contents

Introduction 7

Part 1 The design of learning sequences

Introduction 9

1. **Analysing performance and setting objectives** 11
2. **Drawing up a learning plan** 28
3. **Defining and ordering the content** 38
4. **How frames are written** 52

Part 2 Computing systems for the trainer – aspects of computing generally relevant to computer-based training

Introduction 61

5. **The components of a computer – the hardware** 63
6. **The man-machine interface – how you communicate with the computer** 83
7. **Making the computer work for you – the software** 101
8. **Communicating between computers** 114
9. **Developments relevant to CBT** 121

Part 3 Computer-based training

Introduction 132

10. **CBT in the spectrum of training technology** 134
11. **When is CBT worth considering?** 144
12. **From frames to screens** 158
13. **Courseware development in CBT** 173
14. **Using an author language** 197
15. **Testing and evaluation** 217
16. **Computer management of instruction** 225
17. **Some authoring systems** 237
